High-Tec

We utilize cutting-edge technology, including state-of-the-art waterjet cutting and CNC-machining, to deliver unparalleled precision in metalwork for superyachts. From custom fabrication to flawless finishing, our expertise ensures seamless integration into your yacht's design. With advanced machinery and global experience, we provide high-tech solutions that meet the highest standards. High-Tec Precision - where innovation meets excellence. Comprehensive High-Tec!

INDIVIDUAL. COMPETENT. EXCELLENT.

At our company, the wishes of our customers always come first. With our extensive expertise and experience, we develop tailored solutions that perfectly meet your requirements. Our goal is to achieve the best possible results – from production to final finishing.

Thanks to our in-house polishing department, we bring your components to a high gloss – in accordance with the highest yachting standards. This ensures not only top quality but also outstanding results that impress.

Rely on our expertise to successfully and individually realize your projects.
