ALBA 220

Carbon fiber **solid** gangway

Alba 220 will bend about 2.5 cm for each 100 kg of weight, and weighs about 4.4 kg, with male pin, wheels on a safe rigid caster, and dock side eye bolts for trapeze and guys.

Signature UV protected carbon fiber finishing with grey non-slip tread finish.

Alba 220 it's our solid, or not folding, model, and it's also our only gangway which cannot be equipped with handrails.

Spare parts kit included.

Female Deck Sockets

Fittings

The most comprehensive range of **deck sockets** for your gangway. All come with an impeccable highly polished deck flange. A complete set of adapters is available to couple any pivot with any socket, up to 34 mm diameter.

Finishing

We made no compromises: from surfaces polished in the same workshops used by Vicenza's famous gold jewelers, to solid CNC machining, this is the absolute best you can buy.

Pic. 1 STAINLESS STEEL

High quality, AISI316 welded socket with polished flange.

Pic. 2 PREMIUM STAINLESS STEEL- available also in BLACK HARD ANODIZED ALUMINIUM

A single block of AISI316 steel CNC machined for the smoothest effect.

Pic. 3 PREMIUM STAINLESS STEEL WITH KEY-LOCK - available also in BLACK HARD ANODIZED ALUMINIUM

With marine grade lock and key It needs a special bushing on the male pin.

Pic. 4 PREMIUM STAINLESS STEEL SQUARE FLANGE

Perfect to be installed on narrow toe rails.

Naked Carbon® standard finishing

The new standard

Naked Carbon® is the brand name that distinguishes Exit Carbon's specially designed products that meet the requirements of a 'natural' finish at origin and undergo a special polishing process that enhances their aesthetic characteristics.

No painting

Naked Carbon® refers to exposed UV protected carbon/epoxy composite, a finish that only Exit Carbon is able to provide on selected products. Exit Carbon autoclave cured preregs and high quality metal molds ensure the best technical performance and lowest possible weight, but also an UV resistance which is superior to the best marine clearcoats. These products do not require protective surface painting but only appropriate polishing. By showing the formidable carbon fibre in its natural shine and texture, they guarantee product quality from the very beginning. Furthermore, the surface of the gangway results mainly composed of carbon fiber with a minimal amount of epoxy resin as a matrix, a material much harder and more resistant to scratches than any superficial paint.

Visual effect

The visual effect at the typical usage distance (approximately 1.5 meters) is indistinguishable from the visual effect of a high-gloss painted gangway. The difference in finish is noticeable at a minimum distance of 30-40 cm or less.

High-gloss finishing option

High-gloss surface

With the clearcoat option you can add a (transparent) high gloss effect that enhance the carbon texture.

We use a special two-component acrylic paint used in the automotive industry and designed to withstand long UV exposure at high temperatures and seawater. The UHS (Ultra High Solids) clearcoat ensures the highest standard and let your gangway shine. The transparent paint is applied in several successive layers to ensure a lasting and impeccable finish, a splendid optical effect, and a smooth surface both visually and to the touch.

Now or later on.

This special high-gloss finish is available as an option both at the time of purchase and during any subsequent refit of the product. During the refit, in addition to high-gloss painting the product, a fresh new layer of anti-skid is also applied.

Color finishing options

Custom Painting

Gangways, swim ladders, wheels, sun awning poles, can be painted in different colors. Please refer to the table to choose your color combination.

| | |
|-------------------------------|--------------------------------|
| RAL 7015 Slate Grey | RAL 3004 Purple |

Antiskid color options

Custom Non-slip surface

Our standard non-slip surface color is **RAL 7037 Dusty Grey**. The non-slip surface color is also available in the nuances RAL 9010 Pure White, RAL 7047 Telegrey, RAL 7024 Graphite Grey.

 **RAL 7037 Dusty Grey**

 **RAL 7024 Graphite Grey, similar to
Awlgrip Shark G1478/F1441/L1007**

 **RAL 9010 Pure White similar to
Awlgrip Blue Glo White H8477-F8325**

 **RAL 7047 Telegrey**

Options

Teak Walking Surface

Our teak walking surface is 100% hand-made and follows the elegantly rounded gangway design. We use high-quality, 10 mm sheets of teak. The combination of classic teak and modern carbon technology creates a stand-out accessory for your yacht: beautiful, strong, and surprisingly light.

Yacht Name

You can customize your gangway with your logo, yacht name, or a drawing. Our best selling option is the name/logo visible within the non-slip surface, but it can also be painted in any color different from the main color of the gangway, even metallic.

A range of 5 different fonts (Helvetica Neue, Gill Sans, Franklin Gothic, Georgia, Garamond) constitutes the basic configuration for the yacht name. Any other font, logo or drawing is also possible: just send us your **vectorial file, .ai, .dxf, or just the font type** and we will recreate the same graphics on the gangway.

Georgia **Georgia**

Gill Sans **Gill Sans**

Garamond **Garamond**

Franklin Gothic **Franklin Gothic**

Helvetica Neue **Helvetica Neue**

Options

Padded Stow Bag

Provide the best protection for your Exit Carbon piece of equipment - and your yacht too - with our exclusive, Exit Carbon weatherproof padded stow bags.

All our bags feature resistant and comfortable handles, shoulder straps, practical zips, and can be customized with your logo or yacht name.

Trapezes

A trapeze is the perfect solution for keeping your gangway readily available without the noise of the wheels scratching on the dock or worries about the gangway hitting the dock. Most trapezes are made with short spreader bars, resulting in an uncomfortably narrow passage when you walk through. We made our **Carbon Spreader Bars 80 cm long** but still extra light.

Carbon Spreader Bar, Full Dyneema ® Trapeze, and Full Trapeze with Lateral Guys available.

You can have Lateral Guys both in Polyester with carabiners, and in Dyneema ® with carabiners, blocks and cleats for easy adjustment.

Carbon fiber yacht gangways

| MODELS | LENGTH | WIDTH | MAX LOAD | WEIGHT FROM | PRICE |
|-------------|--|-------|----------|-------------|--------|
| Alba 220 | 220 cm / solid (7' 2") | 39 cm | 500 Kg | 4.4 Kg | €2,490 |
