

Growtec

Powering CEA Yields

Grow-tec indoor Unique Solution

Enables Affordable, Local and Sustainable
Food Production at Scale

365 days of reliable, economical production with consistent quality and predictable pricing.

Grow tomatoes, cucumbers, and peppers **anywhere in the world**, regardless of climate or location.

Ultra-fresh and pesticide-free, competitively-priced vegetables, naturally ripened for superior taste and nutrition.

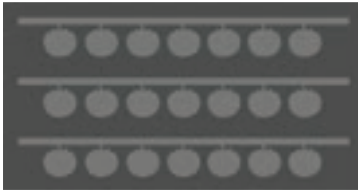

Grown locally to reduce import dependency and ensure freshness at lower environmental costs.

Technology Leadership

Patented High-Yield Indoor Systems Deliver 10x-20x More with Fewer Resources

Maximizing Space Efficiency

Patented Multi-Story Horizontal Trellising System and Method

Resource Efficiency and Scalability

95% less water and NO pesticides

Automation for Continuous Production

Patent-pending Continuous Sprout Cultivating System

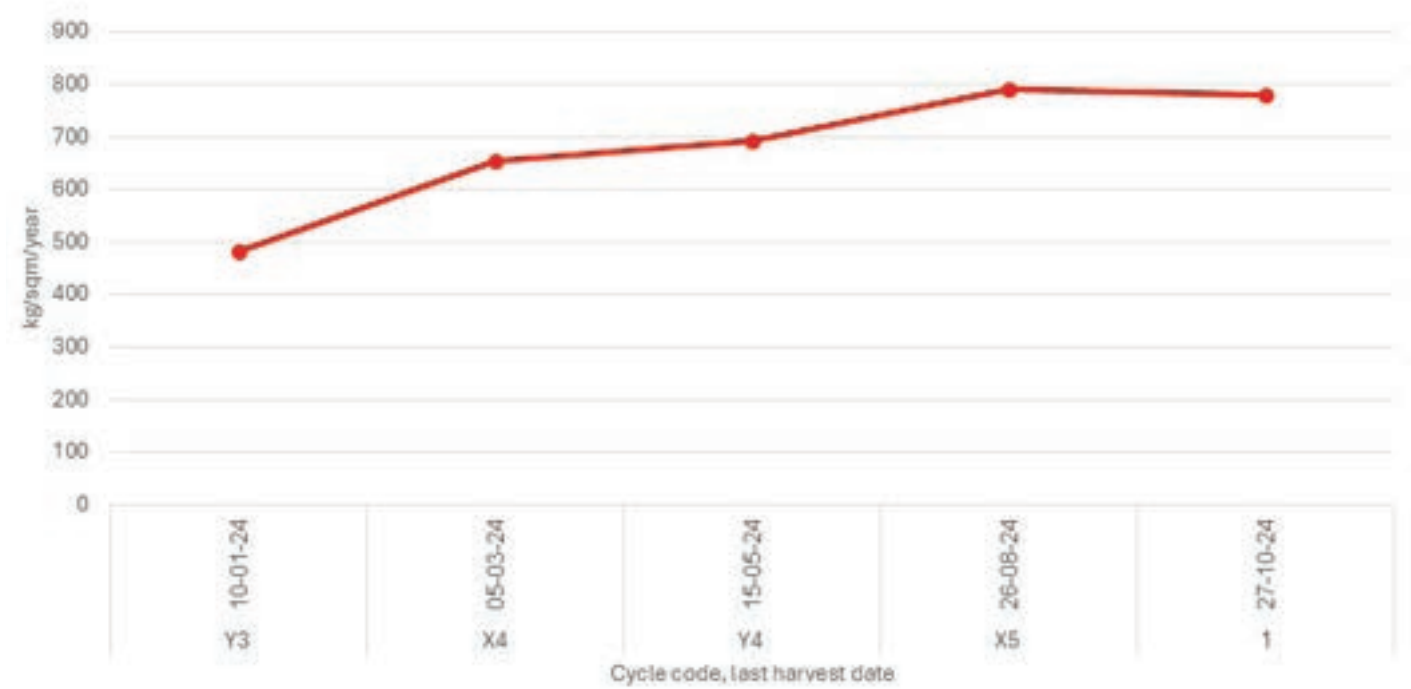

Precision Engineering for Optimal Produce

Proprietary methods optimize light, nutrients, and climate

Cracking the Fruiting Vegetables Formula

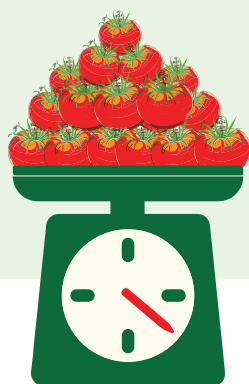

Tomatoes - 10X

Tomatoes annual yield

162 lbs./ft²

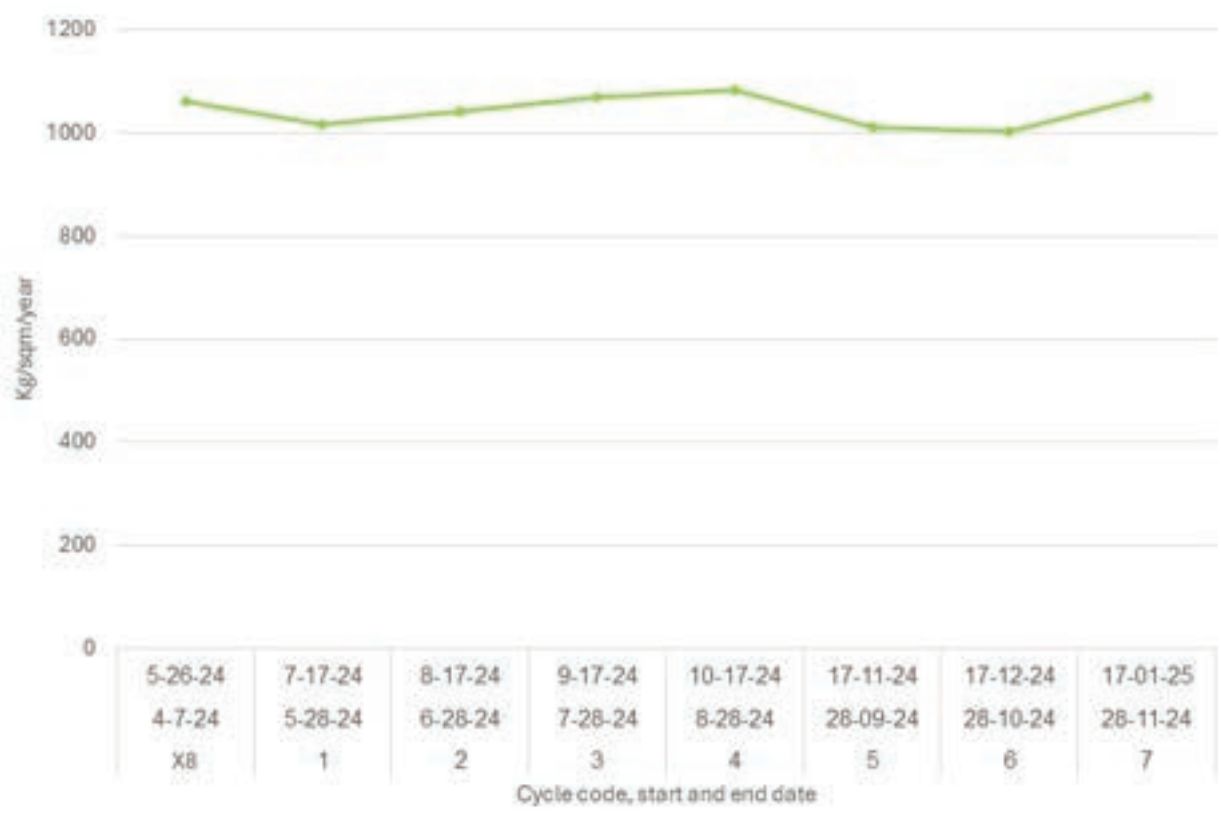

790 kg/m²

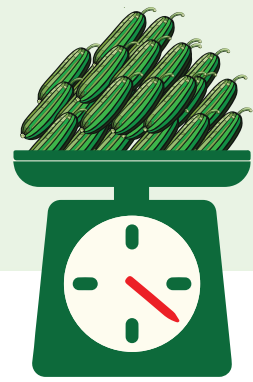

Cracking the Fruiting Vegetables Formula

Cucumbers - 20X

Cucumbers annual yield

225 lbs./ft²
1100 kg/m²

Facility Planning & Design, Implementation, Ongoing Support
