

The background of the entire page is a high-quality photograph of a massive ocean wave. The wave is curling over, creating a large, hollow barrel shape. The water is a deep, vibrant blue-green color, and the crest of the wave is breaking into white foam. The sky is a clear, pale blue. In the lower third of the image, there is a horizontal band with a pattern of small, dark dots.

PRODUCT OVERVIEW

MAKING WAVES WITH INNOVATIVE YACHT PAINTS

Like the powerful wave in Hokusai's famous The Great Wave off Kanagawa, SEAJET symbolizes the perfect combination of Japanese tradition, craftsmanship, and innovation. As part of Japan's Chugoku Marine Paints Ltd., one of the world's largest manufacturers of marine coatings, SEAJET brings this expertise to the world of recreational boating.

With a complete range of antifoulings, primers, paints and varnishes, SEAJET offers everything you need for durable protection and a perfectly finished hull. All products are developed with an eye for performance, quality and the environment and produced in our new state-of-the-art factory in The Netherlands.

In this product overview we are proud to present our extensive product range and two groundbreaking innovations:

SEAJET SEOSIL Series

A revolutionary, biocide-free silicone product range with proven foul-release technology. For an extremely smooth hull. Eco-responsible and effortless.

SEAJET RIBCOAT

A biocide-free silicone transparent coating system, specially developed for the underwater hulls and tubes of RIB's. Offers long-lasting protection against fouling in both fresh and salt water – for maximum speed and fuel efficiency.

With SEAJET, you are choosing innovation, reliability, and Japanese quality. A wave of progress for every boat enthusiast.

SEOSIL SERIES

SEAJET SEOSIL Series is a new silicone product range with proven biocide-free foul-release technology for superior bottom protection. Smooth. Eco-responsible. Effortless.

ULTIMATE PERFORMANCE

PELLERCLEAN

038 TAISHO 027 SAIKŌ

PellerClean is a biocide-free, foul-release coating system for propeller and stern gear. PellerClean consists of two-component epoxy primer and one-component transparent silicone coating providing foul-release properties against marine growth in both fresh and salt water.

038 TAISHO

- For the highest fouling areas (warm and cold).
- Suitable for all substrates including aluminium.
- Proven uplift in fouling protection.
- Minimum build up of paint.
- Bright colours including bright white.

027 SAIKŌ

- Copper-free antifouling for fresh, salt or brackish waters.
- Suitable for aluminium.
- Bright colours including bright white.
- Minimum build up of paint.
- BÅD magazine 'Best on Test'.

Big kit, total content 1750 ml

033 SHOGUN 039 PLATINUM

033 SHOGUN

- Test winning heritage.
- Highly effective against slime.
- Slow polishing antifouling.
- Suitable for inland waterways.
- High performance cruising antifouling.

039 PLATINUM

- Ultimate performance antifouling for the highest fouling areas.
- Super self-polishing.
- Ideal for blue water cruisers.
- Advanced Self Polishing Copolymer (SPC) antifouling.
- 2-pack & mono component

031 SAMURAI

- Great value for money.
- Good all-round performance.
- Season long performance.
- Slow polishing antifouling.

032 PROFESSIONAL

- Economical antifouling for professionals.
- Slow polishing antifouling.
- Season long performance.

036 ENDURANCE

- High performance antifouling.
- Hard matrix antifouling.
- Suitable for 2 seasons.
- High solids (60%).
- Suitable for high fouling areas.

037 COASTAL

- Good performance in inland waterways.
- Suitable for drying mud berths.
- For high speed craft.
- Hard matrix antifouling.

034 EMPEROR

- For high fouling areas.
- Suitable for aluminium.
- Ideal for club racers, as it can be burnished during the season.
- Bright colours.
- Slow polishing antifouling.
- For professional use.

034 EMPEROR A

- Suitable for aluminium.
- For all types of water.
- Bright colours.
- For high fouling areas.
- Slow polishing antifouling.
- For amateur applications.

TRIPLE PACK

- Recommend for propellers, stern gear and trim tabs.
- All products in 1 kit!
- Propeller Primer with SEAJET 034 A antifouling.
- Antifouling available in black, white and grey.

012 Universal Primer - Undercoat

- Universal primer for 1-pack topcoats.
- Excellent adhesion to all surfaces and subsequent coats.

015 Underwater Primer

- Underwater primer and tie-coat.
- Excellent adhesion to existing antifouling and subsequent coats.
- Good sea water resistance.

114 Propeller Primer

- Epoxy primer for propellers, stern gear, etc.
- To be used on aluminium, alloys GRP, etc.

117 Multipurpose Epoxy Primer

- Multipurpose use.
- Long term durability for fibreglass, steel, aluminium, etc.
- Protection against osmosis.

TOPCOATS

122

- Ultimate performance one component topcoat.
- Easy to apply.
- Popular colours.
- Resistance to minor knocks.

CLEAR COAT

- Foul-release coating for use on underwater lights, transducers and bow thrusters.
- Provides long term protection against fouling.
- Both fresh and salt water environments.

132

- Ultimate performance two component topcoat.
- Long term gloss and colour retention.
- Very tough and durable finish.

BILGE PAINT

- One component alkyd finish.
- Durable protection for boat bilges, lockers and bulkheads.
- Resistant against antifreeze, grease, fuels, and oils.
- High gloss.
- Easy to clean.

VARNISH

120

- A beautiful, high gloss traditional tung oil varnish.
- Contains UV absorbers to provide longer life.
- Easy to apply.

THINNERS

Thinner for 1-component paints

- Thinner A to be used for antifouling and SEAJET 015 Underwater Primer.
- Thinner U to be used for SEAJET 012 Universal Primer, SEAJET 122 Topcoat and SEAJET 120 UV Varnish.

130

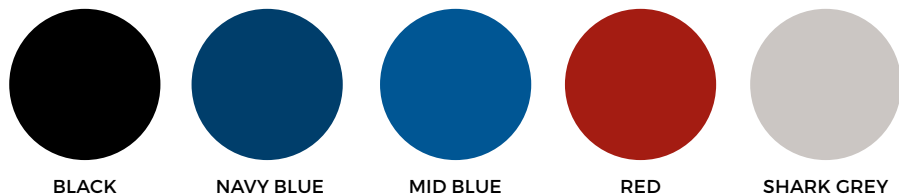

- A beautiful, high gloss traditional varnish.
- High UV Protection, resistance to abrasion, loss of gloss and chemicals.
- Two component for high performance.

Thinner for 2-component paints

- SEAJET Thinner E to be used for all Epoxy products.
- SEAJET Thinner P to be used for SEAJET 132 topcoat and SEAJET 130 Gloss varnish.
