Introduction

About Us

Aquator Marine was founded on the belief that yacht software is essential for effective yacht management. Accurate, timely data is critical for safety, operability, and longevity.

Our goal is to create data-driven, cost-effective solutions that enhance productivity and simplify yacht management through software, education, and community.

With a global team of diverse expertise, we are dedicated to transforming the industry.

Our Approach

Our mission is to revolutionize yacht management through state-of-the-art technology and unparalleled collaboration. Our approach is rooted in innovation, dynamism, and data-driven insights, ensuring our platform is always at the forefront of industry advancements.

Innovation-driven

Utilizing the latest technology to enhance yacht management processes.

Collaborative

Encouraging teamwork and open communication for maximum efficiency.

Transparent

Promoting trust and clarity in all aspects of our platform and operations.

Configurable

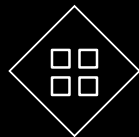

Offering a customizable, user-friendly web and mobile application.

Data-centric

Harnessing data insights to optimize decision-making and performance.

Digitally secure

Safeguarding your sensitive information with robust security measures.

Get Organized

Plan and structure project work in a way that's best for you. Set priorities and deadlines. Share details and assign tasks.

Real-Time Info

Receive timely updates on projects and tasks and consolidated reports. All in one place, available and shareable when needed.

Stay On Track

Follow projects and tasks through every stage. You know where work stands and can keep everyone aligned on goals.

Hit Deadlines

Create visual project plans to see how every step maps out over time. Identify risks. Eliminate roadblocks. Even when plans change.

Our Team

Gerben Visser

Founder & CEO

After starting his professional career in finance, Gerben moved to financial technology start-ups, gaining experience in building companies and developing technology platforms.

Taking into account the number of challenges present in managing a yacht and combining his experience in fin-tech and finance Gerben developed Aquator Marine a Yacht Management Software platform that delivers accurate, timely, and interpretive data that is critical to a yacht's safety, operability, and longevity.

Keegan Leslie

Director of Business Development

Keegan worked his way up from a green deckhand to chief officer over the past 10 years, working on yachts ranging from 20 to 65m taking on various roles onboard throughout his career. Keegan has managed refits and onboard operations around the world.

Keegan brings real-world yachting experience to the business operations and software development having operated yachts at various levels in multiple jurisdictions all over the world.

Bhargav Raiyani

Software Developer

A results-driven software developer with a number of years experience in building web applications and managing software projects. Passionate about creating efficient and scalable solutions to complex problems. Committed to staying updated with the latest technologies and industry trends to deliver cutting-edge solutions.

Thrives in collaborative environments, leveraging teamwork and communication to drive project success.

Maxine Robert

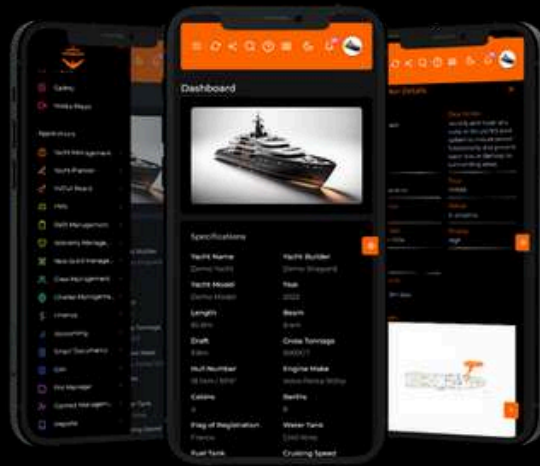

Yacht Account Manager

Maxine has extensive experience working as a Crew Compliance Manager and as a Purser onboard superyachts. In these roles, she managed both administrative and managerial responsibilities, acting as the key liaison between the captain, crew, guests, and shoreside operations.

Her duties included ensuring the efficient handling of the yacht's daily administrative, financial, and logistical operations, while also overseeing crew management and ensuring compliance with maritime regulations.

Our Application

WHAT IS OUR SOLUTION?

Our solution ensures maintenance, inventory, ISM, and daily operations are tailored to your yacht and crew while maintaining compliance.

WHY DO YOU NEED IT?

Our solution streamlines yacht operations, enabling crews to work efficiently and ensuring consistent service for owners and captains.

KEEP YOUR YACHT ORGANIZED & CONNECTED

With our yacht management solution, you can stay focused on projects and tasks; no matter when or where you are.

SEAMLESS MIGRATION

We handle data gathering, digital migration, and software setup, with periodic audits to ensure ongoing efficiency.

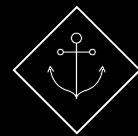

Full Range of Services

We offer a full range of yacht management software services capable of handling the complete spectrum of yacht operations, allowing us to individually tailor the specific support and services needed.

Dedicated Support

From technical management, accounting, insurance, safety management and crew admin, our team has the specific knowledge and experience to deliver the highest dedicated support for you and your fleet.

Peace of Mind

Effective checks and balances, both operationally and financially, give the Owner peace of mind that the yacht and crew is operating safely and efficiently.

Our Modules

Fleet Tracker - Enhances yacht tracking with real-time location, status, and analytics.

Yacht Management - Simplified chat, calendar, and task tracking solutions.

Yacht Planner - Manages yacht snag lists with tracking, prioritization, and resolution.

In/Out Board - Tracks crew and guest movements for security and compliance.

PMS - Streamlines maintenance with efficient scheduling, tracking, & management.

Refit Management - Streamlines yacht refits with planning, budgeting, and progress tracking.

Warranty Management - Manages shipyard warranties with tracking, claims, and compliance oversight.

New Build Management - Oversees new builds with progress tracking, compliance, & reporting.

Crew Management - Simplifies crew scheduling, compliance, payroll, and certification tracking.

Charter Management - Manages contracts, payments, APA, guest lists, and reporting.

Passage Planning - Plans yacht voyages with routes, waypoints, weather, and fuel calculations.

Accounting & Finance - Manages yacht budgets, expenses, invoices, and financial reporting.

Smart Documents - Centralizes documents with digital checklists, templates, & automation.

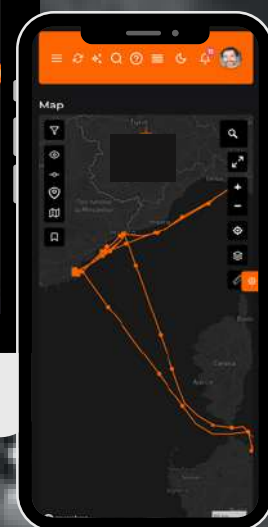

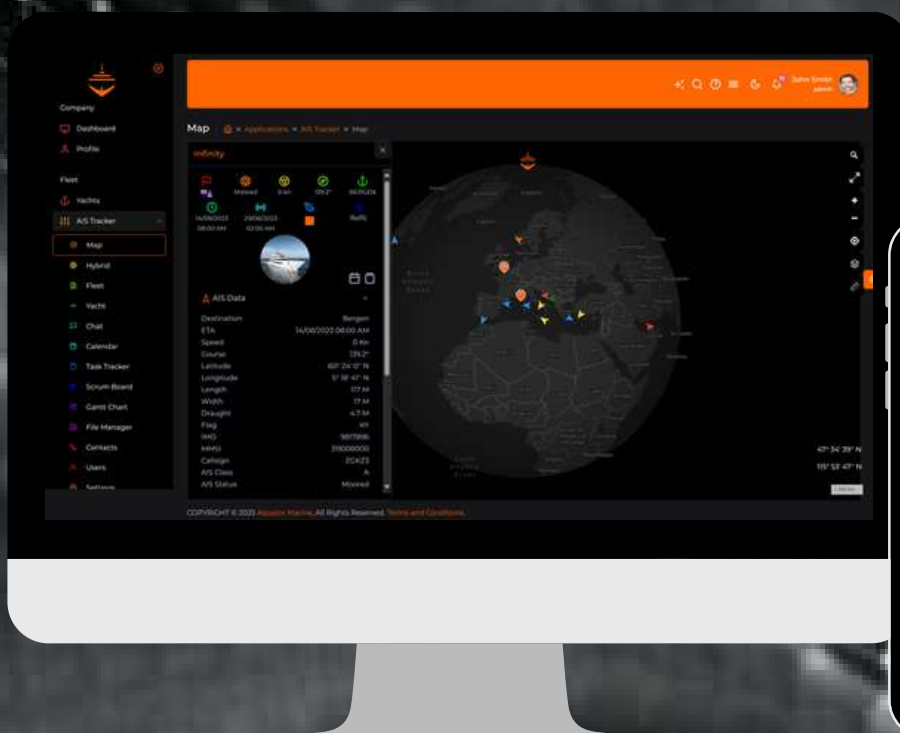

ISM - Manages drills, yacht certifications, and hours of work/rest compliance.

SMS - Digitizes safety management with documents, checklists, & compliance tracking.

Reports - Generates detailed yacht reports for operations, finance, and compliance.

Aquator Marine holds a certificate from Lloyd's Register

Aquator Marine, a software company dedicated to the yachting industry, is pleased to announce that its Planned Maintenance System (PMS) and Hours of Work & Rest has been awarded a Software Conformity Assessment certification from Lloyd's Register (LR).

A Comprehensive and Rigorous Evaluation

The certification was awarded following a detailed and independent Software Conformity Assessment conducted by Lloyd's Register, a global authority in maritime assurance and compliance.

The evaluation process included a thorough audit of Aquator's system architecture, testing procedures, quality assurance framework, and user functionality. Key areas of review included:

- Verification of requirement specifications and software design documentation
- Independent witnessed testing of core functionalities and edge cases
- Assessment of configuration management and system version control
- Evaluation of operational reliability, including update and maintenance protocols

The outcome affirms that Aquator's PMS not only meets but exceeds critical maritime software standards, ensuring its suitability for use aboard vessels and yachts that require reliable, auditable, and class-compliant maintenance procedures.

Key Operational Benefits

The certification was awarded following a detailed and independent Software Conformity Assessment conducted by Lloyd's Register, a global authority in maritime assurance and compliance.

The evaluation process included a thorough audit of Aquator's system architecture, testing procedures, quality assurance framework, and user functionality. Key areas of review included:

- Verification of requirement specifications and software design documentation
- Independent witnessed testing of core functionalities and edge cases
- Assessment of configuration management and system version control
- Evaluation of operational reliability, including update and maintenance protocols

The outcome affirms that Aquator's PMS not only meets but exceeds critical maritime software standards, ensuring its suitability for use aboard vessels and yachts that require reliable, auditable, and class-compliant maintenance procedures.

Modules

Fleet Tracker

- Track fleet movements.
- Monitor zones alerts.
- Centralized yacht data.

Yacht Management

- Manage chat communication.
- Track tasks efficiently.
- Oversee project progress.

Yacht Planner

- Manage snag lists.
- Upload GA plans.
- Oversee project status.

In/Out Board

- Log crew movements.
- Enable QR check-in.
- Ensure security compliance.

PMS

- Schedule maintenance tasks.
- Track inventory usage.
- Ensure preventive upkeep.

Refit Management

- Organize refit projects.
- Use Gantt charts.
- Track work progress.

Warranty Management

- Track claims efficiently.
- Manage ticketing requests.
- Attach warranty documents.

New Build Management

- Oversee yacht construction.
- Assign tasks efficiently.
- Track project progress.

Crew Management

- Manage crew profiles.
- Schedule payroll & leave.
- Track crew compliance.

Charter Management

- Handle contracts efficiently.
- Track payments accurately.
- Generate guest reports.

Passage Planning

- Plan voyage routes.
- Track fuel usage.
- Log passage details.

Accounting

- Manage budget planning.
- Track financial data.
- Oversee purchase logs.

Smart Documents

- Digitize records.
- Enable revision control.
- Automate document templates.

ISM

- Manage safety compliance.
- Track drills regularly.
- Ensure work/rest limits.

Digital SMS

- Digitalize safety processes.
- Manage SMS checklists.
- Track revision updates.

Reports

- Generate system reports.
- Export multiple formats.
- Track compliance data.

Solutions

Integrations

We go beyond just our applications by connecting to the tools you want to use.

Custom Development

Work with us to create your very own bespoke and specific features within our software.

White Label

We offer a fully branded white label experience that complements our applications.

Branded Mobile Apps

We develop your own branded apps in the apple store and Google Play Store.

Data Migration

We migrate any data from third-party software or excel sheets into our solution.

Data Population

To assist with set up and ease-of-use we populate any data in any format into the platform.

Training

Digital, in-person or group training session are offered depending on the need of users.

Account Management

Allow us to take responsibility of the data in the system, ensuring crew use the system appropriately.

Everything You Need For Any Workflow

Easily build your ideal workflow with our modules and features. Boost your team's alignment, efficiency, and productivity by customizing any workflow to fit your needs.

Streamline Your Work for maximum productivity

Centralize all your work, processes, tools, and files into one platform. Connect teams, bridge silos, and maintain one source of truth across your fleet or yacht

Bring stakeholder together to drive impact

Collaborate effectively organization-wide to get a clear picture of all your yacht. Stay in the loop with easy-to-use automations and real-time notifications.

Stay on track to reach your goals faster

Get a high-level overview of your yacht with customizable reports. Make confident decisions and easily scale workflows for your evolving needs.

Integrations

With your integration and API ecosystem you are able to connect to data from any third-party software into our platform, promoting seamless workflows and enhanced productivity.

The screenshot displays the Admin Console interface for Aquaset Marine. On the left is a sidebar menu with categories: Operations (Management, Team, Finance, Accounting, File Manager, Contact Management, Reports, Integrations) and Admin Console (Company Settings, Personal Settings, Users Settings, Invite Users, Customer Support, Knowledge Base, Search, Change Log). The 'Company Settings' section is active, showing sub-menus: General, Notes, Address, Social Links, and Integration. The 'Integration' sub-menu is selected, displaying a grid of 32 integration cards. Each card includes a logo, the service name, and a brief description. The services listed are: Admiralty (Digital Nautical Publication, Electronic Navigational Charts), Asana (Online productivity tool), Bill.com (Expense management solution), Booking Manager (Charter booking system), Box (File sharing tools), Centtrip (Yachting digital card and transaction provider), Chat GPT (AI tool), Czone (Intelligent boat monitoring), Docusign (Electronic signature and document management), Dropbox (Online file and document storage), Expensify (Expense management solution), Furuno (Multiple marine products such as chartplotters), Garmin (Multiple marine products such as chartplotters), Google Suite (Google's variety of solutions), Hubspot (Online CRM platform), Insightly (Customer relationship management tool), Microsoft Suite (Microsoft's variety of solutions), Monzo (Global neobank and financial technology), N26 (Global neobank and financial technology), NauSys (Charter booking system), NMEA (Marine data communication protocol), Oracle (Enterprise resource planning solution), Paypal (Online payment processing), Pipedrive (Sales customer relationship management tool), Polestar (Fleet tracking and SSAS management), Quickbooks (Cloud accounting solution), Raymarine (Multiple marine products such as chartplotters), Revolut (Global neobank and financial technology), Sage (Cloud accounting solution), Salesforce (Online CRM platform), SAP (Enterprise resource planning solution), Simrad (Multiple marine products such as chartplotters), Slack (Messaging platform), Square (Online payment processing), Stripe (Online payment processing), WhatsApp (Messaging platform), Windfinder (Weather Forecasts), Windy (Weather Forecasts), Wise (Forex transfers and digital payments), Xero (Cloud accounting solution), Zapier (Platform to automate workflows), Zendesk (Cloud based customer support), and Zoho (Customer relationship management tool). The top right of the interface shows a user profile for John Smith, Admin, with various utility icons. The footer contains the copyright notice: COPYRIGHT © 2025 Aquaset Marine, All Rights Reserved. Fleet Management

Dashboard

Enhance decision-making with analytics

User-friendly dashboards centralize essential data, empowering yacht managers, captains, and crew with critical insights for smarter decisions and improved performance.

Fleet Management

Streamline and optimize yacht fleet operations

The Fleet Management module enables efficient fleet oversight, providing a complete view of performance, maintenance, and documentation for informed decision-making.

Centralized Fleet Overview

Access a clear snapshot of your fleet's status, location, and key details.

Multi-user Access

Enable seamless collaboration with controlled access for stakeholders like shipyards and management teams.

Fleet Tracker

Chart Your Fleet's Course with Precision

Harness the power of Automatic Identification System (AIS) data for real-time tracking, enhanced maritime safety, and operational productivity.

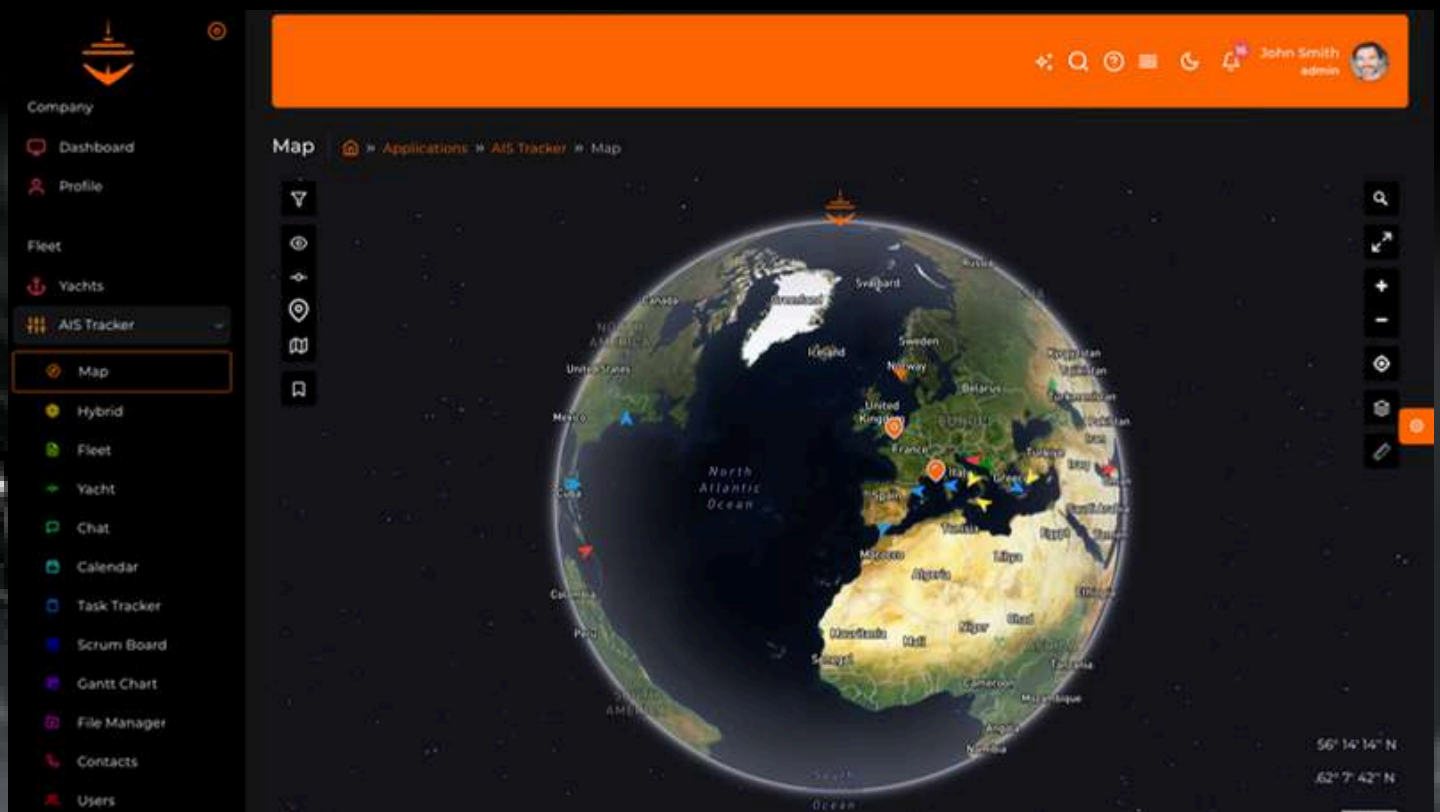

Dashboard

Consolidate all key information and insights into one centralized location.

Map View

Get a global perspective of your fleet's position, showcasing yacht locations worldwide.

Historical

Analyze past routes and behaviors with a detailed map view of yacht tracks.

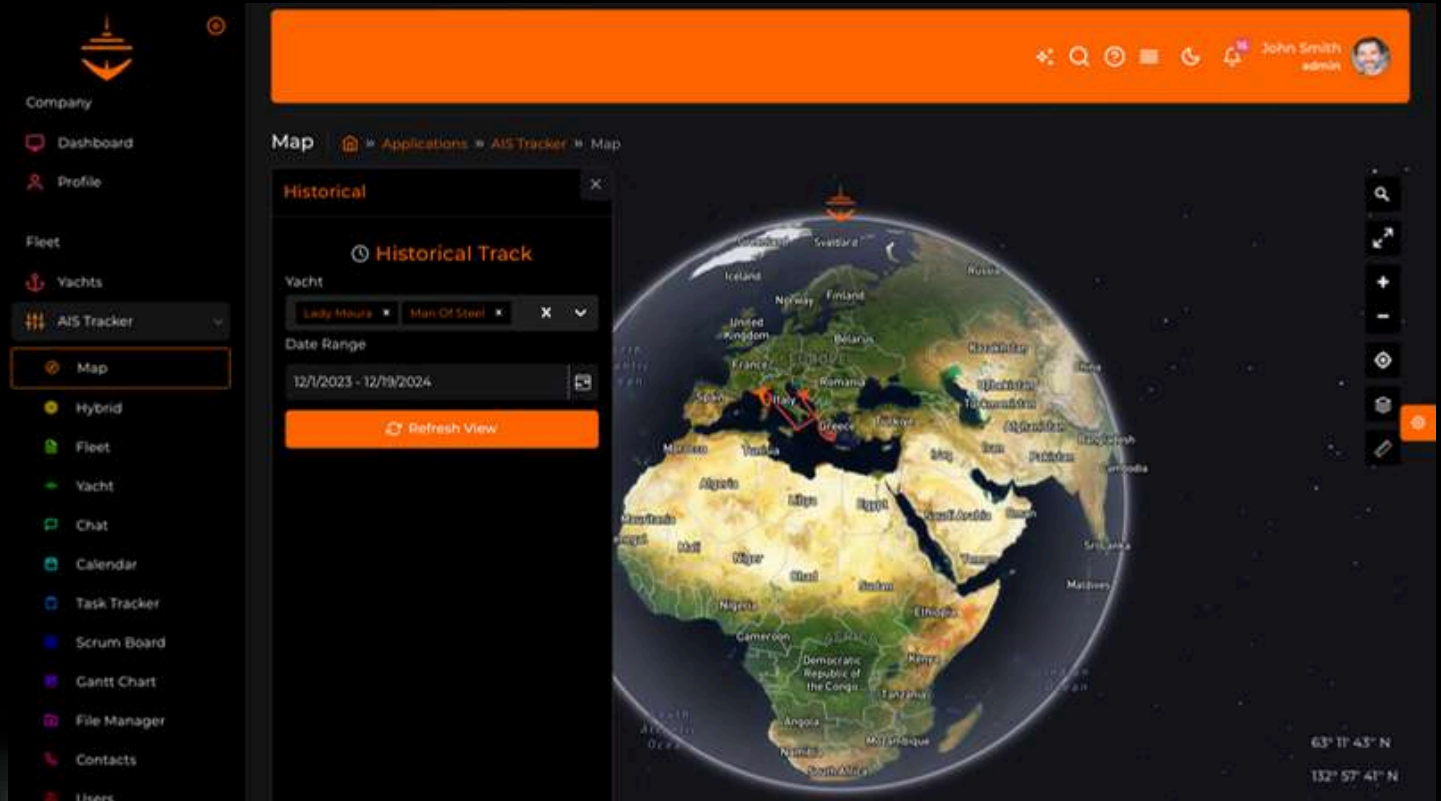

Hybrid View

Combine map and list views for a comprehensive dual perspective of fleet movements.

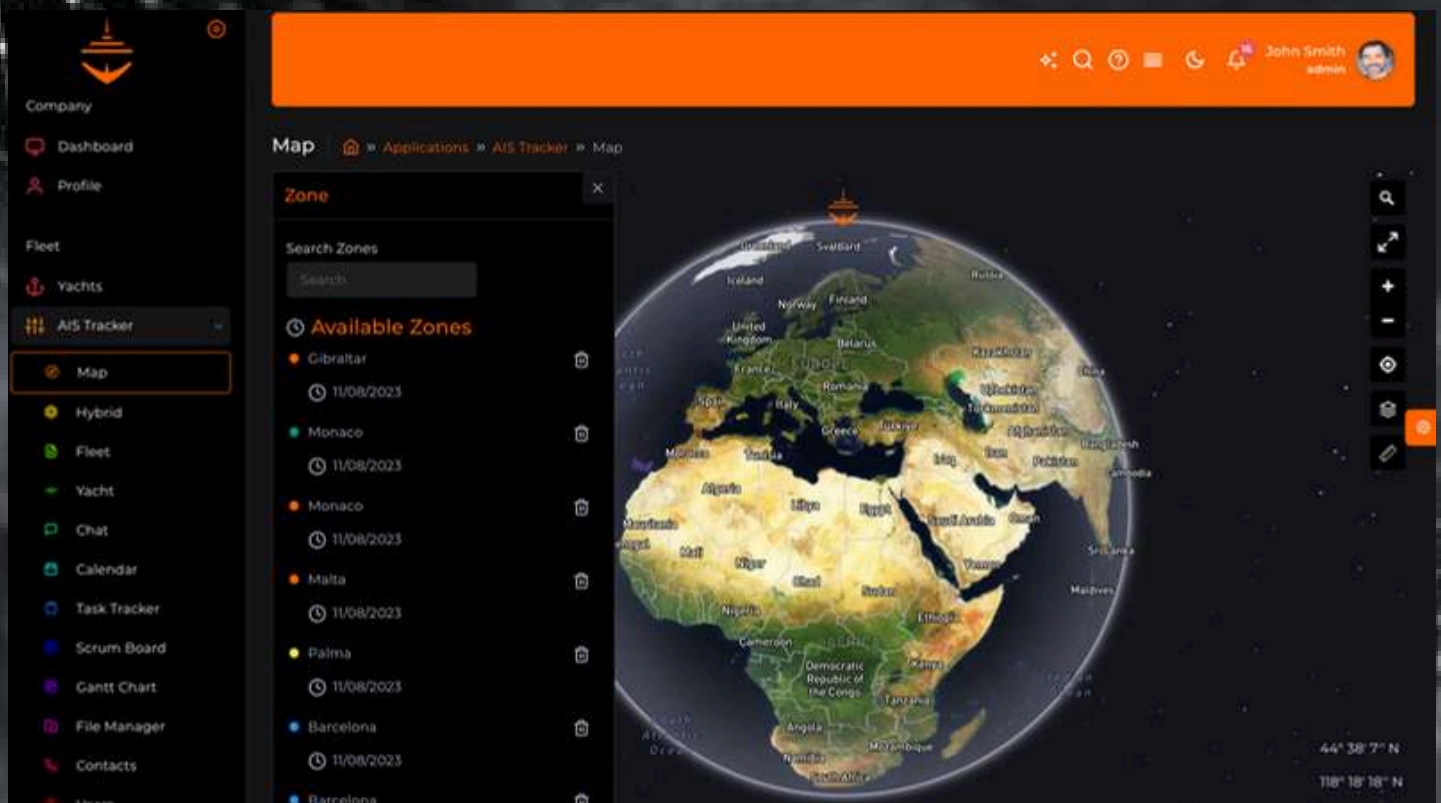

Fleet Tracker

Zoning

Define geographical areas of significance to streamline and focus fleet operations.

Yacht Management

Yacht Management

Prioritize and Centralize Yacht Management Functions

The Yacht Management module simplifies daily yacht operations by providing a centralized platform for communication, scheduling, and task and project management.

The screenshot displays the Yacht Management software interface. On the left is a sidebar with navigation options: Company, Yachts, Yacht, Dashboard, Profile, Gallery, Media Player, Applications (with Yacht Management selected), Chat, and Calendar. The main area is divided into two sections. The top section is the 'Calendar', showing a weekly view for February 2nd to 8th, 2025. It includes event cards for 'Wash... o AquatorCV', 'Weekly ISM Checks', 'Drills', 'Broker Viewing', and 'HOD Meeting'. The bottom section is the 'Chat' interface, featuring a search bar and a list of chat contacts: Pam Compass, Jim Blue, Nate Manager, Matt Richey, Jeff Ocean, Jess Sail, and Jack Fish. Two callout boxes provide details about the Chat and Calendar features.

Chat

Facilitate real-time discussions, updates, and file sharing with an integrated chat system for seamless team communication.

Calendar

Organize and manage events, appointments, and deadlines in a shared calendar to keep everyone informed and on track.

Yacht Management

Task Manager

Create and manage simple to-do lists to help crew members stay organized and focused on essential tasks.

Task Tracker

Utilize a comprehensive task manager to monitor progress, set priorities, and delegate tasks, ensuring smooth project execution.

Planner

The Yacht Planner module allows users to easily upload and work with an unlimited number of yacht plan images.

Gantt Chart

Visualize project timelines and dependencies using Gantt charts, simplifying the scheduling and monitoring of tasks and milestones.

Calendar

Organize and manage events, appointments, and deadlines in a shared calendar to keep everyone informed and on track.

Tickets

Organize and manage tickets, appointments, and deadlines in a shared calendar, ensuring everyone stays informed and on track.

The screenshot displays the Warranty Management application interface. On the left is a sidebar menu with options: Gallery, Media Player, Applications, Yacht Management, Yacht Planner, In/Out Board, PMS, Refit Management, Warranty Management (selected), Tickets, Calendar (selected), Planner, Gantt Chart, Cost Tracking, New Build Management, Crew Management, Charter Management, and Finance. The main area shows a calendar for January 2025. The calendar has a header with 'UTC 16:59:04' and navigation buttons. The calendar grid shows dates from Sunday to Saturday. Events are listed for various dates, including 'Leaking Overboard Valve' (AquatorGV), 'Stabilizer System Malfunction' (AquatorGV), and 'Watermaker Not Producing Fresh Water' (AquatorGV). The events are color-coded: green for 'Leaking Overboard Valve' and red for 'Stabilizer System Malfunction' and 'Watermaker Not Producing Fresh Water'.

Accounting & Finance

\$ Finance

Financial tracking, reporting, and document management for yacht operations

The Finance module is designed to help efficiently manage financial data and documents. With features such as budget reports, category reports and Budget vs actual reporting, the module promotes effective financial monitoring and decision-making for yacht operations.

Budget Report

Review and manage your yacht's budget with detailed reports, enabling better cost control and financial planning.

Category Report

Track the actual spend of your captain and crew, and reconcile your yacht's accounts.

Budget vs Actual

Compare the budget with the actual spend of the yacht and get insights into overspending.

Accounting

Improve financial management of your yacht operations

The Accounting module helps manage yacht finances with features like item categorization, sales tracking, expense management, and customizable settings for strong financial control.

➔ Purchases

Efficiently track expenses, payments, and vendor relationships to better control costs and manage financial obligations.

➔ Income

Manage invoices, revenues, and customer data for insightful financial decisions.

The screenshot shows the Accounting Dashboard with a sidebar menu on the left containing options like Yacht Management, Yacht Planner, In/Out Board, FMS, Raft Management, Warranty Manage..., New Build Manage..., Crew Management, Charter Management..., Finance, Accounting, and Dashboard. The main dashboard area has an orange header and displays financial data for the period VV2025 - 12/31/2025. It includes summary cards for Total Income, Total Expenses, Total Profit, Pending Invoices, and Pending Expenses. Below these are three detailed tables for Petty Cash, Revolut Card, and Wise Card, each showing Starting Balance, Incomes, Expenses, and New Balance.

ISM

Facilitate compliance with international safety management regulations and best practices

The ISM module helps ensure compliance with International Safety Management regulations, offering features like forms, drill matrices, certificate tracking, and work/rest hour management for effective safety and compliance.

Certificates

Track and manage crew and vessel certificates for timely renewals and compliance.

Drill Matrix

Use a drill matrix to manage safety drills and ensure emergency preparedness with built in reports.

Hours of Work & Rest

Manage and monitor crew work/rest hours to ensure safety and industry compliance.

SMS

SMS

Streamline yacht safety management with a digital, compliance-focused solution

The SMS module simplifies and enhances safety management by digitizing essential processes such as incident reporting, risk assessments, checklists, and compliance tracking.

Editor

Easily create digital forms for simplified data collection and record-keeping.

Templates

Manage all documents and forms for an organized, efficient system.

Library

Upload and store PDFs with easy, clutter-free digital access.

Populated

Easily manage and review filled forms for accurate record-keeping

The screenshot displays two overlapping windows from the SMS application. The top window is the 'Editor' interface, used for creating digital forms. It features a dark theme with an orange header bar. A left sidebar contains a 'Basic' section with form elements like Text Field, Text Area, Number, Password, Checkbox, Select Boxes, Select, Radio, and Button. The main workspace shows a form titled 'PTW - 001 Permit To Work' with fields for 'Date / Time', 'Time From', and 'Time To'. The bottom window is the 'Submit Form' interface, also in dark theme. It contains a 'Pre Departure' form with fields for 'Full Name', 'Rank', 'Signature', 'Date / Time', 'Location', 'Master Signature', 'ETA', and 'Number of Crew'. Each signature field has a 'Sign above' instruction. The bottom status bar shows navigation links, user information ('Account A, AquatorCV'), and a timestamp ('03/06/2024 05:49 PM').

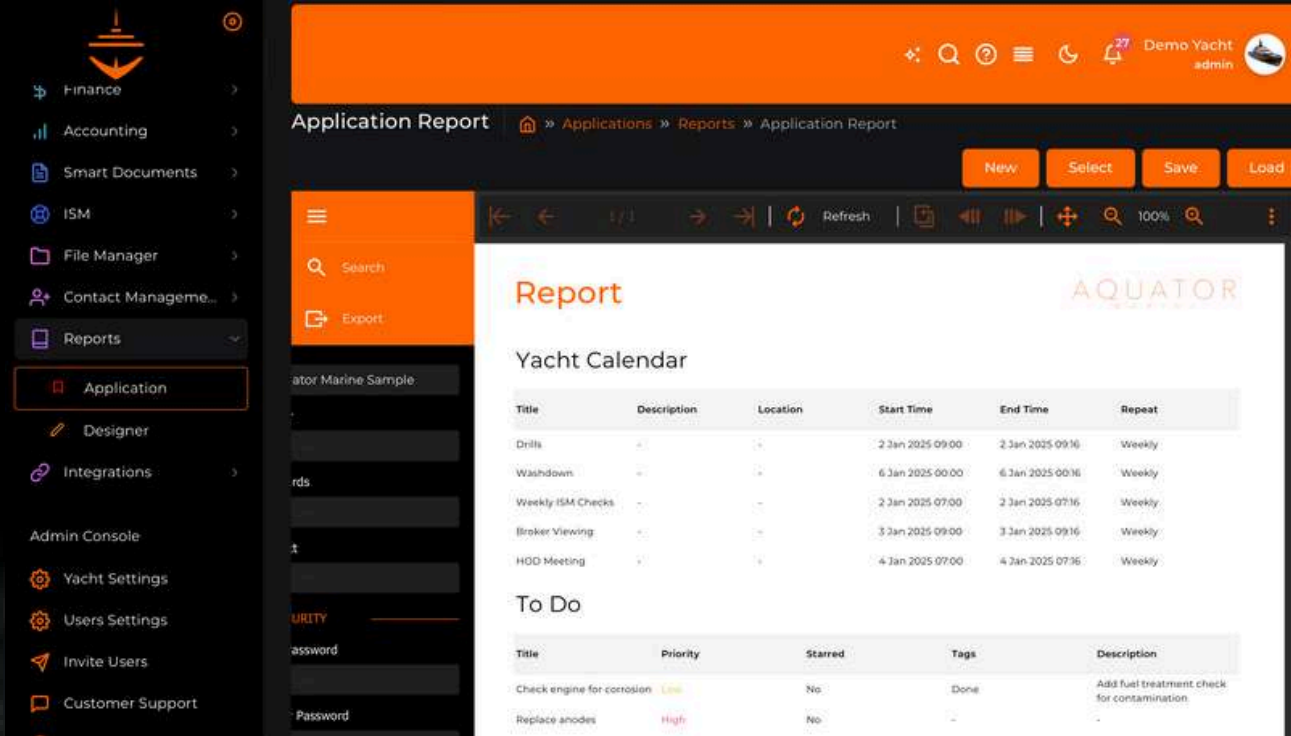

Reporting

Reports

Provide comprehensive reporting for informed decision-making in yacht management

The Reports module consolidates data into customizable reports, providing yacht managers with essential insights for informed decision-making and improved operations.

Customer Support

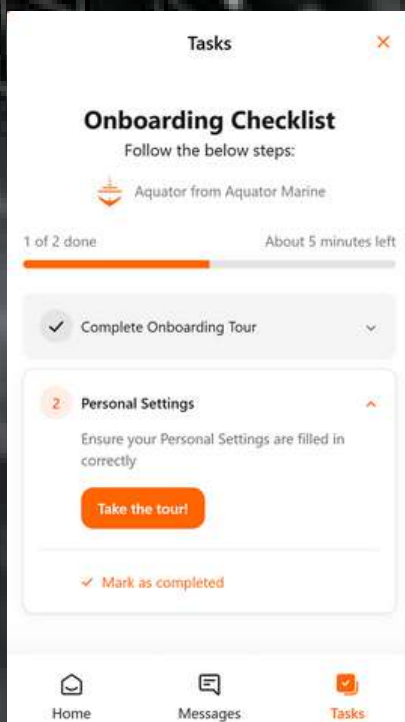

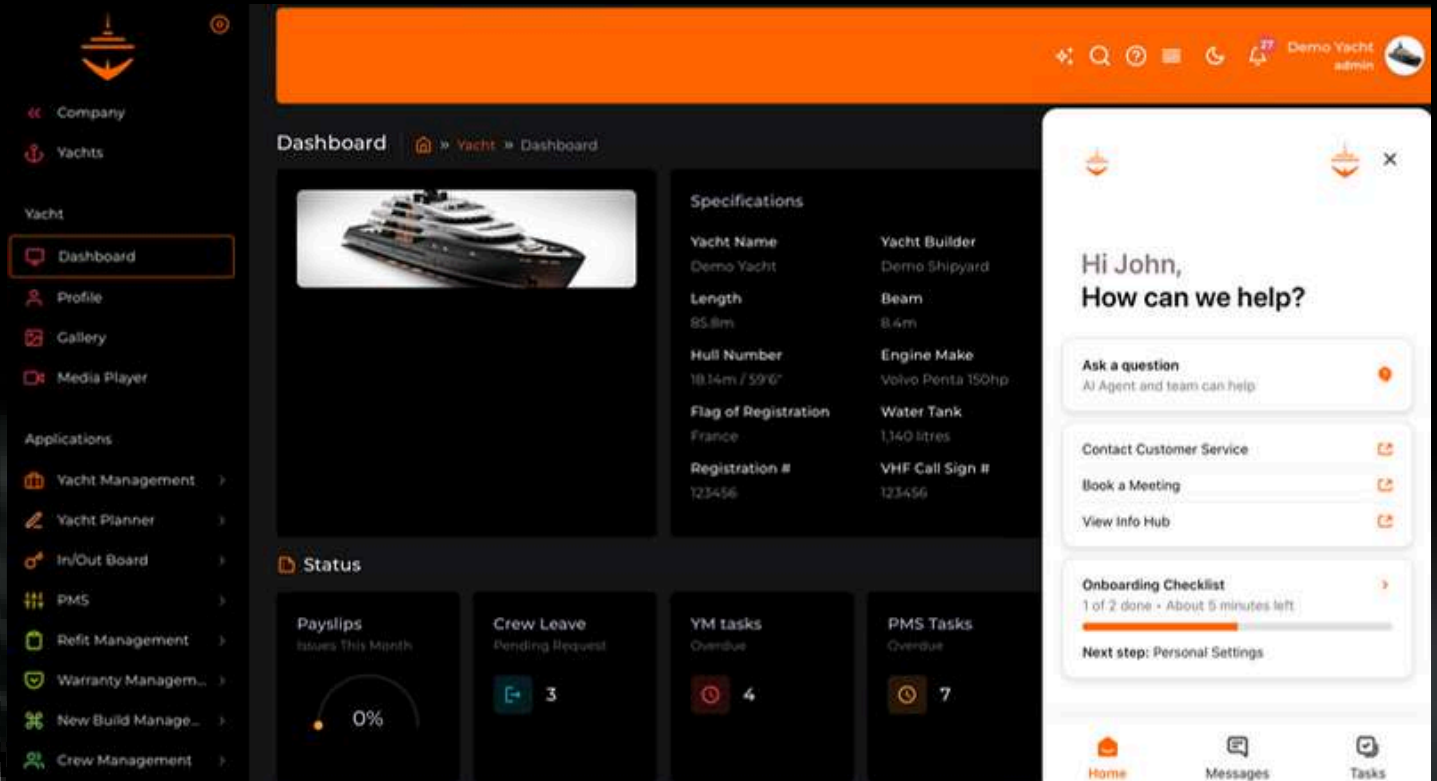

Customer Support

Get instant answers and assistance with our AI-powered Customer Support Agent

Our AI Customer Support Agent provides real-time assistance, answering queries, troubleshooting issues, and guiding users through the platform.

Designed to enhance efficiency, it ensures seamless support, helping crew and yacht managers navigate features, resolve problems, and maximize platform utilization effortlessly.

FAQs

Our AI-powered FAQ system provides instant answers to common queries, helping users navigate the platform efficiently.

Onboarding Checklists

Our AI-powered onboarding checklists streamline the setup process by guiding users through essential steps tailored to their roles.

Settings

Yacht Settings

Centralize crucial yacht information and specifications for easy access and management

The Yacht Settings module centralizes yacht information, specifications, insurance details, addresses, and integrations for efficient access and management.

The screenshot displays the 'Yacht Settings' interface. On the left is a sidebar with navigation links: Warranty Management, New Build Management, Crew Management, Charter Management, Finance, Accounting, Smart Documents, iSM, File Manager, Contact Management, Reports, Integrations, Admin Console, Yacht Settings (highlighted), Users Settings, Invite Users, and Customer Support. The main content area is titled 'Yacht Settings' and shows the 'General' tab. It features a ship image with 'Cover' and 'Remove' buttons, a note 'Allowed JPG, GIF or PNG max 2MB', a circular profile picture with 'Login' and 'Remove' buttons, and another note 'Allowed JPG, GIF or PNG max 2MB'. Below these are input fields for 'Yacht Name' (containing 'Demo Yacht'), 'Date Format (07 Feb 2025)' (set to 'DD MMM yyyy'), 'Account Name' (containing 'AqualonTV'), 'Employer Details', 'Employer Name', and 'Employer Address'.

Safe Manning

Replicate your minimum safe manning document in the platform to monitor crew certifications with ease.

The screenshot shows the 'Role Certificate Settings' modal. It contains a table with three columns: 'Role', 'Required Certificates', and 'Optional Certificates'. The roles listed are Captain, Chief Engineer, and Fleet Captain. For each role, there are lists of required and optional certificates. For example, the Captain role requires STCW 95 (STCW 2010), ENG 1 (Medical Certificat...), Drivers License, and MCA CoC Master <3000g...; the Chief Engineer role requires STCW 95 (STCW 2010), ENG 1 (Medical Certificat...), Drivers License, and RII/3 Y4 Chief Engineer (...); and the Fleet Captain role requires STCW 95 (STCW 2010) and ENG 1 (Medical Certificat...). There are 'Add Role', 'Cancel', and 'Save' buttons at the bottom.

The User Settings module centralizes account, permission, and personal information management, enabling admins to control access and users to update their details.

 **Access & Permissions**

Give users different access and permissions based on their roles and responsibilities onboard the yacht or within the company.

Knowledge Base

Provide easy access to frequently asked questions and support resources for users

The Knowledge Base module is designed to offer comprehensive assistance and support to users through a centralized platform. With an extensive collection of frequently asked questions (FAQs), the Knowledge Base ensures that users can find answers to their questions and resolve issues efficiently.

Reference documentation for the yacht software platform, its purpose, and the value it provides.

Welcome to AquatorMarine, a yacht software platform designed to enhance efficiency, safety, and enjoyment in the yachting industry. Our comprehensive platform integrates advanced tools for navigation, fleet management, crew coordination, and maintenance scheduling

Purpose of AquatorMarine:

AquatorMarine simplifies yacht management by leveraging technology to streamline operations for yacht owners, captains, and crew. Our platform provides essential tools to manage vessels efficiently, transforming the maritime experience.

Value Proposition of Aquator Marine: Aquator Marine delivers unparalleled value to its users through several key offerings:

- **Comprehensive Tool Integration:** From navigation systems and weather forecasting to regulatory compliance and crew management, Aquator Marine consolidates all necessary tools into a unified platform.
- **Customizable User Experience:** Users can tailor the platform to meet their specific operational needs, choosing features and setups that best suit their fleet and management style.
- **Real-Time Data Access:** The platform provides real-time data from a variety of sources, ensuring that users have up-to-date information at their fingertips, crucial for making timely decisions.
- **Scalability and Flexibility:** Aquator Marine is built to accommodate a range of vessel sizes and types, from small private yachts to large commercial fleets, making it a versatile choice for different users.
- **Community and Support:** Users gain access to a community of maritime professionals and enthusiasts, along with a dedicated support team ready to assist with any queries or issues.

Conclusion: AquatorMarine leads the way in maritime digital solutions, offering the tools, data, and connectivity needed for efficient yacht management. Whether managing a single yacht or an entire fleet, our platform ensures confident and seamless operations. Experience the future of yacht management with AquatorMarine, where technology and the sea converge

- **PMS | Attach File to Complete Status:** Introduced functionality to attach files when marking tasks as complete.
- **PMS | Task History:** Launched a detailed task history feature to track changes and updates.
- **PMS Equipment | Add Owners Critical + Filter:** Added a critical flag for owners and filtering capabilities to enhance equipment tracking.
- **Crew Management | Add Certification Tracking:** Introduced certification tracking for crew members, ensuring better compliance management.
- **PMS | Task Log Reading:** Improved functionality to record and display task logs.
- **Safe Manning:** Added dropdown standards and qualification matrix for easier configuration of safe manning requirements.
- **Dashboard | Fleet Stats:** Improved fleet dashboard mobile responsiveness, offering a seamless experience across devices.
- **PMS | Save Filters:** Introduced a feature to save filters for personalized user workflows.
- **PMS | Usage-Based Tasks:** Enhanced tasks to include other readings for better tracking of equipment usage.
- **PMS | New Line for Task Frequency:** Improved task frequency layout for better readability and usability.

Improvements:

- **Intercom | AI Customer Support Integration:** Improved AI customer support integration for better issue tracking and resolution.
- **Accounting | Refit: Sync Button:** Added a sync button for refit accounting, improving data consistency across modules.

Bug Fixes:

- **Bug | Search in Inventory:** Resolved an issue where inventory search functionality would reset and not work as expected.
- **PMS | Task Complete Status - Auto Calculate:** Fixed an issue with automatic calculations for task completion status.

Custom Software Development

Custom Software Development

At Aquator Marine, we offer custom software development services tailored to the yachting industry, including design, development, migration, updates, and ongoing maintenance.

Leveraging our marine sector expertise, we create reliable, scalable solutions to meet your needs.

Our 360-degree tech solutions connect web apps to users for growth, with a stepwise approach that aligns with your business requirements.

INDUSTRY SPECIFIC EXPERTISE

We understand the yachting landscape, allowing us to create solutions that truly resonate.

EXTENSIVE TECH TEAM

Our skilled developers bring your ideas to life, crafting software tailored to your requirements.

END-TO-END PARTNERSHIP

From ideation to deployment, we work closely with you, ensuring a seamless integration with your existing systems.

BESPOKE SOLUTIONS

Custom software that elevates guest experiences and streamlines operations.

Custom Software Development

Consultation and Strategy Development

Analyzing needs, creating a roadmap, defining requirements, setting milestones, and envisioning the final product.

Custom Application Development

Expert developers creating tailored software for web, mobile, and yacht management needs.

System Integration

Seamless integration with existing systems for smooth data sharing and communication.

User Experience (UX) and User Interface (UI) Design

Designing user-friendly, visually appealing interfaces for intuitive experiences.

Multilingual Support

Our custom software supports multiple languages for seamless communication and accessibility.

Continued Development

Aquator Marine specializes in completing existing software projects, ensuring smooth transitions and timely delivery.

Cloud and Database Solutions

We offer secure, scalable cloud solutions for seamless data management and access anywhere.

Software Architecture Advisory

Advising on custom software architecture for robust, scalable, and maintainable solutions.

Project-Based Approach

Project-based delivery of custom software, on time, within budget, and goal-focused.

Quality Assurance and Testing

Rigorous testing and quality assurance to deliver reliable, secure, and bug-free software.

Deployment and Support

Ensuring smooth deployment, minimal disruptions, and ongoing support for peak performance.

Continuous Improvement and Updates

Committed to continuous updates, keeping software relevant and delivering value in the evolving yachting industry.
