

ZORA 3.0

Command with Clarity

All Your Yacht Systems, All In One Screen.

Zora 3.0 is the intelligent operating system for yachts and sailing vessels, a new category that replaces fragmented hardware and disconnected apps with one seamless platform of software and hardware.

*It's not just another screen;
it's a new standard.*

Zora integrates navigation, safety, maintenance, and vessel management into a unified system designed for clarity, confidence, and control.

Built by Captains, for Captains

Where closed systems demand more apps and manual checks, Zora simplifies the journey: fewer tools, clearer signals, and automatic logs for full accountability.

ZORA 3.0

PRECISION HARDWARE.
ADAPTIVE SOFTWARE.
ONE EXPERIENCE.

The End of Fragmented Tech. The Start of Clarity.

Situational Awareness

Shows key data: weather, traffic, depth & systems to prevent false alarms.

Emergency Workflow

For POB, fire, medical, or hull breach, Zora guides responses & automatically records steps.

Unified Control

Glass switching reduces clutter. Consistent profiles for cruising, sailing, anchoring & docking.

Operations Built In

Manage projects, maintenance, docs, inventory and expenses in one place.

Intelligent Alerts

Tracks thresholds and trends. Clear early alerts without noise.

Access Anywhere

Run on helm, tablets or screens. Cloud adds remote access and backups.

Just as "smart homes" turned disconnected devices into one intelligent environment, Zora 3.0 turns every system onboard into one cohesive experience.
