

EUROTROL

WATER TREATMENT COMPONENTS

COMPANY PROFILE

OUR HISTORY

Water, a family affair

Eurotrol is a B2B **Italian family company**, market leader in the international production and distribution of a wide range of components and solutions for primary water treatment in residential, commercial and industrial applications.

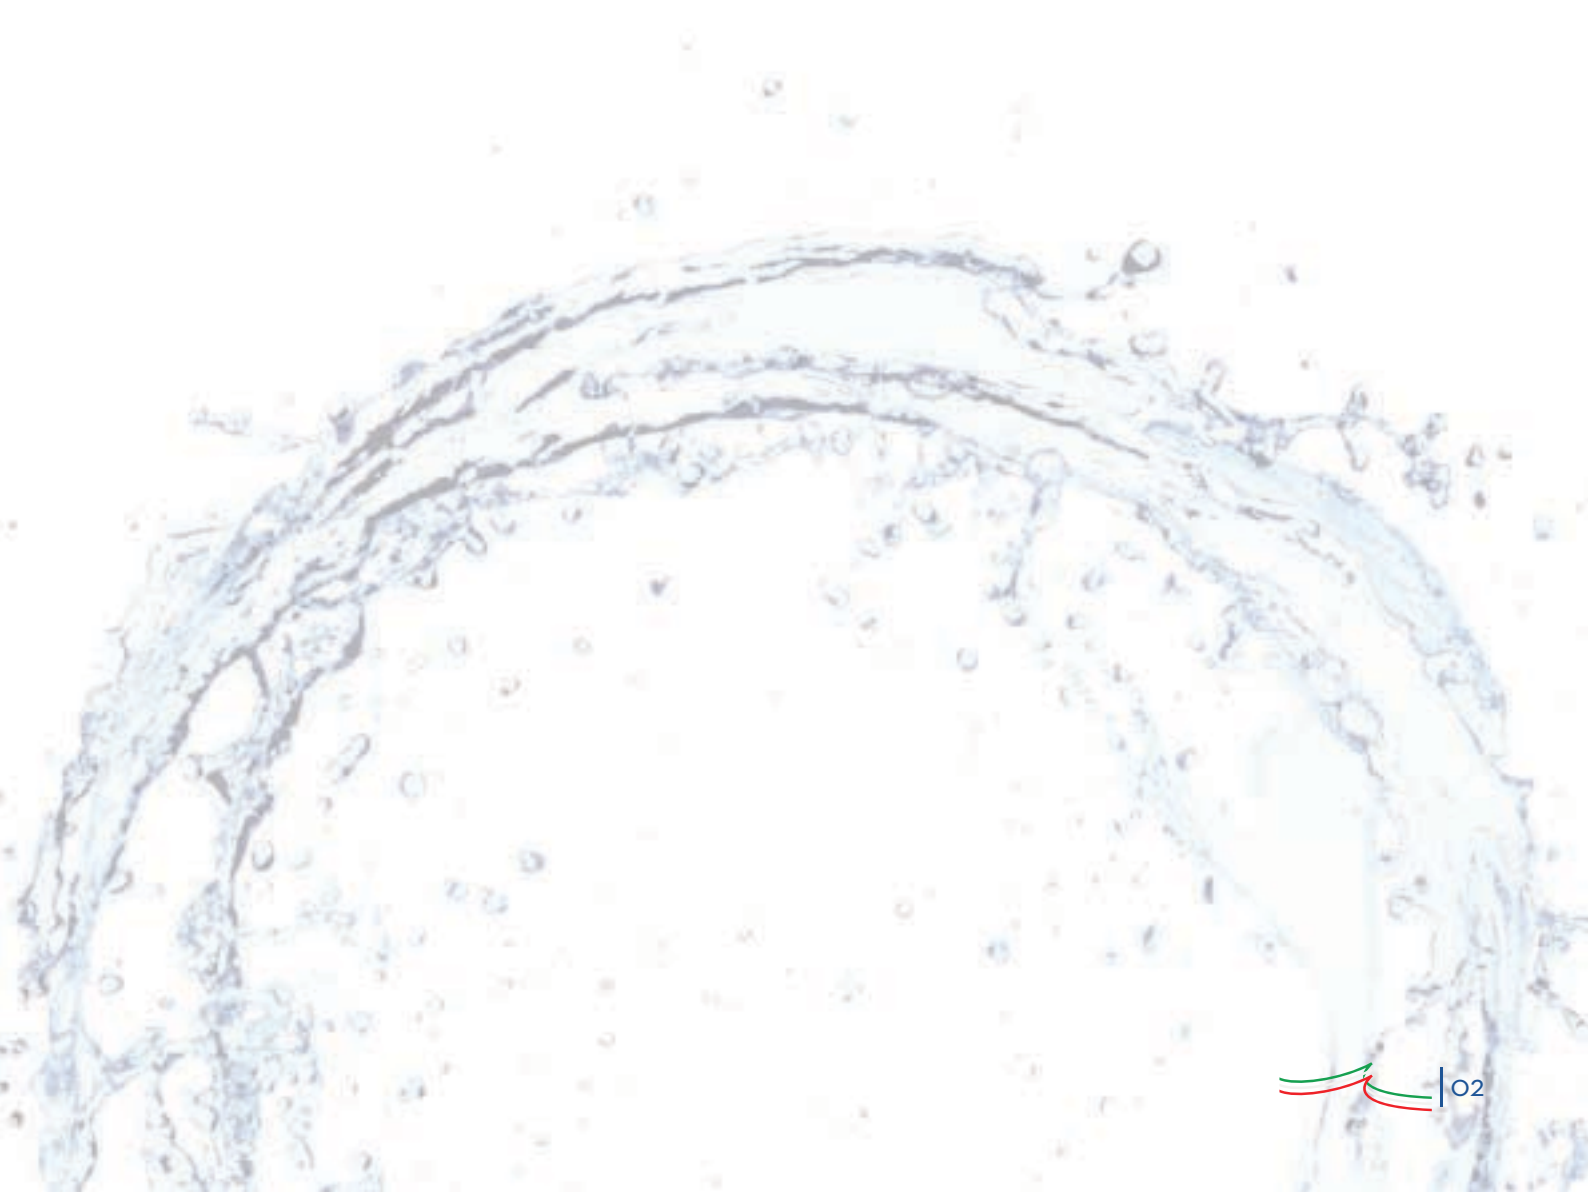

Roots in the past, eyes on the future

Founded in 2000 as the exclusive distributor of the Autotrol brand, **Eurotrol has consolidated its position** among the niche players in the water treatment technology market.

In **2014** the proprietary brand **MWG was born**: these components meet the highest quality standards in the industry, and are chosen by the **most prestigious plant manufacturers worldwide**.

Today Eurotrol is led by Patrizia Leoni, CEO of the company.

Our Pillars

VALUES

In a worldwide context of growing attention to water-related issues, we pursue our business goals without ever losing sight of the compass of values that have characterized this family business since its foundation.

Through skills gained over the years, **active listening to customers and their needs**, we are a solid and reliable partner when it comes to primary water treatment components.

We are convinced that dreams come true when each team member feels like a meaningful, valued, and involved part within the working organization: **the respect and spirit of collaboration** between people are among the strategic assets that allow us to continue to grow and evolve.

Passion, courage, and an insatiable curiosity do the rest.

MISSION

“To guide partners in choosing the best components for water treatment”

We select, produce, and distribute components and state-of-the-art solutions for primary water treatment worldwide.

We are constantly searching for excellent and **innovative products**, certified and guaranteed.

We offer our customers a wide selection of components and a fully tailor-made service: from a highly specialized technical advice to order placement, through a flexible and meticulous after-sales service.

VISION

“We imagine a world where everyone has the possibility to choose to drink their home water”

We aim to safeguard and ease the sustainable management of such a precious and scarce commodity as water, with respect for the people and the Planet.

We are convinced that only a responsible and far-sighted use of this essential resource will ensure its availability for future generations.
