TECHNICAL PRESENTATION

900

- Heavy cut polishing compound, restores paintwork and gelcoat.
- Easy to use.
- Great results with a single application.
- Use with a variable speed polishing machine equipped with the hard foam pad P100.

902

- Fine polishing compound for a perfect shiny finish.
- Eliminates small defects and holograms.
- Use with a variable speed polishing machine equipped with the light foam pad P102.

901

- Medium cut polishing compound.
- Eliminates : oxidation, streaks, scratches, yellowing and black marks.
- Restores a perfect shine.
- Use with a wool pad for an abrasive action or with the P101 pad for less friction.

903

- Super fine polishing compound enriched with specific high resistance wax.
- Seals paints and gelcoats for a long lasting protection.
- Eliminates micro defects.
- Reduces and delays the appearance of deposits.
- Use with the P103 pad or with a microfiber.
