HIGH TECH PROBES

Σeasy.it INDUSTRIAL AUTOMATION | a CONTROL-HTP brand

**1981** Control was founded near Milan as an engineering company dedicated to industrial automation

**1995** Control invested in R&D realizing high-tech products for white goods

**2009** Control H.T.P. increased its business in renewable energy: Thermal solar and PV

**2020** The experience in Ho.Re.Ca. sector allowed Control H.T.P. to produce graphical design interfaces and products that improve machines' design

**1990** Control became leader in the temperature sensors production, working with the most important household appliances players in the market

**2001** With the new name of Control H.T.P. Srl, the company acquired new market shares and started working in the professional market

**2014** The startup of the new electronic division allowed Control H.T.P. to introduce itself on the market as a supplier of integrated electronic solutions

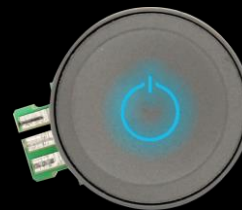

**2022** Control H.T.P. started working on IOT to add this function to its electronic boards

# Main Products

## PROBES AND ELECTRONIC SENSORS

Temperature Probes: devices for temperature detection for domestic and professional appliances.  
Level probes: for conductive liquid, security thermostat and thermofuse

## PUSH BUTTONS AND LIGHT INDICATORS

High reliability control devices designed to guarantee functionality and aesthetics.  
Available in different colors and configurations

## DISPLAY AND KEYBOARDS

Graphical interface systems including LCD/OLED touch screen displays and capacitive or electromechanical keyboards with different designs and configurations

## ELECTRONIC BOARDS

Electronic main boards for professional equipment, coffee machines, water dispensers and household appliances

# R&D Department

**CONTROL**  
HIGH TECH PROBES

Σeasy.it INDUSTRIAL AUTOMATION | a CONTROL-HTP brand

Control HTP prides its 40 years experience in designing electronic devices.

That's why we always offer innovative solutions to our Customers.

High skills in both electronic and mechanical fields guarantee the design of our high quality and reliable products.

R&D department designs and develops everything we produce, directly interfacing with the Customers to better understand their needs.

# Know-How & Custom Products

## 4 phases of all our products' development for high-tech applications:

- hardware and software design
- prototyping
- production
- testing, carried out with automatic and certified systems

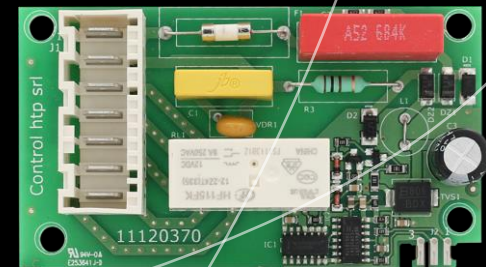

Control H.T.P. addresses to different realities thanks to its internal structure and production which ranges from small and personalized batches to million of pieces batches.

Control H.T.P. offers to its Customers a dedicated design service, flexibility in the requests, modifications and delivery times and assistance at any level of production employing the most innovative technologies.

In detail we offer:

- FEASIBILITY ANALYSIS
- ANALOGIC AND DIGITAL HARDWARE DESIGN
- PCB DESIGN USING STATE-OF-THE-ART COMPONENTS AND PROCEDURES
- FIRMWARE DESIGN
- SOFTWARE FOR REMOTE CONTROL DEVICES
- SUPPORT FOR ELECTRIC AND ELECTROMECHANICAL WIRING DEVICE DESIGN

# The Mission

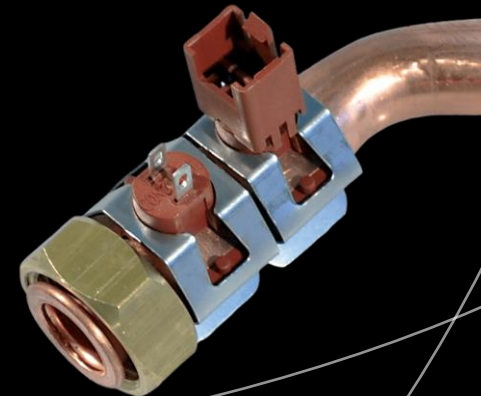

CONTROL  
HIGH TECH PROBES

$\Sigma$ easy.it INDUSTRIAL AUTOMATION | a CONTROL-HTP brand

Control H.T.P. main goals are:

- Successfully working in the fields of temperature probes and electronic devices, with the highest flexibility and the innovative attitude which has always characterized the Company since its foundation
- Being an essential supplier in the markets we deal with, optimizing our products to match our Customers' needs
- Achieving the ever-increasing challenging targets to assure the continuous improvement of the Company

# Sales Department Customer Care

**CONTROL**  
HIGH TECH PROBES

$\Sigma$ easy.it INDUSTRIAL AUTOMATION | a CONTROL-HTP brand

Transparency, fairness and protection of the Customers and their intellectual property are always guaranteed by our sales department

Flexibility, quick answer and expertise are essential to create the right relationship between Customer and Supplier

We always support our Customers in studying solutions related to new projects or to existing products
