The human side of cleaning

ZIMO

GRANDE 35

GRANDE BRIO 35

Professional in every way.

Even small spaces present challenges when it comes to their cleaning; in fact, obstacles and impediments make it difficult to reach all surfaces with the same level of effectiveness. In environments such as professional offices, where dirt is stubborn and the space reduced, the manual tools that we have always had aren't helpful to achieve the desired outcome.

35 is the perfect scrubber dryer for cleaning floors up to 1.050 m², which allows you to get professional results quickly. The 35 comes as an electrical cable or, to have more freedom of movement, it's available as a battery version, which guarantees an autonomy of use of more than 1 hour.

**TANKS
CAPACITY**
16/18 l

**COVERAGE
PERFORMANCE**
1050 m²/h

**WORKING
TIME**
> 1,20 h

Simple controls

Always ready for use, only two buttons (On/Off) positioned on the handlebar.

Ergonomic grip

Made in anti-slip rubber with built-in buttons.

Adjustable handle

Even in operation, it allows you greater maneuverability along walls and corners.

On-board battery charger

Integrated into the machine, it indicates the battery charge status at all times.

Recovery water tank

Equipped with handle to facilitate gripping and emptying.

Non marking wheels

Don't leave marks on the floor, even if wet.

Water refill

The clean water tank is equipped with protection to prevent unwanted objects from falling into it.

Scrub and dry

Set behind the brush, the squeegee follows bends without leaving splashes.

Scrubbing pressure

The unit cleans with 28 kg of constant pressure on the floor.

Brush fixing

It's installed and removed without using your hands.

Easy to use right from the start.

The activation of the cleaning program takes place through the innovative SENSITIVE TOUCH SYSTEM positioned in the handle. The double-grip handlebar allows you to move the machine in a practical way from one room to another, while, thanks to the large wheels with which it is equipped, you can easily climb steps and take it to different floors of a building.

Hidden corners no longer exist.

The 35 scrubbing deck is side-mounted in order to allow you to clean perfectly even along the walls and under the furniture. The whole surface of the room, including corners, is thus cleaned and sanitized.

Cleaning thoroughly doesn't mean making noise.

In many environments, such as hospitals, nursing homes and schools, it's fundamental to maintain peace and quiet. Professionals who work there are asked to limit as much as possible the noise that can affect the rest and concentration of others. The brush and vacuum motor of the 35 are well soundproofed to minimise the noises generated by the cleaning operation.

The inclination is up to you.

With such a diversified adjustment of the handlebar, the parking of the machine is less cumbersome; you can in fact close the handlebar above the tank and transport the 35 comfortably in the trunk of a small car.

Let yourself be carried by your needs.

You can choose which type of brush to use: those made of PPL with bristles of varying thickness or, for more resistant surfaces you can opt for a Tynex brush with steel bristles. There is a wide selection, even if you prefer to use the pad: a soft version with a polishing effect, through to the more robust pad for routine maintenance and, the more aggressive version to guarantee deeper cleaning.

Record pit stop.

All parts that require daily maintenance have been designed to be easily accessible and quick to clean. The brush can be removed by pressing the appropriate button, while no tools are needed to check and remove the squeegee and water filter.

GRANDE BRIO 35

A compact solution for great performance.

The 35 walk-behind scrubber dryer is designed to transform and enhance traditional manual floor cleaning methods. It can be powered electrically through a cord or more conveniently through a rechargeable battery, offering flexibility in terms of mobility and operational range.

The use of 35 brings immediately perceptible benefits in terms of efficiency and operational costs of cleaning activities. Its ergonomic design and intuitive use ensure that you can work without fatigue, significantly increasing your productivity.

The 35 scrubber dryer is a versatile and state-of-the-art solution that can handle the cleaning of small spaces, such as gyms, classrooms schools, professional offices, stores, bars, restaurants and general commercial offices.

Benefits VS the mop

Eliminates bacteria, preventing the transmission of diseases.

Take care of the amount of water during use.

Improves productivity and reduces operator work and downtime.

Reduces the use of disinfectants and chemical products.

Optimize resources and working hours.
