

MOST FREQUENT INJURIES

FREGOMATIC is a professional AUTOMATIC PRESS. It automates an operation that up until now has only been done manually. It has converted the manual press into a small machine with a long working life.

ADVANTAGES

FOR CLEANING

-New VERTICAL WRINGING system: The rollers act on the mop, from the top to the base of the mop, wringing it out to the tips. This way, both water and dirt will glide off the mop, leaving it both cleaner and completely wrung out.

-It can wring out industrial mops up to 450g, flat mops, cloths...

-Minimum maintenance: Like with a mobile phone you just need to charge the battery. Rechargeable battery with a long service life, with a battery charge indicator.

-Water and steam proof.

FOR THE USERS:

-Avoids injuries and physical effort. No physical effort is required for wringing out the mop.

-Improves productivity at work.

-Avoids potential sick leaves. The most frequent causes of sick leave in cleaning workers are due to injuries in the wrist, arms and back because of repeated strain..

Professional solutions that save time and prevent injuries

EN 61000-6-2
EN 61000-6-3

FREGOMATIC adapts to the majority of cleaning products already on the market (buckets, trolleys, mops, etc...)

Technical specifications	Code fpt00001 (without bucket) fpt00002 (with bucket) fpt00003 (special flat mops - cloths)
Can wring out	Industrial/kentucky mops (up to 450grs) cloths - flat mops - dusters
Engine	Two 6 volt units (10.000 rpm)
Battery	12 volts and 2.9 ah - without battery effect
Battery charger	Intelligent - from 100 to 240v. 12 v 800 mAh
Autonomy	700 wringing operations per charge
Charging time	4-5 hours
Weight of wringer	5,24 kg
Measurements of wringer	24.5 x 24 x 31 cm
Materials used for the main parts	Steel and fiberglass
Elements included	Wringer - battery charger - fregomatic clip - bucket with wheels (optional)
