■ About US

Lightbest focus on the manufacturing, R&D and sales of UV lamps and related products. They are widely used in water purification treatment, UV photolysis, waste gas treatment, sewage treatment, disinfection equipment, smart health appliances etc. and supply customers with one-stop service and solution. We specialize in UV germicidal lamps, UV water sterilizers, electronic ballasts, quartz glass tube, submersible uv lamps and lamp socket etc. and adhere on the principle to strive, uphold, share and win-win together. We have been a stable supplier of high-quality products, perfect service, professional operation and competitive price both in China and the globe.

Our factory has passed ISO9001-2015 and SGS quality system certification, and was rated as a "High-tech Enterprise" in 2023. It introduced the Japanese 5S quality management system and established a strict quality control system. The products have passed CE, UKCA, UL (E526029), EPA (102905-CHN-1), FCC, Rohs, EPR and other certifications. The products sell well in China, Hong Kong, Macao and Taiwan and other regions, and are exported to the United States, Canada, Germany, France, the United Kingdom, Spain, Sweden, Switzerland, Norway, Austria, Italy, and Finland, Netherlands, Romania, Russia, Indonesia, Vietnam, India, Malaysia, Singapore, Japan, South Korea, Brazil, Chile and other countries and regions.

As the industry-university-research base of CIT college and the drafter of national standards on UV, Lightbest is committed to product breakthroughs and innovations CIT collage, continuously improve the production process, strictly implement product production process control and finished products control, meet the different needs of customers, improve management level and production efficiency, and provide products with more perfect performance and more professional services. Let us work together to provide you with a better application experience and make our own contribution to improving our living environment.
