# iHoyMap

iHoyMap uses only official charts. Weekly updated.

It is a navigation planning and charting application.

Boat's position is tracked on the chart real time.

Its user-friendly and intuitive interface allows seamless zooming in and out.

Mark an anchoring point, if the anchor drags, iHoyMap will trigger an alarm.

Your trips are marked real time and saved for future reference for you.

Put your waypoint for your favorite locations such as fuel, fishing spot, water, ports, anchor points and more.

iHoyMap and iHoy Captain are integrated. Routes planned with iHoyMap can be followed by iHoy Captain automatically.
