

## COMPANY PROFILE LUIITEC

*Luitec was founded in 1996 and developed itself the last 20 years in industrial service providing, specialized in compressed air, pumps, appendages, machine room and workplace equipment, and technical components in general. Luitec has proven itself in consulting, sales, service and maintenance of the mentioned product groups. The distinctiveness of Luitec is the knowledge and innovation-driven specialism in every core activity. Important market segments are oil & gas industry, maritime and luxury yacht building, steel and general industry, food industry and water supply companies.*

### Technology with a human face

Most important in this overall concept is responsibility for product quality and service. We also do business in a personal way. In consultation with you realizing the best solution. "Technology with a human face" that is what we stand for.

Technology in the broadest sense of the word is reflected in our complete assortment, divided into the following main categories;

- **Compressed air:** compressors, compressed air treatment, diving equipment and pneumatics
- **Flow technology:** pumps, hoses, expansion joints, fittings and seals
- **Engine room and workshop equipment:** tools and maintenance products, workshop equipment and building materials
- **Transmissions:** open and electromechanical drives, hydraulic components, roller bearings

Through our years of experience in the maritime sector and luxury yacht building we offer our customers a complete program "Yacht Supplies".

### Guaranteed quality

Among the quality of our products and services, we understand the degree to which we meet the demands and expectations of our clients. Luitec is constantly working on improving the quality of our products, services and organization processes. We realize that the quality of our products and services is of paramount importance to the further development of Luitec BV. Our employees are regularly trained and know the latest developments in our core product lines.

### Service- and engineering department

Our Certified Service Engineers guarantees correct maintenance of the after sales service of our own build and advised equipment. In addition, there is the possibility of closing maintenance contracts to define and monitor service level agreements. At fixed agreed times, our Service Engineers provides the periodic maintenance to your compressors, pumps or equipment. NEN3140 inspections belongs also to our possibilities.

We also identify air leaks in your compressed air system to reduce energy consumption. If technical components are out of stock Luitec is also able to produce or develop the technical solution by itself, In-House engineering!

### Health & Safety

Luitec B.V. wants to give a meaningful interpretation of the rules deriving from health & safety and environmental legislation and we aim at providing healthy and safe working conditions for our employees. In advising installations we strive as much as possible to durable and energy-efficient solutions to decrease the so-called Total Cost of Ownership. This is the basis to create a “human environment” to deliver quality and reduce our footprint.

### Sustainable entrepreneurship

Working together means for the Van Stenis Group helping each other, supporting where necessary, and being a safe harbor for our employees, offering continuity and as a result of it operate reliably to people and businesses.

The thrusted family company is more than just trade and sales. But it also has an eye of the human dimension and environment.

Sustainable entrepreneurship with a big “S”!

That is the mission statement of Van Stenis Group.
