Product Benefits

★ **Highest quality noise reduction materials in the market** used by the likes of Targa and Baltic Yachts as their OEM quality.

★ **Allows sailors to enjoy the sounds of nature** and easily discuss with their travel partners instead of listening to the roaring sound of their engines.

★ **ISO standard compliant materials** that are designed to enhance the safety of the user.

★ **Durable materials made to last** high quality lamination unites the material layers together so that they are strong and sturdy even in the rough conditions of the northern hemisphere.

★ **Design made in Finland** that comes with a sleek and fine tuned look.

★ **Production supports the circular economy**, as the some of the materials are from recycled materials.

★ **Complete product range** that takes care of all of the noise cancellation needs, so you don't need separate products from different manufacturers.
