# About US

Since 1983, **MATT CHEM®** has been a creator of maintenance products and concepts for industrial and marine applications.

Our specialities and solutions conform to the legal requirements, notably the EEC regulatory standards in respect of biodegradability and ecotoxicity which requires rigorous selection of raw materials.

It goes without saying that **MATT CHEM®** is concerned about the future impact of its products on the environment and as such in minimizing any effect on fauna and flora and equally relating to the provision of information indispensable to its end-users to ensure that they observe recommended doses, conditions of use and application.

**MATT CHEM® MARINE** is the leader in the field of teak maintenance and renovation. It boasts more than 200 products that fulfill expectations of pleasure-boat owners with regards to result.

Protecting the environment is our firm's major preoccupation and this ambition is illustrated perfectly by our motto : **A clean sea for future generations®**

# OUR VALUES

## BIODEGRADABILITY

**MATT CHEM®** has made the choice to prioritize turning towards surfactants of a vegetative origin. We create **detergents from selected ingredients of an easily renewable origin**. Their natural origin and their biodegradability assure them a better compatibility with the marine environment.

## ENZYMATIC FORMULATIONS

**MATT CHEM®** strives to include in formulations enzyme combinations that facilitate the cleaning and degradability of waste. We are increasingly adding into our formulations these specific microorganisms (**enzymes and bacteria**) that will naturally degrade and digest organic matter, fats, limestone, and tartar.

## CUSTOMERS SATISFACTION

**MATT CHEM®'s objective is to offer a high level of service** that is beyond reproach, **by answering customers' request** and resolving any issues as quickly as possible and constantly striving to improve the client experience.

## INNOVATION

**MATT CHEM®** increases efficiency and productivity and take care to promote sustainability. Benefits of eco friendly cleaning products: **Safer for the environment, Less harmful and Reduces Plastic Waste.**
