

Professional reverse osmosis

Zero Professional
Dechlorination and drinking water clarification.

Easy:slim
The most compact and complete.

Osmo:maxi
It never stops.

Osmo:maxi XL
High performance in just 10 cm more.

Easy:fast
The ideal partner in close cycles.

Easy:blue
Flow rate champion.

Easy:wash
Professional washing artist

Hydro:box
It has no rivals.

TVB
What industry let's talk?

All our products are made in Italy

Household filtration & reverse osmosis

Red
Filter for water treatment.

Blue
Dechlorination and drinking water clarification.

Blue Sky
Domestic microfiltration.

Silver
Domestic microfiltration kit with bacteriostatic action.

Gold
Domestic ultrafiltration kit with bacteriostatic action.

Rock
Remineralization for drinking water.

Ice
Always brilliant ice.

Uno
Natural water from your tap

Perfetto
Protects against limescale coffee machines

Zero
Home osmosis without electricity

Salt:detector
All about your softener, all from your smartphone!

Technical filters

Yellow
Total water demineralization.

Selective filters

Nitrates
Filter for the removal of nitrates.

Pfas
Domestic filtration kit that removes pfas.

Arsenic
Filter for the removal of arsenic.

Hardness remove

Odra
Total hardness reduction and microfiltration.

Lilac
Temporary hardness reduction and microfiltration.

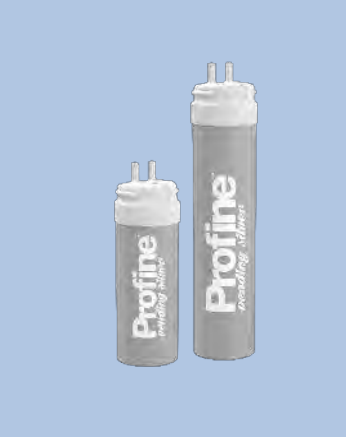

Violet
Hardness reduction with pH control and microfiltration.

Vending filters

Blue Vending
Dechlorination and water clarification.

Silver Vending
Microfiltration with bacteriostatic action.

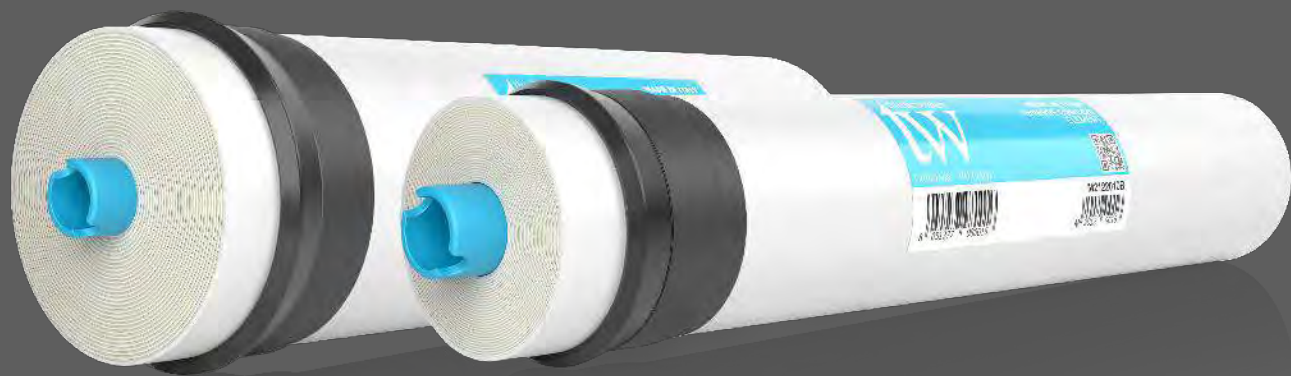

Cream
Hardness reduction with pH control and microfiltration.

Brown
Reduction of carbonates and microfiltration.

TW: RO MEMBRANES

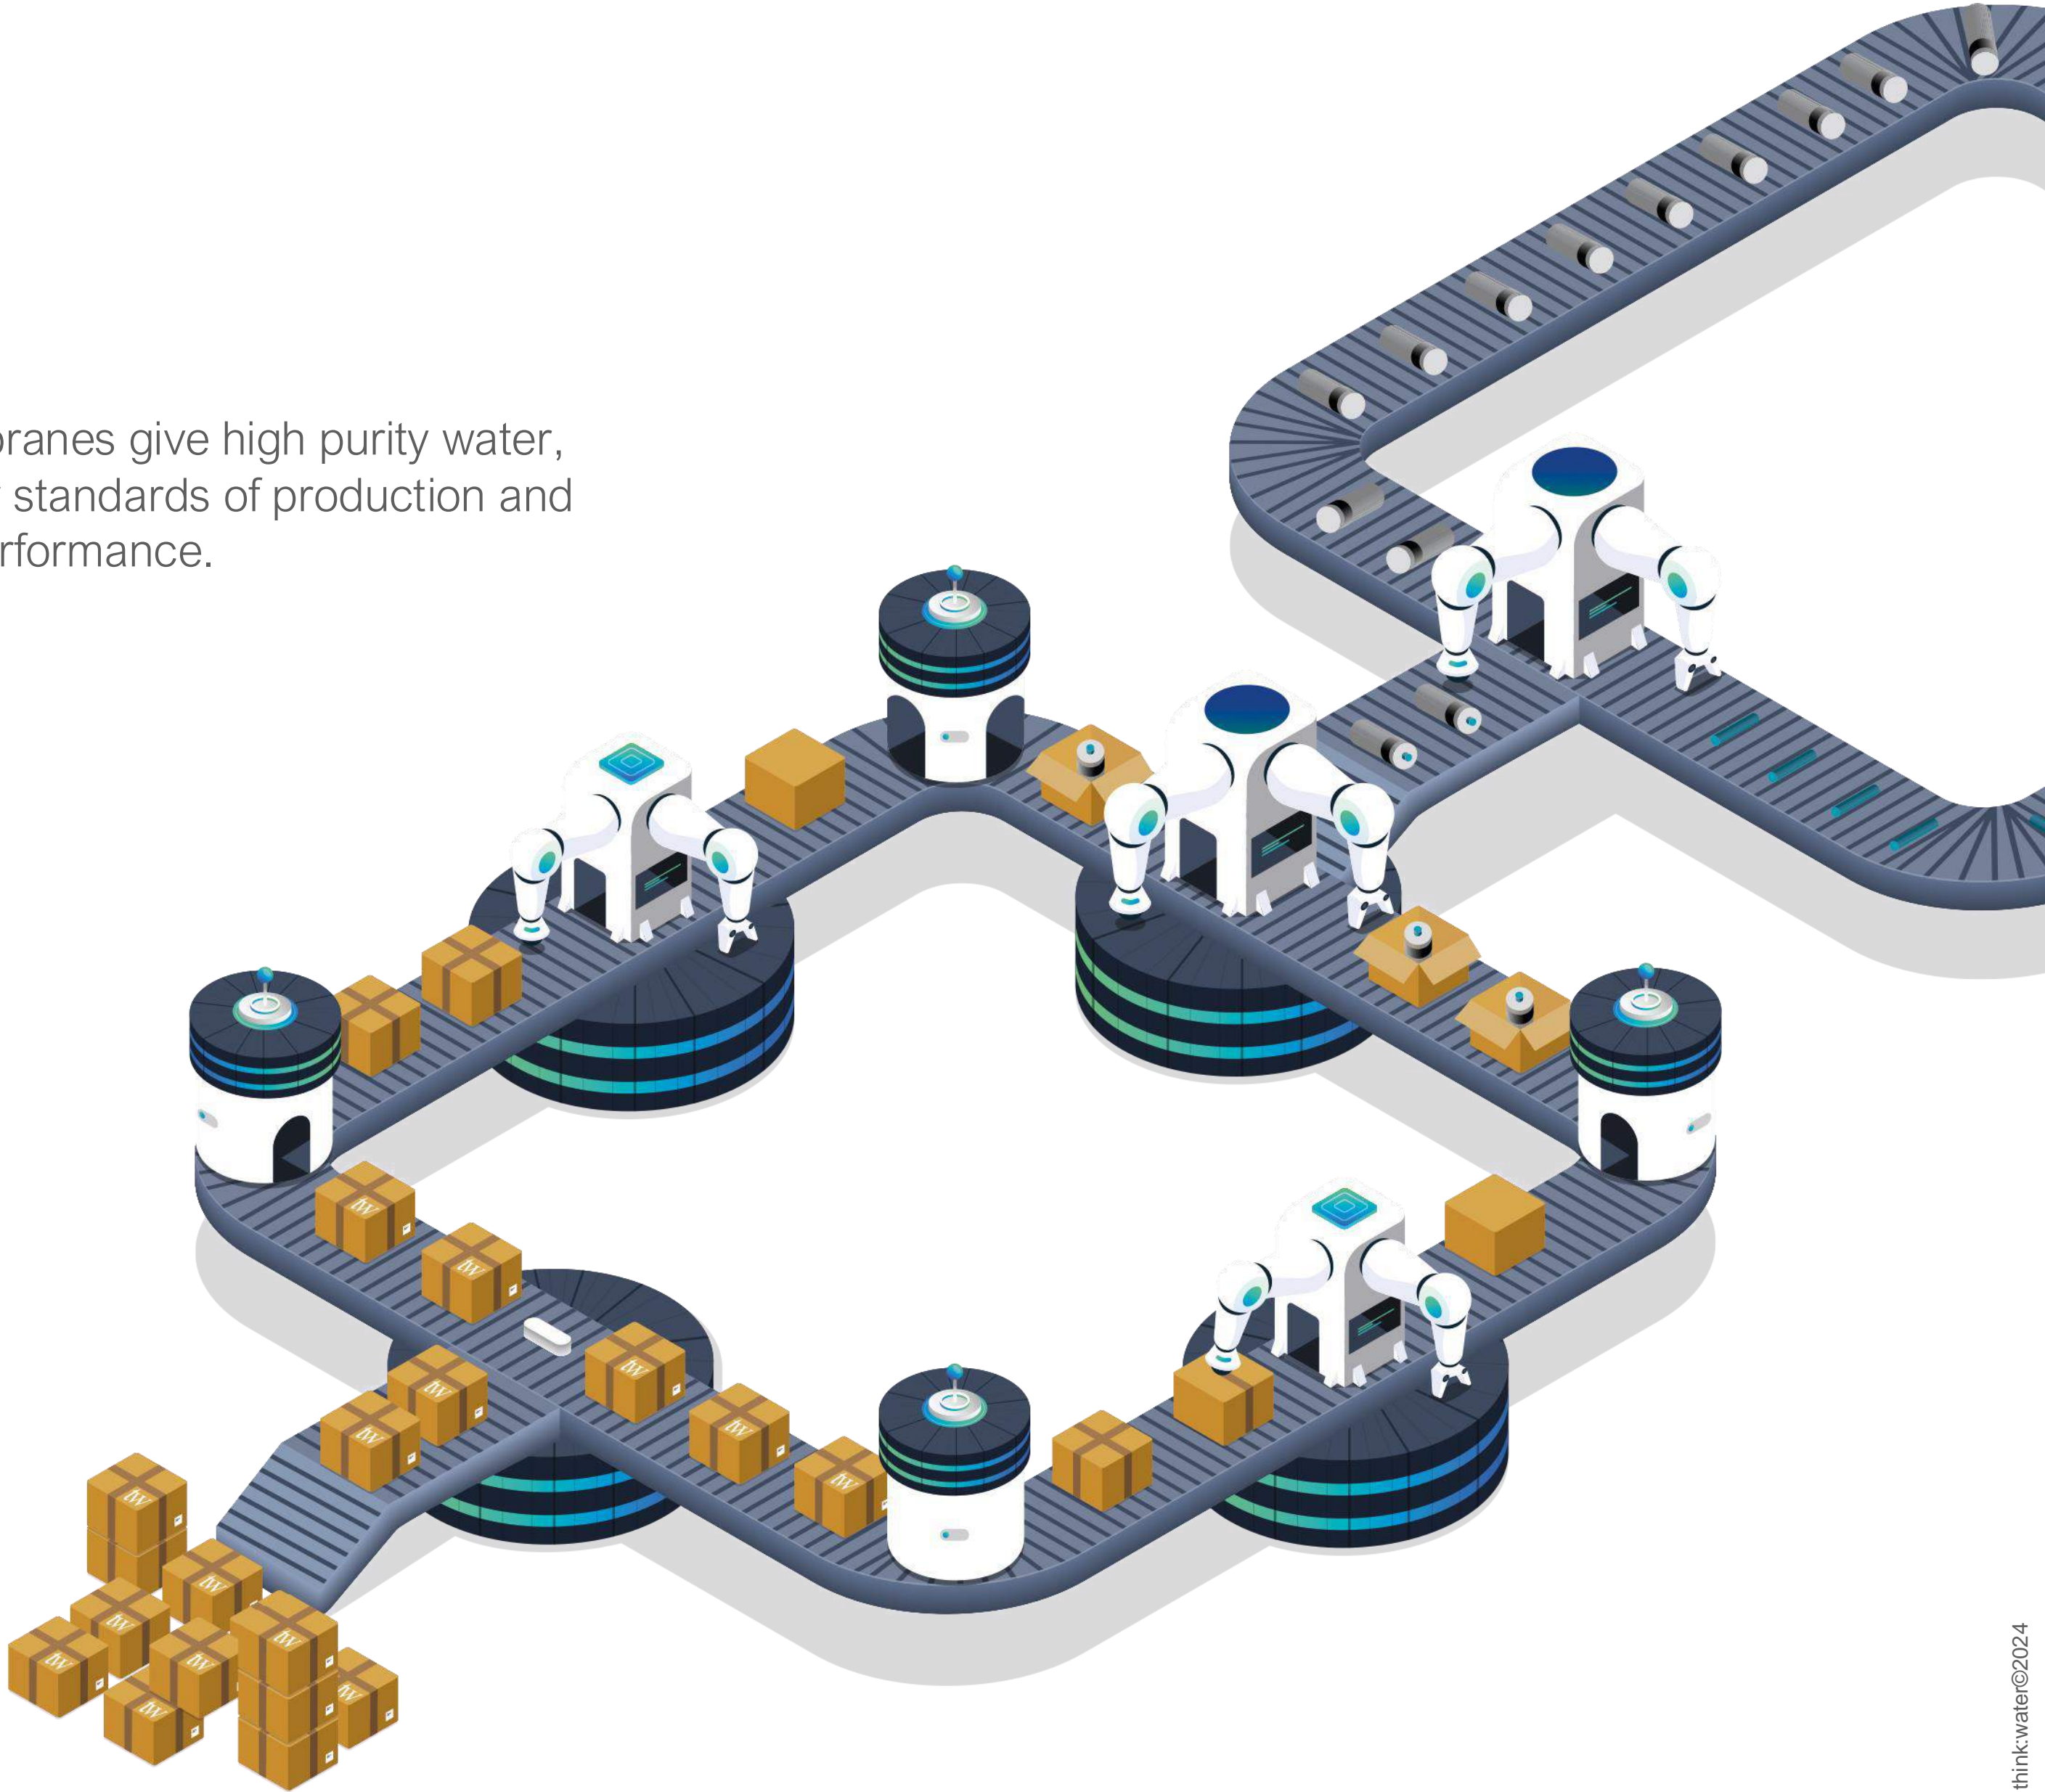

A complete range of **tw:** RO membranes entirely produced in Italy and ready to meet the different needs of customers in the domestic and professional sector.
tw: RO membranes are constructed with high quality biomimicry technology, furthermore the whole production process follows the high standards of industry 4.0.

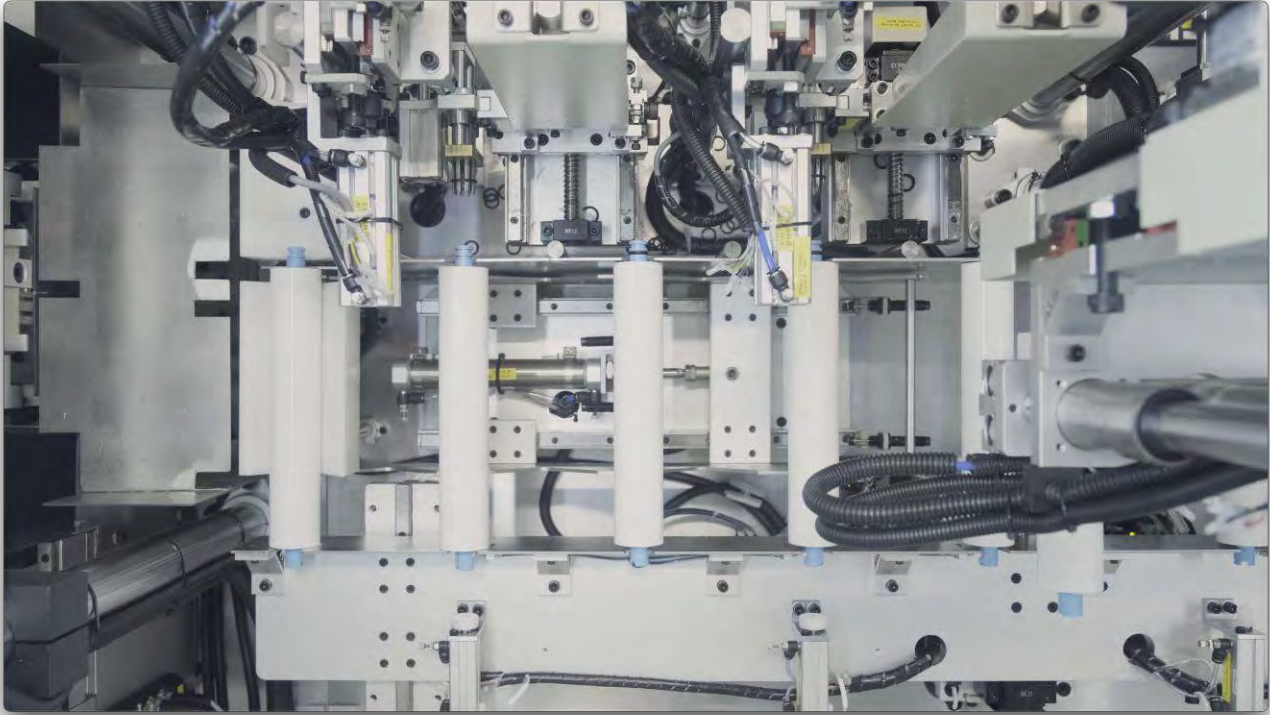

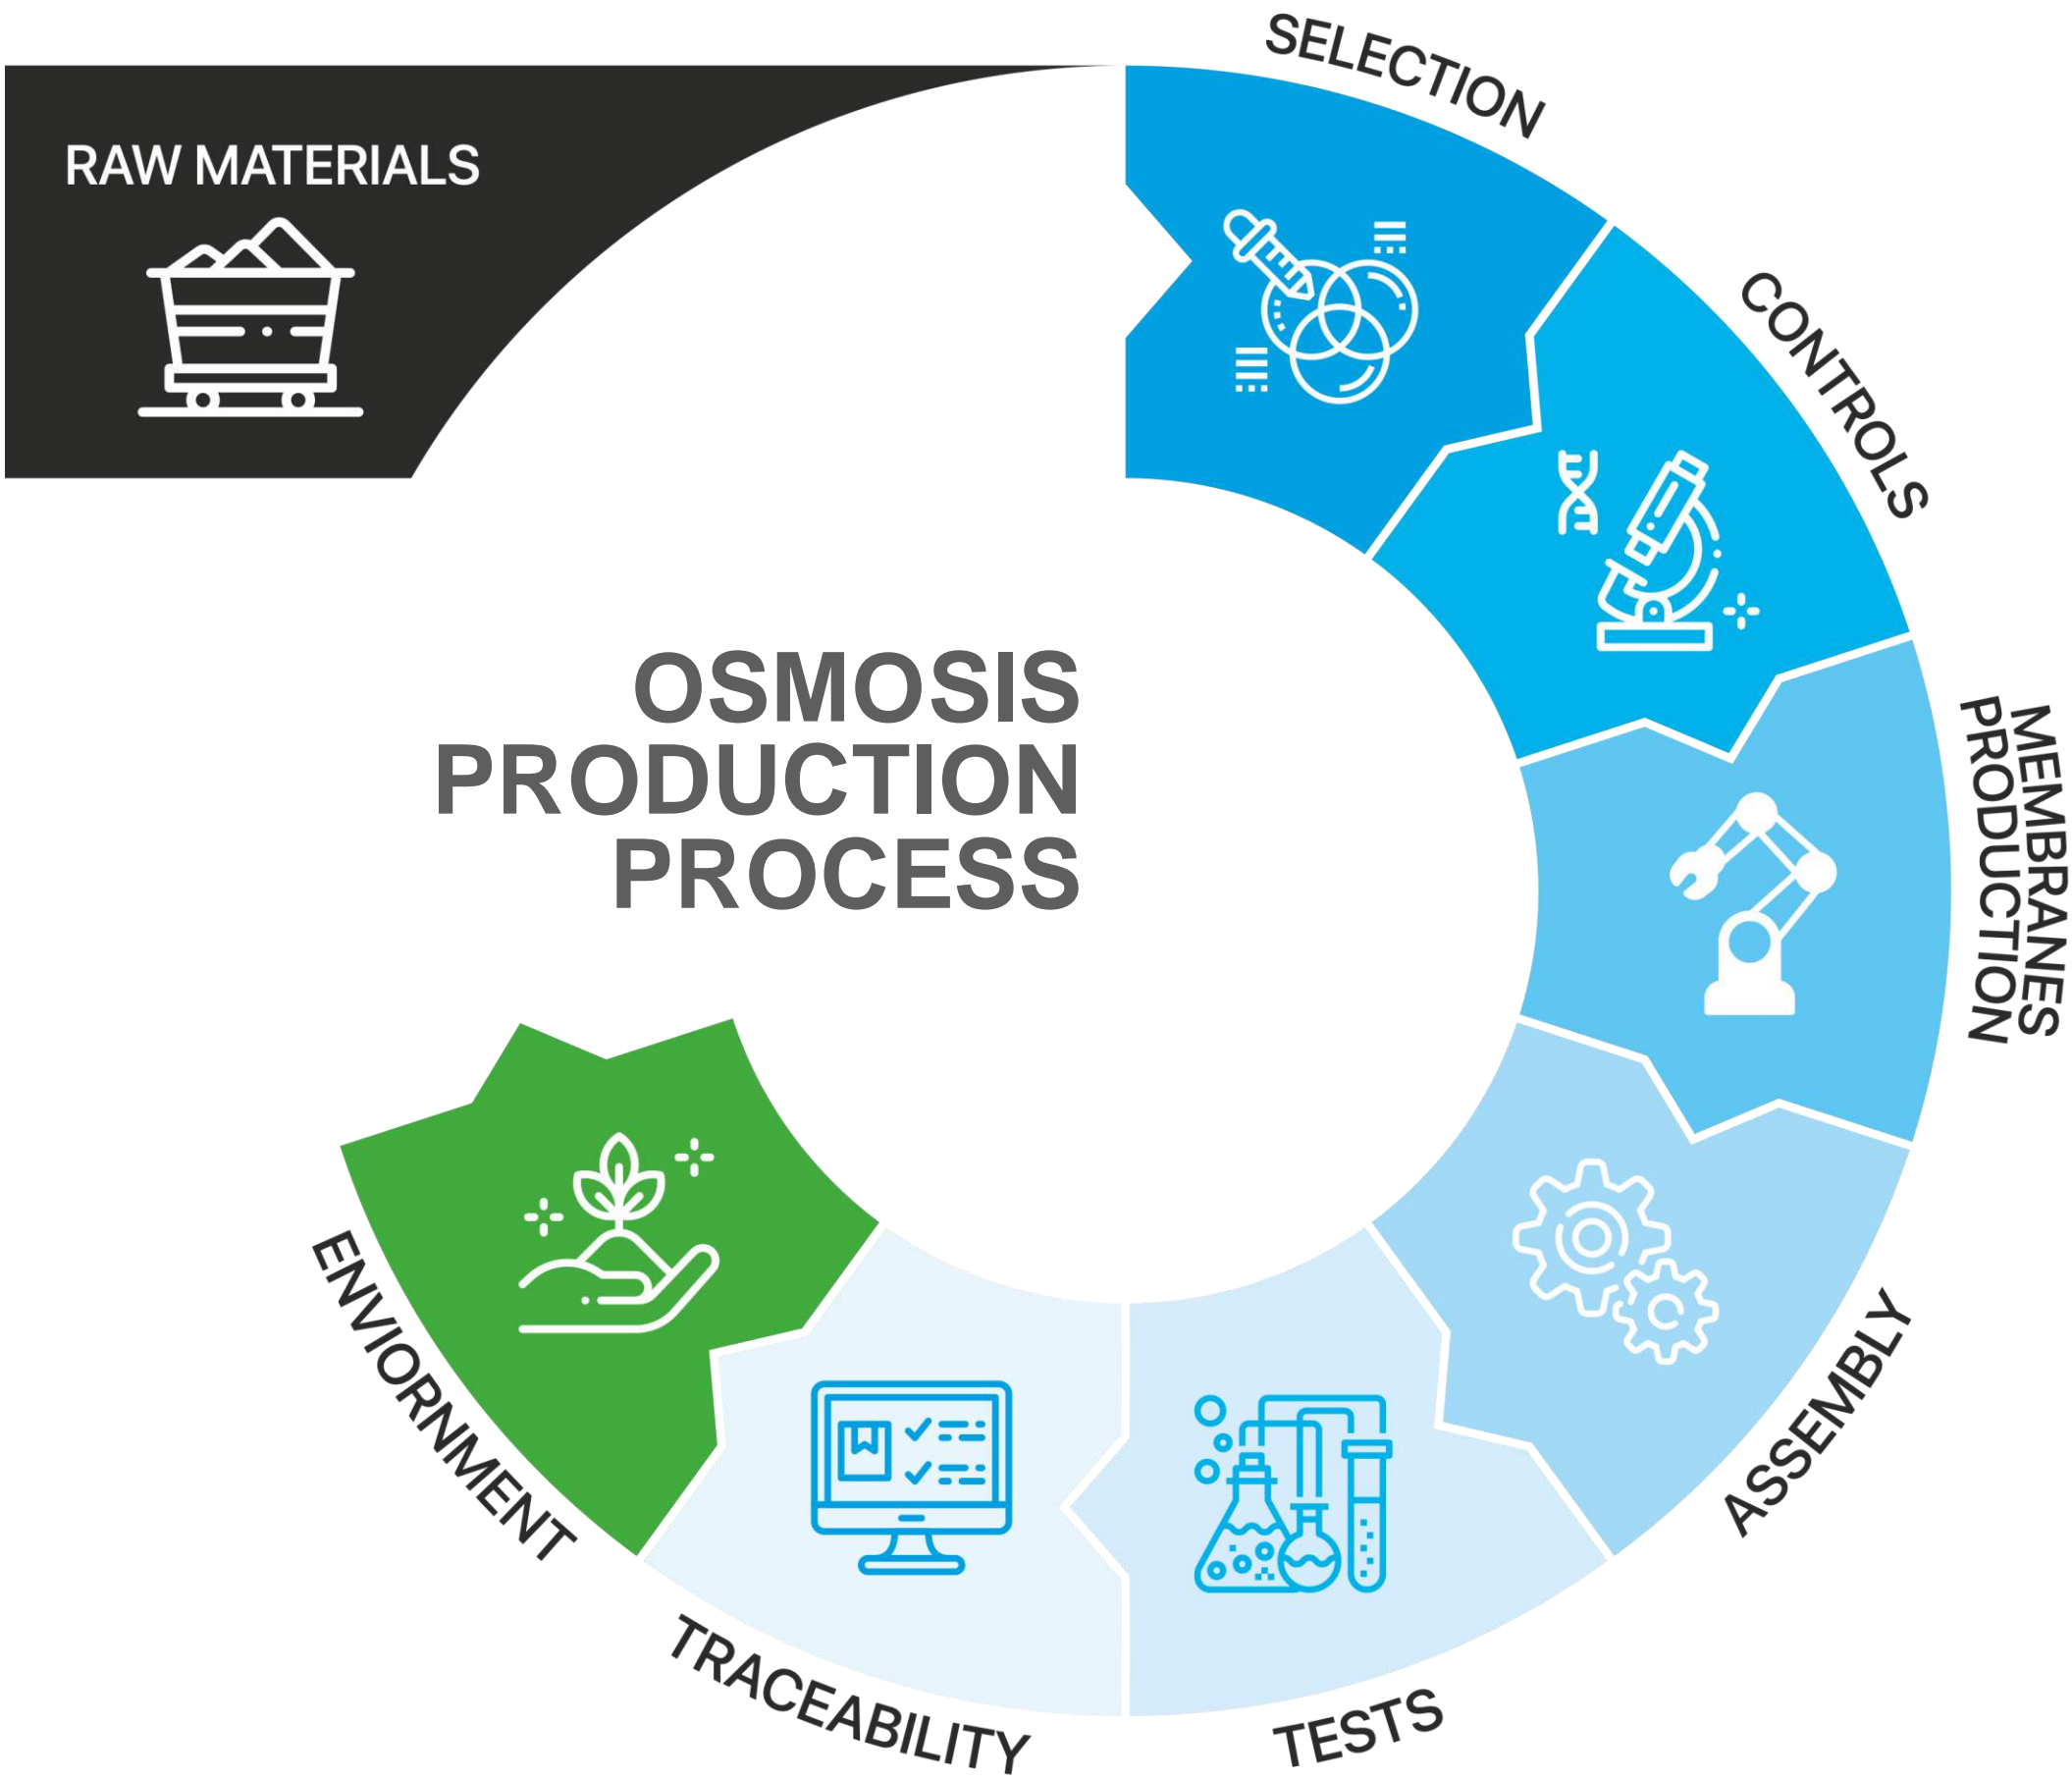

The **tw:** RO membranes give high purity water, follow strict quality standards of production and guarantee high performance.

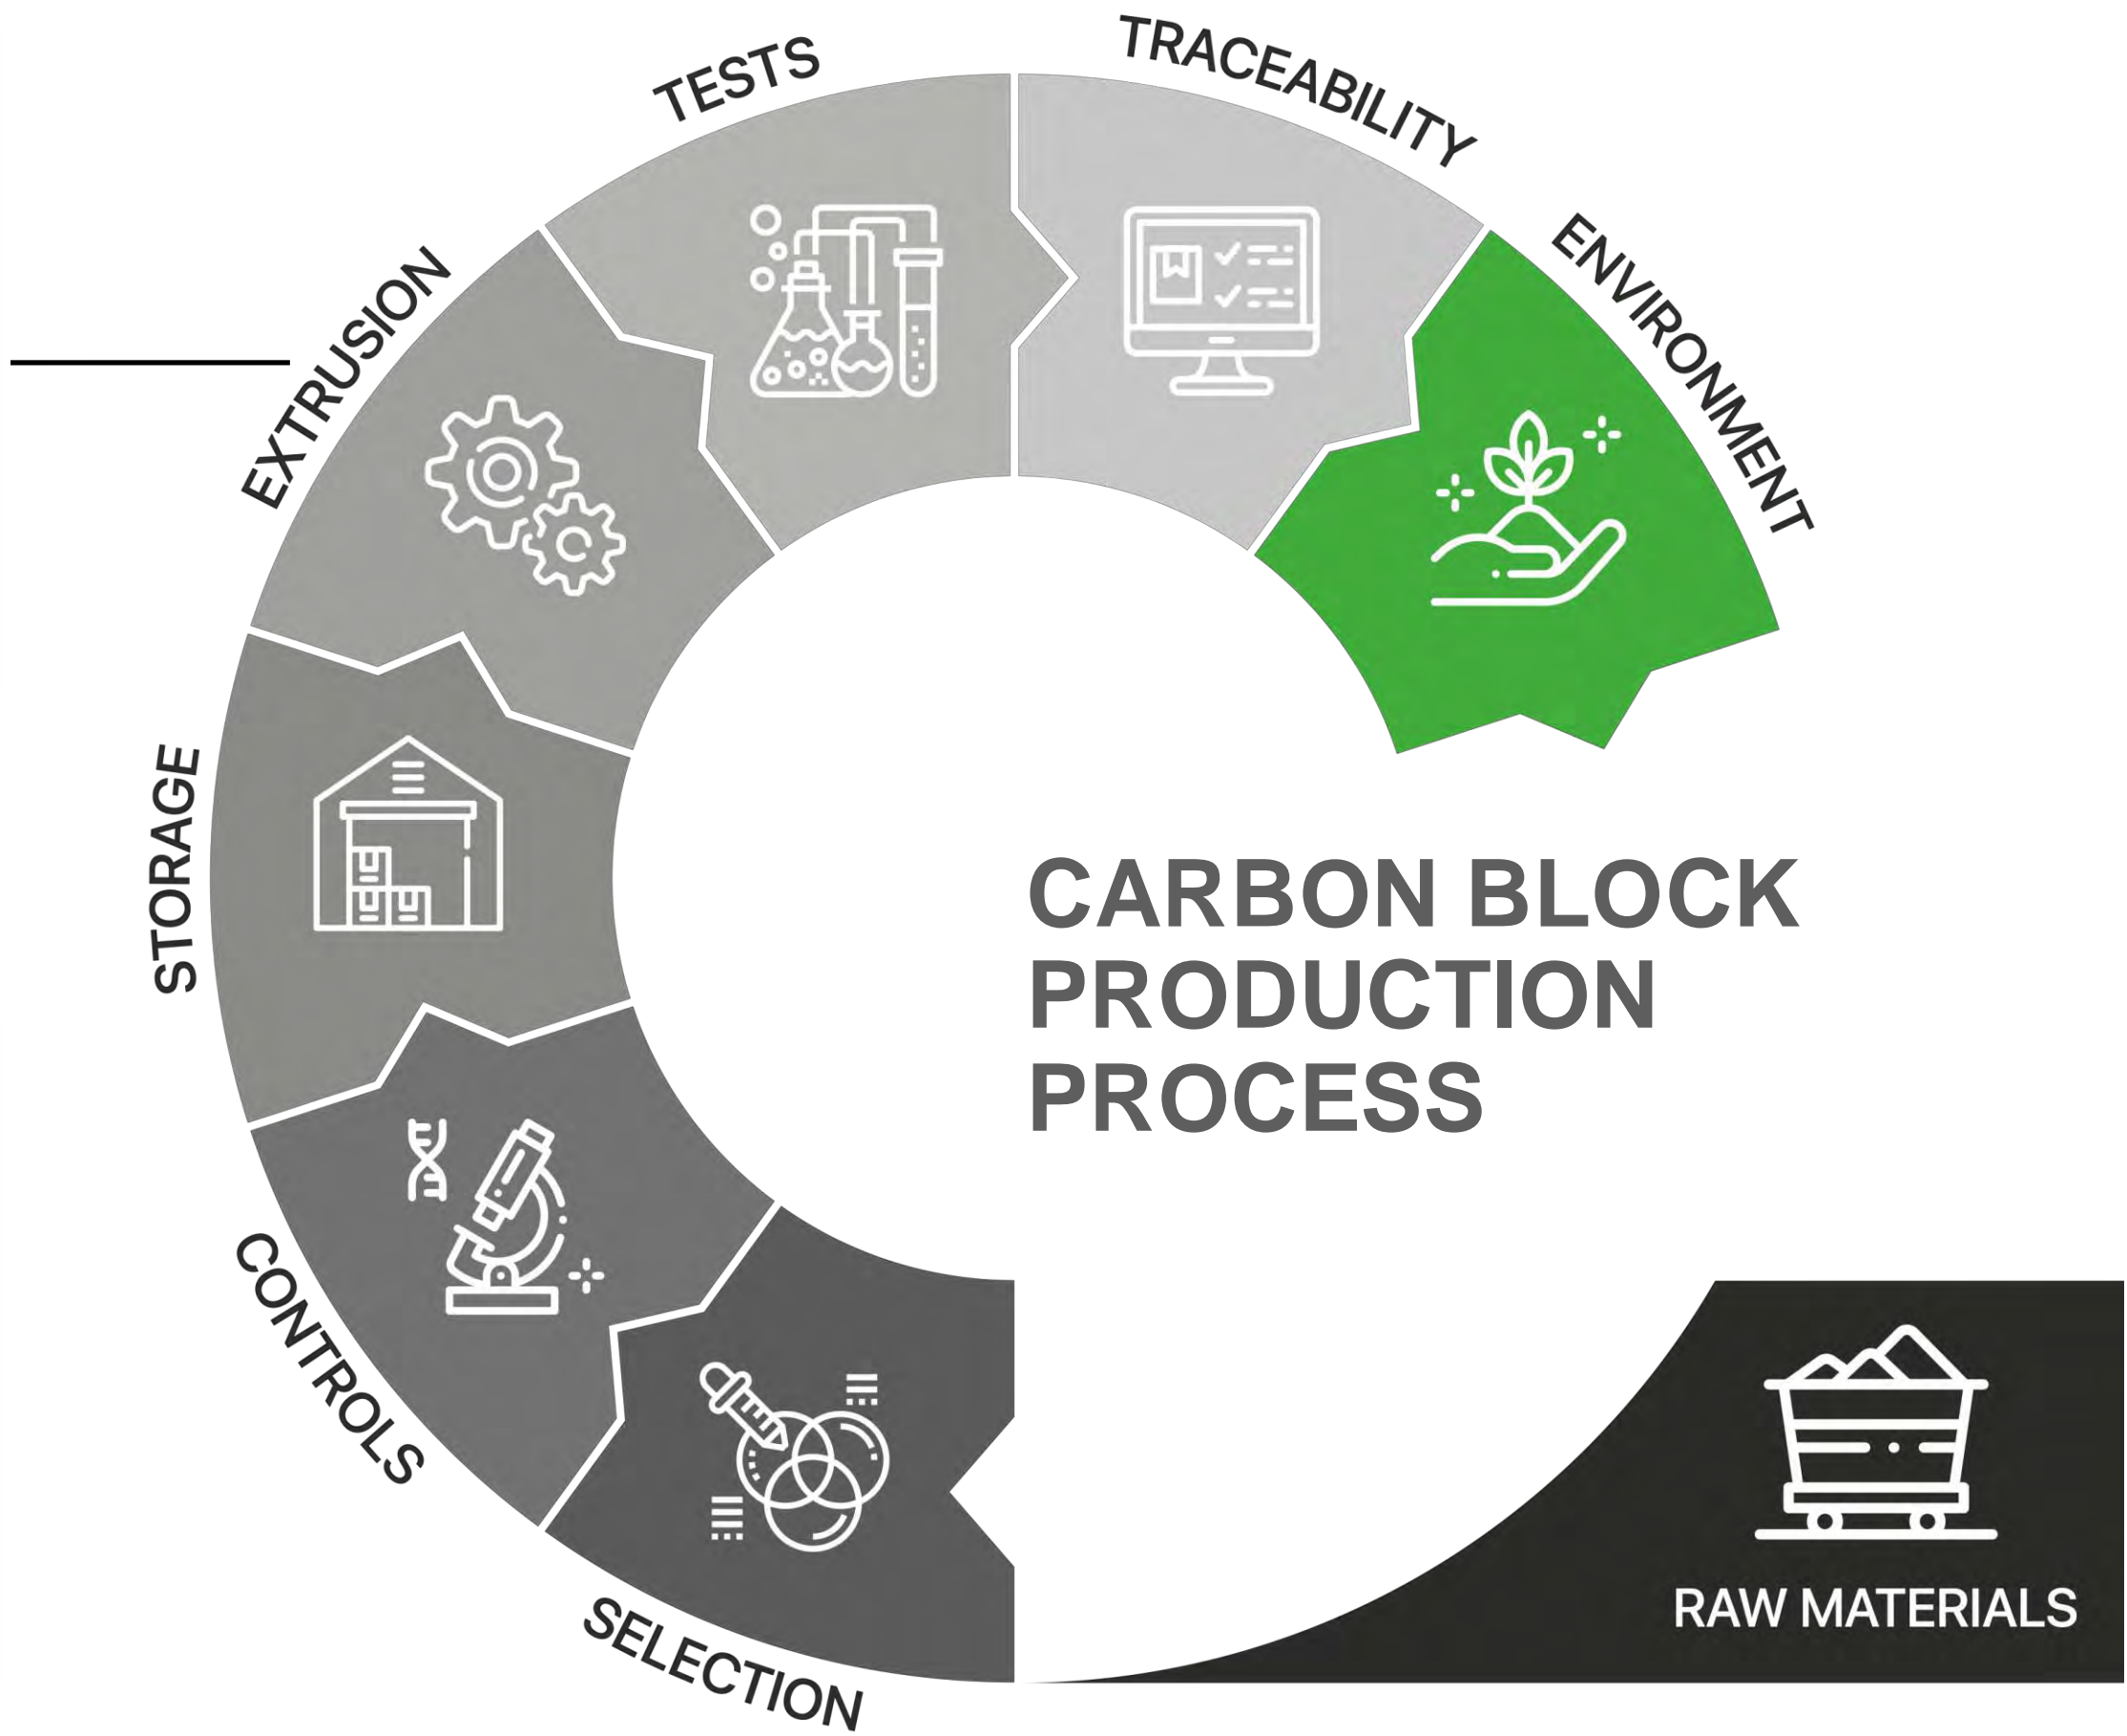

[See our plant in action](#)

- SELECTION**
the raw materials are carefully selected
- CONTROLS**
all incoming parts are subject to performance checks and tests
- MEMBRANE PRODUCTION**
membranes are produced in a controlled environment by fully automated machines
- ASSEMBLY AND TESTING**
3 assembly lines and 2 dedicated test stations with performance and electronics testing by highly qualified personnel
- TRACEABILITY**
each membrane is identified by allocation and batch marking
- ENVIRONMENT**
the entire production chain has an impact environmental impact close to 0

SELECTION
activated carbon obtained by coconut shell

CONTROLS
all incoming parts are subject to organoleptic and/or performance checks and tests

STORAGE
granular carbon is stocked for about a week in a hygrometer and thermal control room

EXTRUSION
Profine® Carbon Blocks are directly produced in **tw**: through a fully developed and automatised manufacturing extrusion process

TEST
are executed:
qualitative and performance tests
quality control with electronic microscopy
amperometric and photometric detection

TRACEABILITY
each cartridge is identified by batch marking

ENVIRONMENT
the entire production chain has an environmental impact close to 0
