

See the reality.

Not just the charts.

**Scout begins where
traditional charts end.**

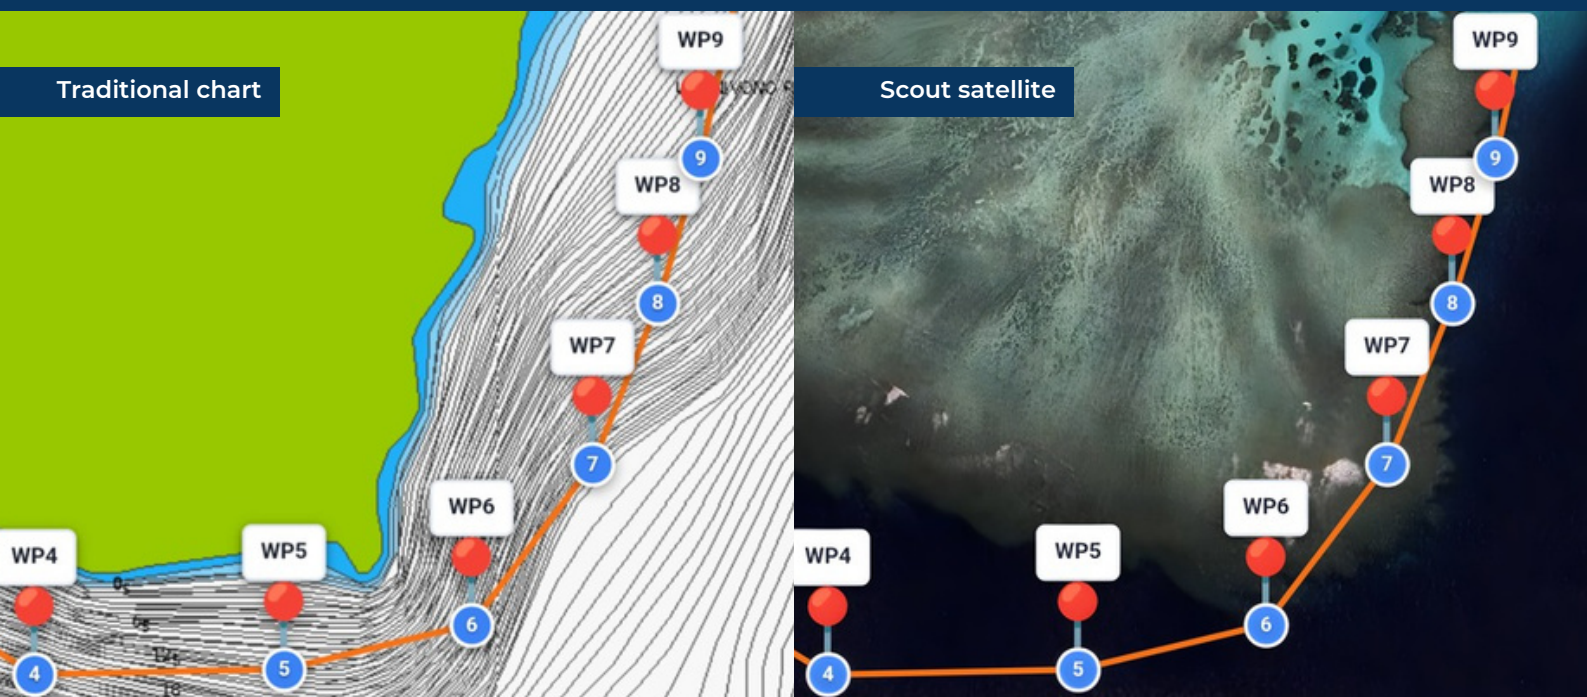

Many charts rely on decades-old surveys, and navigation, weather, AIS and onboard systems are scattered across separate devices. Scout brings them together. High-resolution satellite imagery alongside your charts, plus weather and live vessel data.

One device. One screen. One clear picture.

VORTEX
MARINE

Both images show the same route.

Chart contours show you a survey. Satellite imagery shows you the water.

See what charts miss

High-resolution satellite imagery alongside charts to better identify reefs, channels and anchorages.

Sleep better at anchor

Track your position over satellite imagery and receive alerts if your boat drifts.

Understand the weather

See wind, waves and forecasts directly on your chart to make better decisions.

Stay connected

Monitor AIS, onboard systems and vessel data from one dashboard.

Scout at a glance

Every Scout

Satellite imagery and charts online • Route planning, waypoints and tracking • Wind, wave and tide forecasts • PolarisOS, built for marine navigation and nothing else

With Polaris+

Satellite imagery downloaded for offline use • Full zoom detail for reefs and anchorages • Live NMEA 2000 vessel data and custom dashboards • AIS vessel tracking • Anchor alerts

Built for the boat. Goes wherever you do.

10-hour battery • Built-in GPS • Dual-SIM 4G and Wi-Fi • 10" 1000-nit sunlight-readable display • Anti-glare, glove-friendly touchscreen • IP65 water and dust resistant • MIL-STD-810G drop tested • NMEA 2000 data over Wi-Fi • 128GB storage plus microSD
