# Magnifico Carbon "Bricola"

Carbon Fibre / Hypalon ® Superyacht Tender Fender

Venetians have been using Mooring Dolphins for 1300 years to moor their boats and ships to the pontoons and piers of Venice. They call them Bricole and they have only two disadvantages: they are heavy and fixed to the bottom, so they can't be moved.

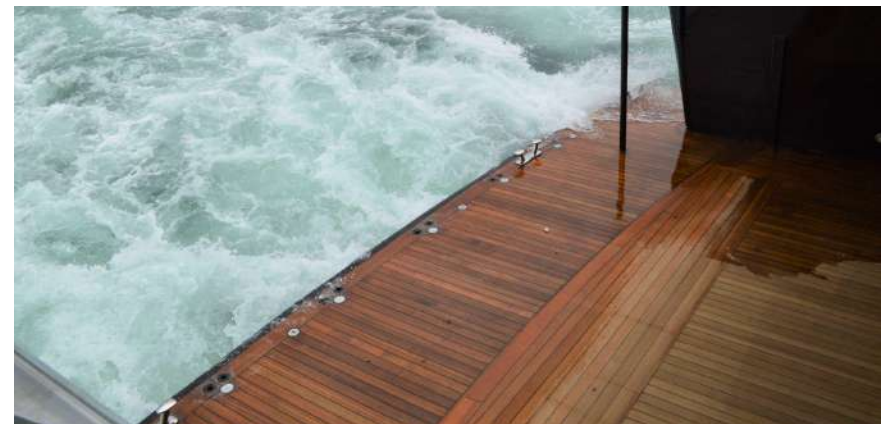

## STYLE FROM TECHNOLOGY

Carbon fibre epoxy prepreg construction with autoclave curing in female mould. It is lighter, sturdier and more durable, yet more elegant, than any other tender fender.

**MAGNIFICO IS FAST!**

Transforms swimming platforms into docking piers, and back to swimming platform faster than it takes guests to put on their swimsuits!

### TANDEM FITTINGS ON DECK

A deep steel pin and a big, hand operated screw assure a strong lock to the ship deck. They are positioned far from each other to provide the best load distribution, bot for perpendicular loads (tender hitting towards the ship, above the deck line) and tangential loads (tender scratching parallel to the ship).

More usual perpendicular loads below the deck line are also absorbed by a big plastic pad, in case your hull allows this.

### EASY HANDLING

Elegantly recessed handles on the bottom plus a handle on top make assembly, disassembly and carrying around super easy.

## MAGNIFICO TENDER FENDER

### MATCHING SURFACES

The Hypalon® inflatable fender is optionally made with carbon texture, similar to the frame.

## RATIONAL CONNECTIONS

Bottom polymer pads, one against the deck edge, the other on the hull surface, transforms the push by the tender into a low and distributed pressure on the deck, preserving the ships surfaces.

Twin deck sockets placed perpendicular to the ships edge and well distanced prevent rotation without undue stress to the ships structure.

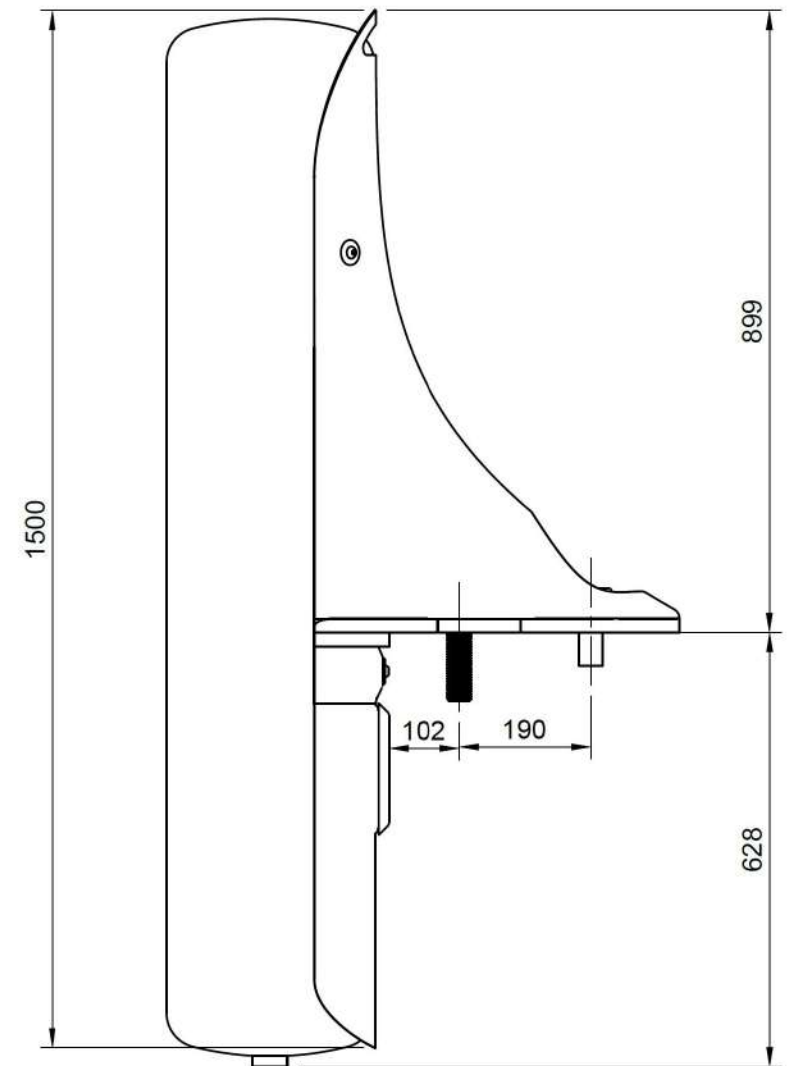

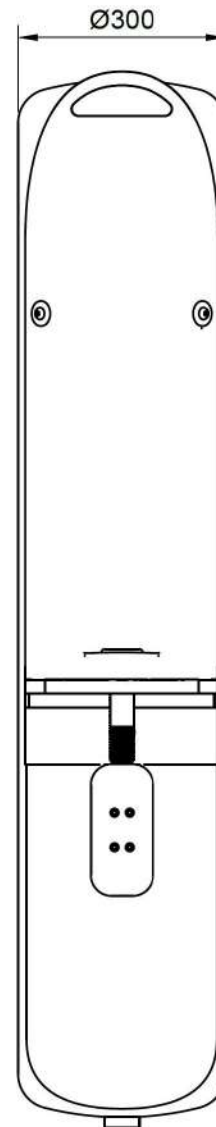

### VARIANTS AND SIZES

OVERALL HEIGHT	WEIGHT	WATERLINE DISTANCE
1200 mm	9 kg	350 mm
1300 mm	10.5 kg	450 mm
1400 mm	11.8 kg	550 mm
1500 mm	14.3 kg	650 mm

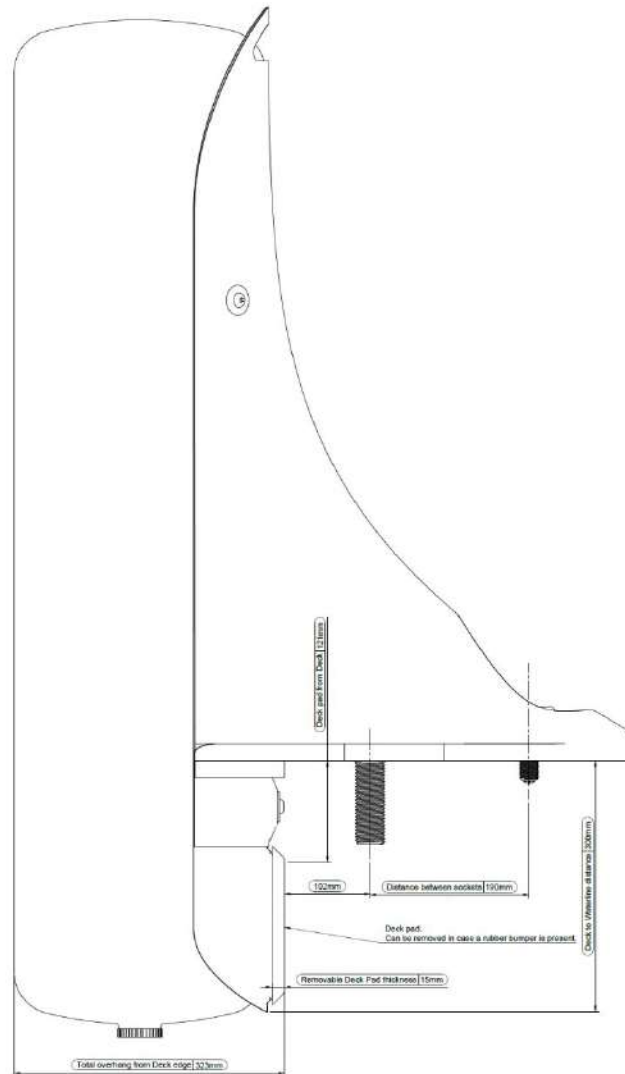

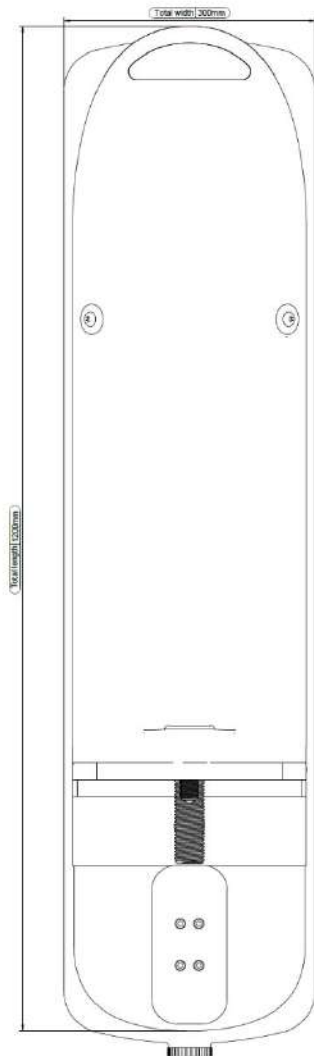

Maximum width (fender diameter) 300 mm

Length on deck 420 mm

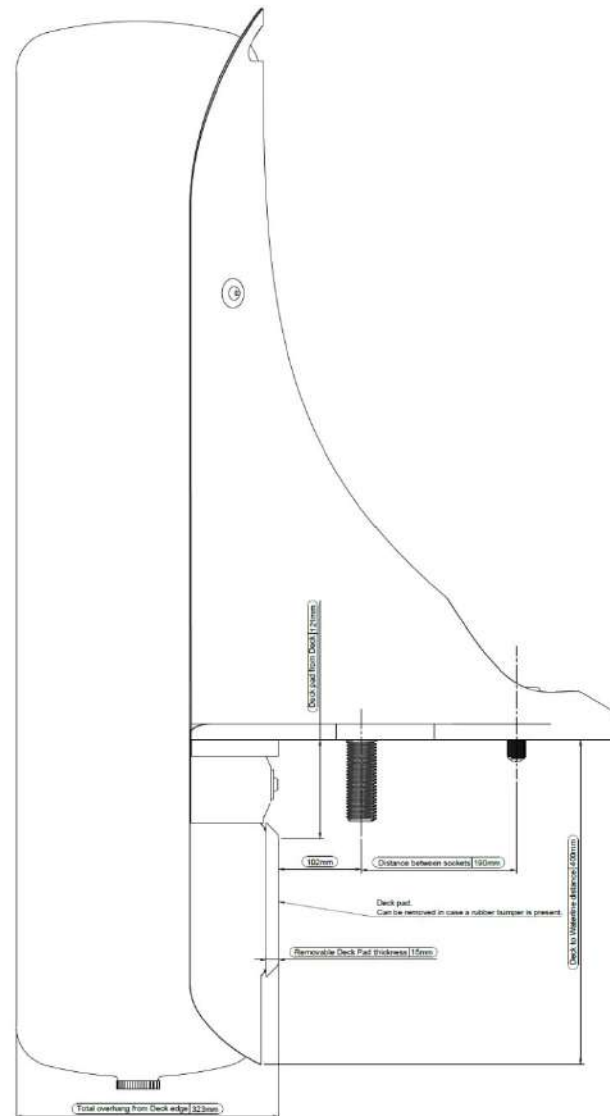

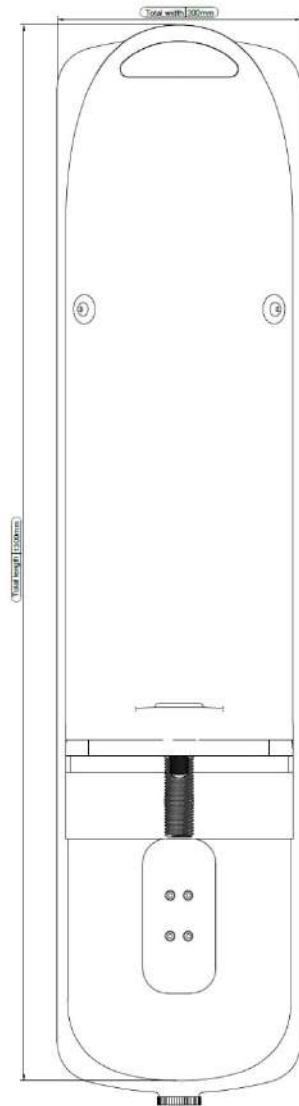

*Check the distance between your deck and the waterline and choose the appropriate Magnifico among 4 sizes.*
