

YOU DESERVE REAL MARINE® AUDIO GEAR.

The marine environment can take a huge toll on cosmetics and materials. Plastics get brittle and fade, foam speaker surrounds rot due to UV exposure, water creates its own issues, and saltwater even worse. All KICKER Real Marine products are protected from these elements and meet or exceed marine industry standards for UV exposure (ASTM G154) and humidity and saltwater exposure (ASTM B117), as well as for degree of water tightness and pressure (ISO 12216:2002 D 1.1-2).

KICKER Marine Speakers are weatherproof thanks to KICKER's Real Marine standards. KICKER Marine Power Amplifiers are developed from the ground up by KICKER engineers as authentic marine amplifiers, with key features to set the Real Marine series apart as a true amplifier line made for use in the outdoors. KICKER Marine Wire and Accessories set us apart from other industry brands – ABYC and USCG compliant with certified MRBF fusing and fuse holders.

Real Marine means you have confidence and piece of mind.

KICKER
MARINE AUDIO

THE MOST RELIABLE, REAL MARINE
AUDIO GEAR ON THE WATER

KICKER was founded in 1973 by musician Steve Irby, who continues to drive the vision behind KICKER's engineering and passion. Going mobile, the Stillwater, Oklahoma brand found its way as high-performance audio gear for cars and trucks on America's highways and backroads. From our early successes as "America's Music Machines," KICKER's first marine subwoofers and speakers surfaced in 1998. Today, customers choose from more than 150 boat-ready, weather- and water-proof KICKER products to Go Overboard.

KICKER M-CLASS PREMIUM

Our cutting-edge premium lineup caters to customers seeking superior sound quality and luxury in their marine-audio experience. We meticulously select state-of-the-art components and materials to meet the advanced design standards of Real Marine®, and each development decision is made to deliver unmatched sonic accuracy and performance for your boat.

M-CLASS PREMIUM COMPONENT SYSTEMS

Our designers created this premium set of midrange and high-frequency speakers to marry acoustic performance with durability, delivering fun and excitement throughout your cruise.

- System-pack design with separate unique tweeters, precision midrange drivers, and integrated crossover protection
- 6.5-inch (100wRMS) or 8-inch (200wRMS) systems
- Carbon fiber-infused midrange cones, 28mm Teton® textile-dome tweeters, glass-filled nylon woofer baskets

M-CLASS PREMIUM COAXIAL SPEAKERS

In addition to truly superior sound quality, every aspect of MSC Coaxial Speakers is engineered specifically as ultimate drop-in upgrades in your boat.

- 6.5-inch (100wRMS) or 8-inch (200wRMS) pairs
- Tough carbon-fiber-infused midrange cones and 28mm Teton tweeters
- Glass-filled nylon woofer baskets and RGBW LED lighting

Teton is a registered trademark of TORAY INDUSTRIES.

M-CLASS PREMIUM SUBWOOFERS

The MW-Series of subwoofers is the next level of bass response in your boat, with up to 450 watts of power handling (RMS) for big deep bass on any cruise. Choose the M-Class MWE Enclosure Subwoofer if you love the tight, accurate bass response that a small, sealed or vented enclosure can provide. If your space is limited, then you want M-Class MWF Freeair Subwoofer to get big bass without the need for an enclosure.

(comes with charcoal-colored grilles; white grilles sold separately)

M-CLASS PREMIUM LOADED SUB ENCLOSURE

Premium subwoofers deserve a premium enclosure. The MWLE features an active 10-inch subwoofer and 10-inch passive reFLEX™ subwoofer, purpose-built to pound out big bass in a little package.

- 400 watts RMS power handling
- Tough, molded all-weather enclosure
- Expandable RGBW LED lighting

KMTCXL TOWER SYSTEMS (8-INCH AND 6.5-INCH)

KMTCXL Tower Systems deliver HLCD performance in popular 6.5" and 8" sizes, incorporating award-winning KICKER KMXL Horn-Loaded Speakers.

KM614FL THIN-MOUNT COAXIAL SPEAKERS

Thin, flush-mount grille design for a non-intrusive installation. Features ASTM-tested sealed and rustproof components with multi-color RGB lighting that works with LED Remote (sold separately).

KLSR LED SPEAKER RINGS (8.8-INCH)

These half-inch-thick speaker rings are designed for all-weather use, and are specifically made to fit KICKER 8-inch Marine Speakers into an 8.8-inch mounting hole. They feature seven-color RGB LED options, expandable with the KICKER LED Remote (sold separately).
