

The Terrazza TMC® kit consists of:

1. Brushing machine (Terrazza C43)

Power ..... : 1300 W – 230 V  
 Cable Length ..... : 12 meter  
 Brush size ..... : 430 mm  
 Rotation speed brush ..... : 154 rt/min  
 Weight ..... : 41 kg

3. Mini-brush

2. Main brush

4. Coco brush

The Terrazza TMC® options :

Handy Wheels

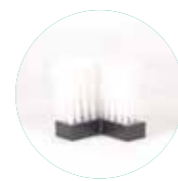

Weedee®  
Weed removal  
brush

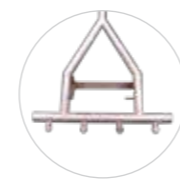

Standard  
Brush  
element

Metal brush  
element

Soft brush  
element

Multi-line rinse  
system

**Terrazza TMC Kit®**

Terrace Cleaning Machine

**Terrazza MC®**

Innovators in **green**  
 cleaning technology

## Terrazza MC: sustainable and ecological cleaning and weed removal of all kinds of hard surfaces

Thanks to a unique and worldwide patented brush system, virtually all types of paved surfaces can be cleaned with the TMC brushing machine.

The combination of long and short brush tufts on the **TMC brush** not only cleans the surface, but also removes dirt from between the joints.

The mother brush is equipped with 4 block brushes that are adjustable in height by means of extenders. Due to the difference in length of the synthetic tufts, optimal cleaning can be achieved. The shorter tufts ensure cleaning of the surface while the longer tufts remove the dirt from between the joints. Cleaning with the TMC is 100% ecological: NO chemical agents or detergents are used. The loosened dirt, mixed with some water, forms an excellent natural cleanser.

The use of water, low noise emissions and low energy consumption (= low CO2) also benefit the environment.

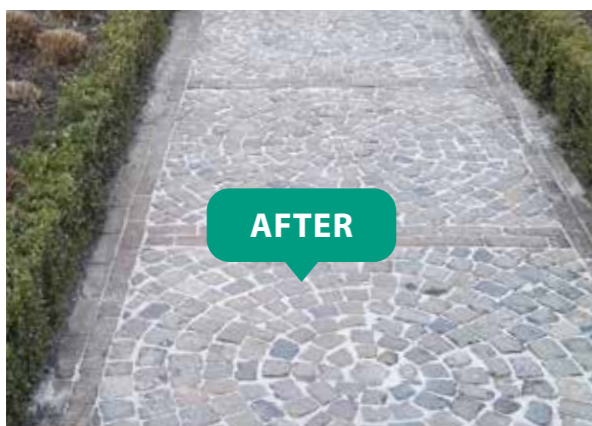

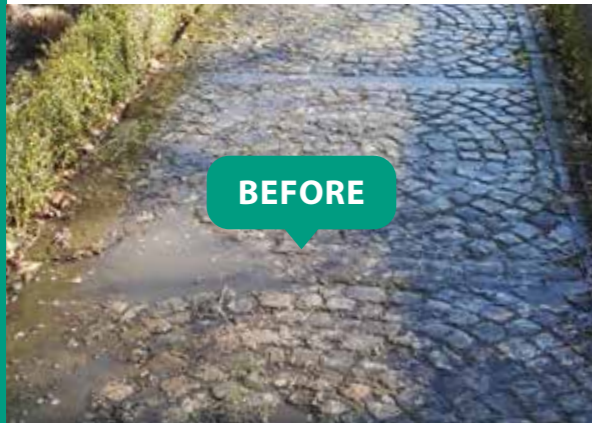

Due to the polishing effect of the brush, the surface is not damaged - in contrast to the use of high pressure - and thus the adhesion of new dirt after cleaning is reduced to a minimum.

Besides the TMC mother brush, the **Weedee® brush** can be mounted on the TMC brushing machine.

The **Weedee® weed brush** removes weeds and mosses from concrete tiles, cobblestones, paving stones, etc.,...

Thanks to the unique combination of synthetic tufts with a few metal tufts and the rotation technique of the Weedee, the surface is brushed and weeds and moss disappear.

Removing weeds and mosses with the Weedee® is also very ecological! Here too, no use is made of chemical means or high pressure and, moreover, work can be done without water.

## Why choose the TMC for cleaning and weed removal of pavements?

There are numerous advantages when cleaning with the specially patented **Terrazza MC brush**:

- due to the unique combination of long and short tufts, **the dirt is removed both from the surface and from between the joints.**
- due to the polishing effect of the brush, **the surface is not damaged** (in contrast to the use of high pressure)
- due to the fact that the surface is not roughened - not damaged - **the adhesion of new dirt after cleaning is reduced to a minimum.**
- terraces, paths, car parks in concrete **paving need to be "repaired" or replaced less quickly** because the joints are not damaged and / or washed away while cleaning with the special designed brushes.
- the cleaning is done on the basis of the rotation of the brushes: **no use is made of chemical agents or detergents, even of high pressure.**
- there is **no projection of dirt or contamination of walls and windows.**
- the **original color** of the pavement re-appears.
- in the treatment of wooden ramps **the slippery condition disappears and thus the risk of slipping is reduced.**

Removing weeds with **the Weedee® brush** also has many advantages:

- the unique **Weedee® brush** is the only **dry brushing machine** that removes weeds and mosses from both the surface and between the joints.
- thanks to the wide brush diameter removing weeds can be done 3 to 4 times faster, which **results in a huge gain of time.**

## For every terrace - for every pavement

After a treatment with the Terrazza MC cleaning solution, the result will surprise you.

In a short time your hard surface looks like new again!

The Terrazza MC brush can be used on:

- Natural stone
- Concrete
- Clinkers
- Wooden decking
- Synthetic ramps
- Synthetic surface of playgrounds or sports fields
- Asphalt
- etc., ...
