

# Introduction to SOLGO

Using SUNPOWER® Cells

# What is Sol-go

- Established in 2019, Sol-Go is a solar panel design and manufacturing firm based in the US with manufacturing in the Philippines and sales in North America, Europe, Middle East and SE Asia.
- Sol-Go is a spin-off from SunPower.
- Sol-Go specializes in lightweight, flexible solar panels and custom glass solar panels.

S O L G O

# Our Product Range

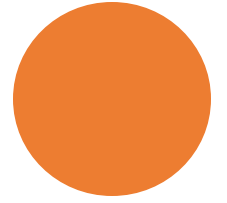

- Standard Range: Available from 50 to 284 watts, suitable for trucks, RVs, marine vessels, and land installations.
- High Efficiency: Built with SunPower back-contact cells, delivering 20% more efficiency compared to standard solar cells in the industry.
- Customizable Options: Panels can be made in any shape, color, or size, especially favored by the marine sector for seamless integration.
- Warranty: All panels, both standard and customized, are backed by a 5-year warranty for peace of mind.

Sol-Go's 165W flexible solar panel

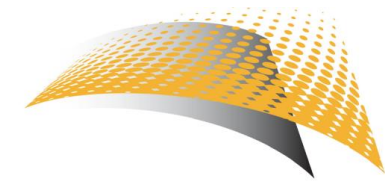

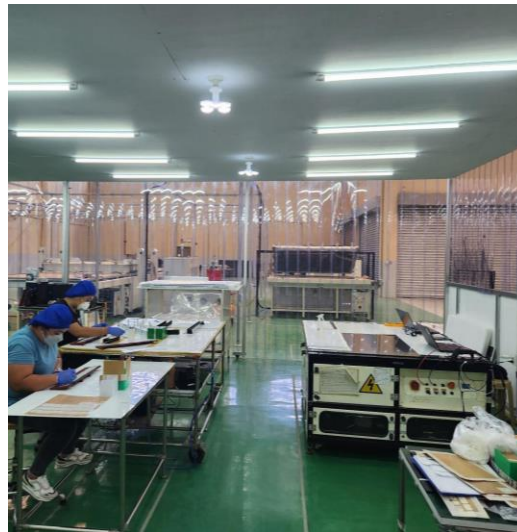

# Industries We Power with Solar Innovation

- Sol-Go semi-flexible solar panels are used by leading RV, truck, and marine companies, providing reliable and efficient solar solutions.

# Our Factory

Our production capacity is currently **15MW**, expandable to **350MW**, with a **2,200 square meter** manufacturing facility.

**SOLGO**

# Why Choose Sol-Go? Delivering Quality, Efficiency & Innovation

- Sol-Go provides high-quality solar panels at a competitive price, backed by expertise, innovation, and precision manufacturing:
- Industry-Leading Design & Engineering: Our team of solar experts ensures advanced panel design while maintaining manufacturability.
- Cost-Effective, High-Quality Production: Manufactured in the Philippines by skilled professionals, ensuring top-tier quality at lower costs.
- Innovation & Performance: Our U.S.-based R&D center continuously develops high-efficiency, durable solar panels to meet evolving industry needs.

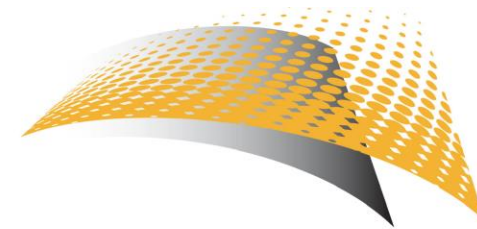

SOLGO

# People of Sol-Go

- **Scott McHugo – CEO & Founder**
- 15+ years in solar, including 8 years in Fortune 100 companies.
- Expertise in solar technology, manufacturing, supply chain, and pricing.
- **Edward Abu – Factory Operations Manager**
- 15+ years in solar panel manufacturing, ensuring quality and efficiency.
- **Rowena Ratay – Factory Operations Manager**
- 15+ years in supply chain, logistics, and production planning for solar manufacturing.
- **Mella Hunter – VP, North America Sales**
- 15+ years of experience in solar panel sales and market expansion.
- **Iain Garner – GM, Europe**
- 20+ years in solar modules, systems, and business development.
- **Kirsten Cabanas-Holmen – Senior R&D Manager**
- 15 years of experience in solar energy testing and technology development.

# Strengths of Sol-Go

- **Experienced Leadership**

- Management team with 15+ years of expertise in solar panel design, manufacturing, supply chain, and quality control.

- **Innovative Products & R&D**

- To ensure long-term reliability. Custom panel design optimized for manufacturability.
- Third-party backed warranty for quality assurance.
- R&D center in the U.S. driving high-efficiency innovations.

- **Advanced Manufacturing**

- Sol-Go owned and operated facility in the Philippines (2,200 sqm).
- 15MW production line, expandable to 350MW.
- Strong partnerships with raw material suppliers for consistency and quality.

- **Global Sales & Customer Focus**

- Established presence in North America and Europe, with expansion into the Caribbean, SE Asia, and the Middle East.
- Competitive pricing ensuring value for customers.
- Dedicated and responsive sales team providing exceptional support.
