## **OCEAN SUNSET BIO PARTS WASHER**

### **Solvent-free parts cleaner!**

The new biological parts washer Ocean Sunset enables to **definitely eliminate the risks and dangers** related to the use of solvent drums that we still can find in so many workshops in the process of mechanical parts cleaning.

The principle of this parts washer, based on the environment-friendly bioremediation technology, **eliminates all the user constraints related to common solvent parts washers**. Its working process is very simple : a water-based cleaning solution (BlueLiquid), neutral pH, not toxic, non-flammable associated with micro-organisms tablets eating oil and hydrocarbons **to regenerate the bath and provide constant cleaning efficiency**.

This process ensures **an efficient and economical degreasing of your parts**.

The device has been designed in a **co-creative way with the users**, to be **100% user-friendly and reply to their specific needs** : it is fitted with different cleaning system such as brush, sprinkling, soaking area to enable hidden-time work, with filters to retain residues, with a lid **to limit evaporation**, with an electromechanical control panel to inform the user, with an Eco saving mode and with a Boost mode for very dirty parts.

This parts washer does not generate any harmful vapors and does not cause any fire risk. It just requires the adding of tablets to keep constant cleaning efficiency overtime and **limit the amount of waste and cost of retreatment involved**.

Legislation on solvents becoming more and more restrictive. This parts washer should quickly gain its spurs in many workshops. It will enable operators to work in ideal cleaning and security conditions while protecting the environment.
