

Increase time, space and enjoyment on the water
with our custom designed inflatables

ABOUT US

Superyacht Inflatables specialise in designing and manufacturing innovative and exceptionally high-quality custom inflatables for superyachts worldwide.

With over a decade of experience, our team are experts in kitting out superyachts. Whatever your inflatable requirements are, we can fulfil your needs, whether for a netted sea pool, multi-functional platform, impressive toys, comfy loungers or even a whole aqua park set up.

From product conception and design to European manufacturing, branding and delivery, our exceptional standards have made us the leading manufacturer of superyacht inflatables globally.

Manufactured using the most eco-friendly fabric

Inflatable toys available for next day delivery

Super safe, quick zip joining system

All items can be personalised

Removable printed non-slip top surface

In-house design and European manufacturing

WHY CHOOSE US?

Our custom inflatables are designed in-house and handmade to order, so you can choose any shape, size or design to suit your requirements. We offer consultation at every design phase to enable you to select features that give you the most functionality as well as personalisation.

Unique modular designs can be created using our quick zip system that links components together, enabling any combination of pools, platforms and jet ski docks.

SUSTAINABILITY

Manufactured from the most environmentally friendly materials available, Superyacht Inflatables leads the way in material technology. Our products are created using TPU (Thermoplastic Polyurethane) rather than traditional PVC (Polyvinyl Chloride) where possible. TPU doesn't contain plasticisers that can leach into the ocean, and the raw material can be recycled.

All our materials comply with REACH standards, and we believe them to be the most eco-friendly in the industry.

CUSTOM PLATFORMS

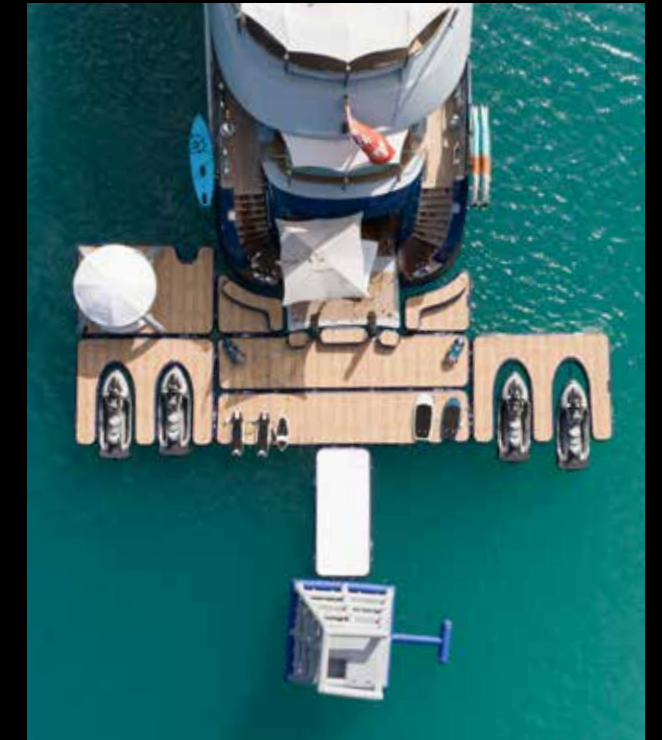

Engineered for the perfect fit, our custom inflatables marry superyacht aesthetics with outstanding durability.

Our inflatable work and leisure platforms are the perfect solution for additional space on the water. Not only do they extend the outdoor area for guests onboard, offering freedom from the limits of the yacht, but they can also be used by crew for maintenance purposes.

Both our custom and stock platforms are stable, easy to inflate, manoeuvre and store and feature a removable non-slip top surface printed to coordinate with your existing deck. Berths and reinforced soft loop tie-off points for jet skis and tenders can be included as needed, whilst we ensure surfaces remain flush and clear of any trip hazards.

All of our inflatable platforms can be customised to suit your colour scheme and branded with your yachts' name/logo.

GAMES DECKS

Whether your passion is scoring hoops, shooting goals or serving an ace, we have an inflatable games deck to suit you.

Available in any shape and size, Superyacht Inflatables' sports courts are robust, hard-wearing and easy to stow. They are also a more cost-effective option compared to carbon fibre alternatives.

Working closely with the owners and crew of various superyachts, we have developed a radical and flexible games deck which drastically reduces the set-up and breakdown time of more extensive sports courts.

Custom made to order, our courts can be produced as a single unit or divided into separate panels.

CUSTOM SEA POOLS

Create your own safe swimming area and personal beach club with our custom inflatable sea pools.

Superyacht Inflatables netted sea pools provide a safe and secure area to swim away from jellyfish and other unwanted sea creatures. All our sea pools are quick and easy to set up, and with removable nets they take up minimal storage space when deflated.

Each sea pool can be custom built to any size with logos etc. added as required. Extra narrow perimeter pools can be constructed to ensure the smallest storage size possible, or going to the other extreme; we can incorporate large sunbed areas to create your own floating beach club. Our pools are made from tough TPU drop stitch material, making them very firm under pressure so rigid to walk and lounge on.

The sea pool that Superyacht Inflatables created for *MY Seasense* is superb quality and so easy to use. The last pool we had was in one large piece, whereas this one is modular in four pieces and only takes 40 minutes to pack away, as opposed to two hours for the previous model. The fact that you've made the deck look like real teak is also a winner with the owner, as is the stability.

I can't fault Superyacht Inflatables, you not only provided a first-class product but you also managed the project meticulously throughout. We loved that you even made an effort to visit the boat and set up the sea pool with us."

First Officer, *MY Seasense*
67m Benetti

YACHT SLIDES

A thrilling descent merging high-end design with adrenaline-pumping excitement.

Superyacht Inflatables' yacht slides are the ultimate addition to any yacht, providing guests with an unforgettable yacht to water experience!

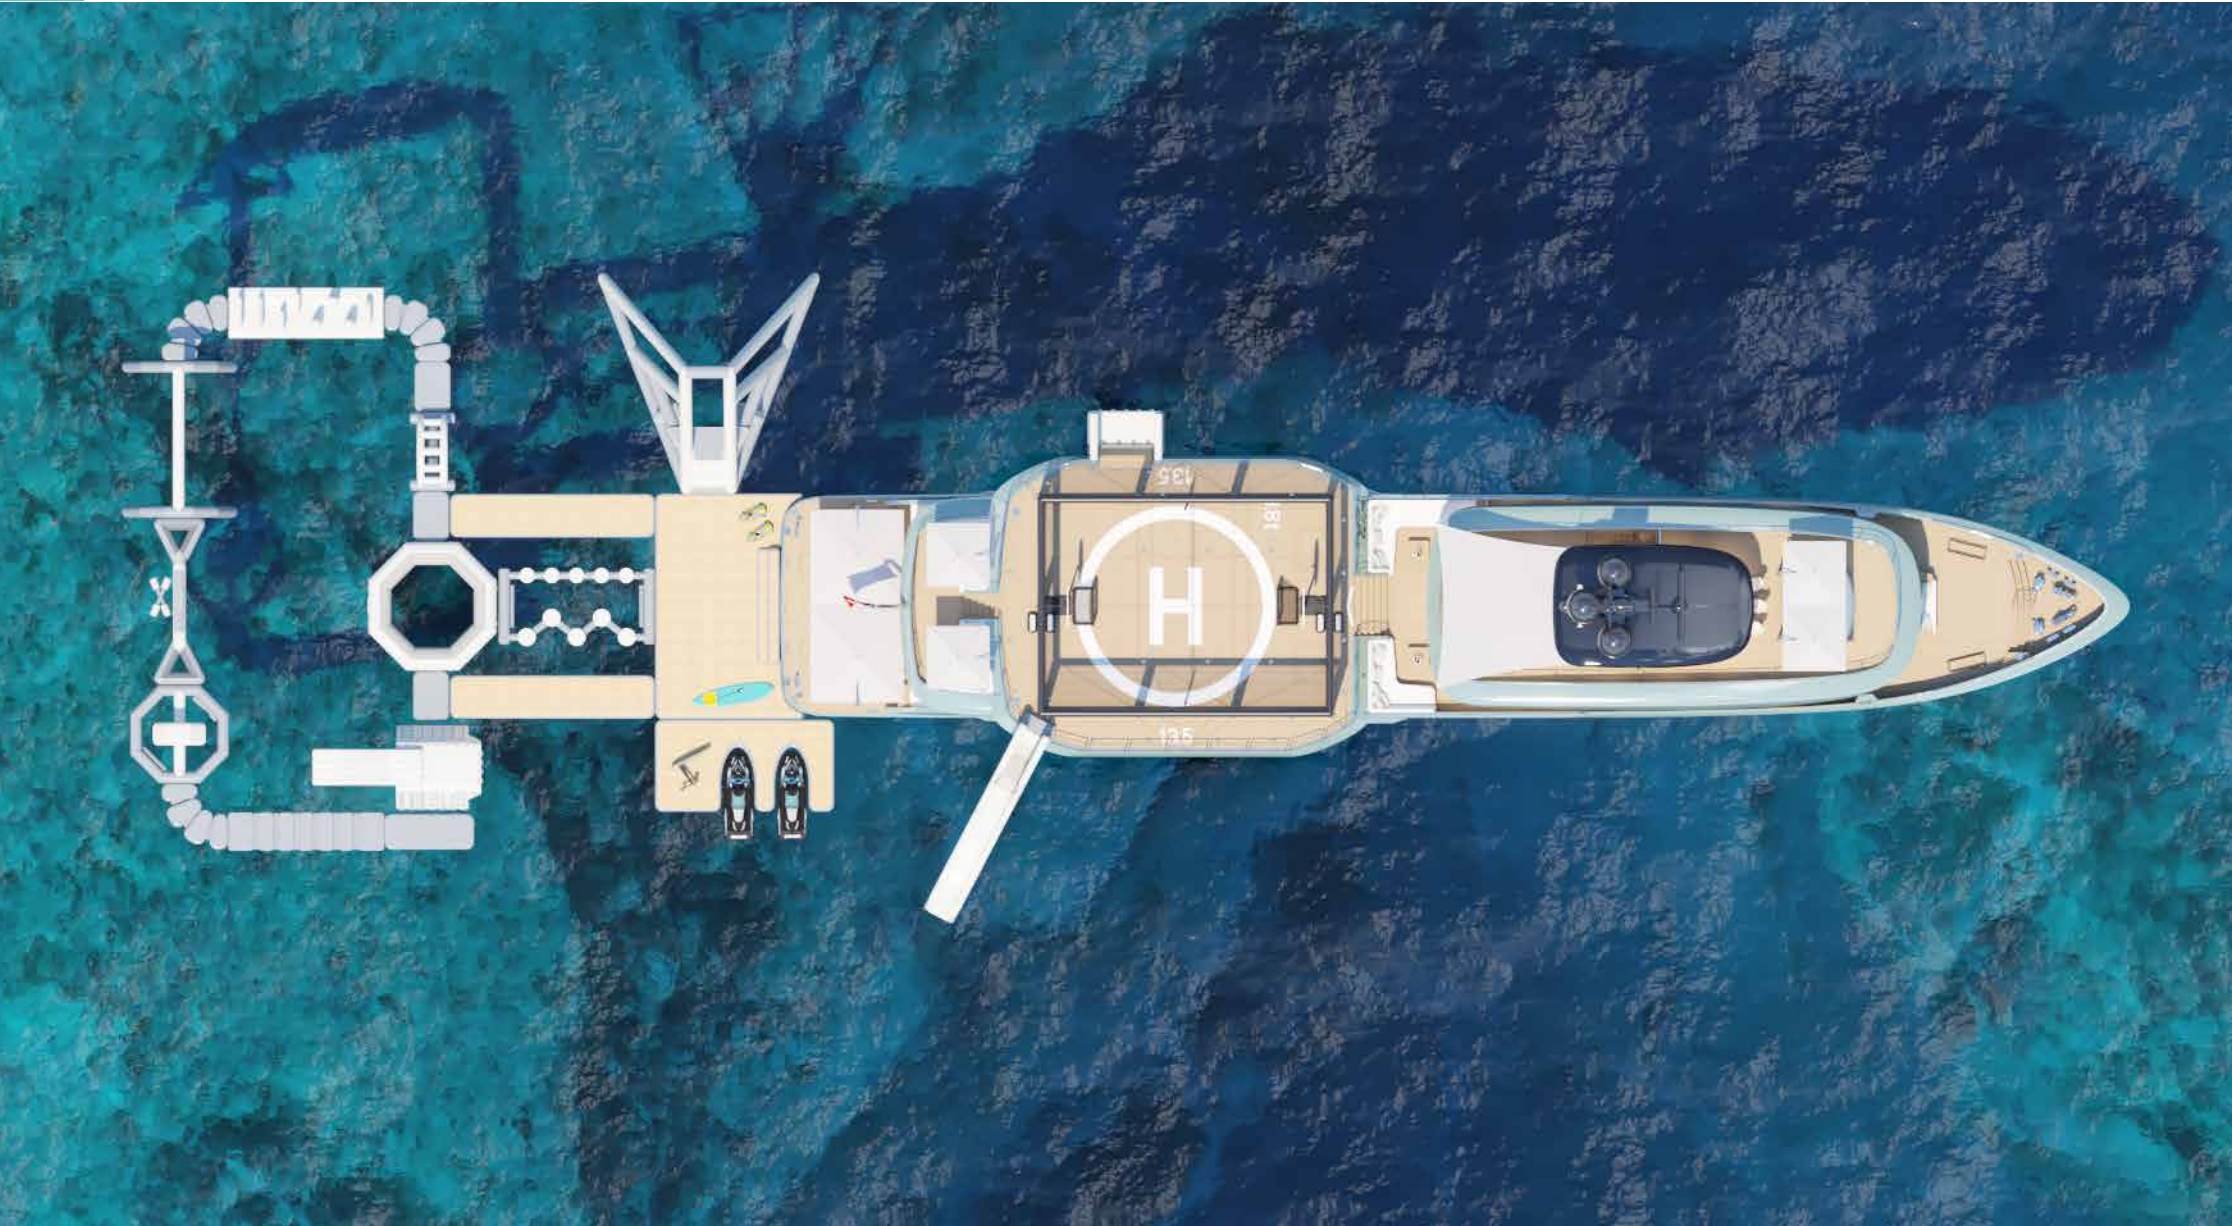

Our custom-designed slides can be manufactured to almost any specification and personalised with a yacht's branding and colour scheme.

We also offer stock inflatable slides from 3 to 8 metres in height. With our popular adjustable yacht slides, these are ready and available to be shipped worldwide at short notice.

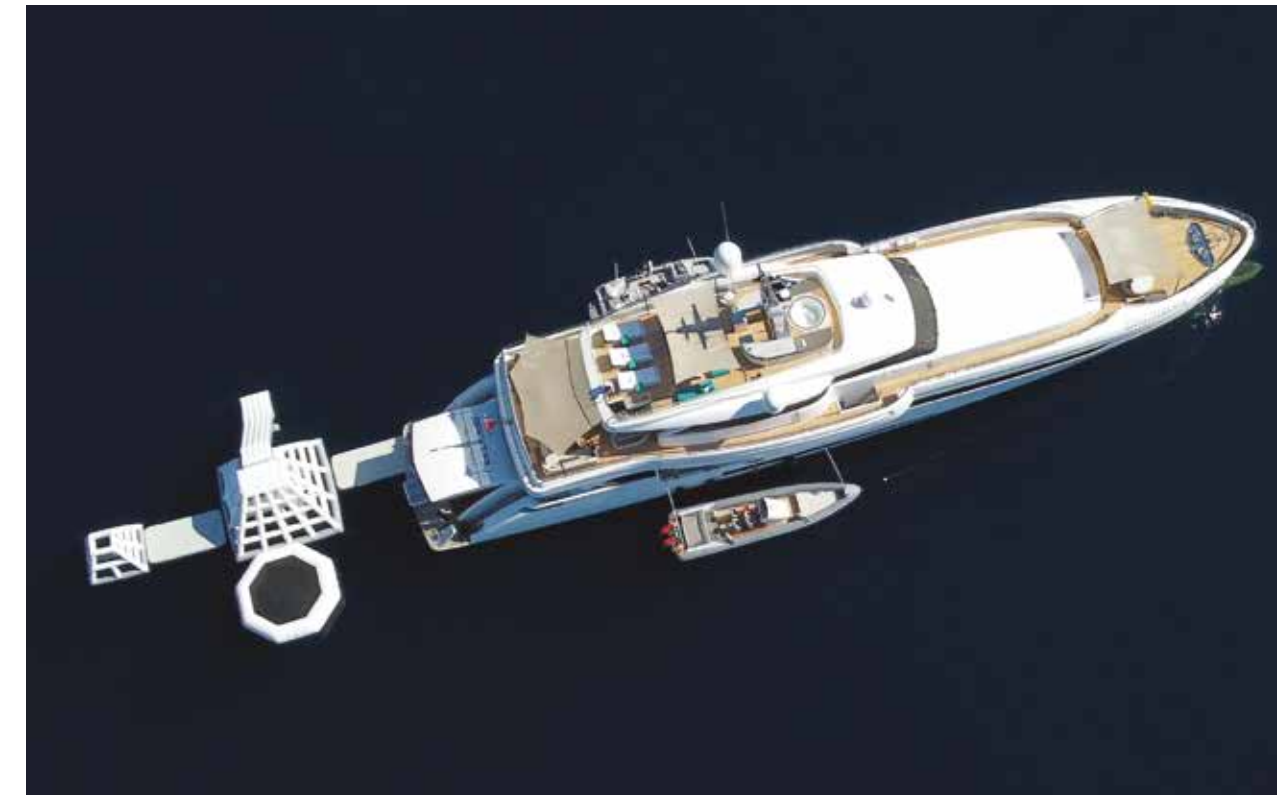

AQUA PARK TOYS

A floating playground to keep children and adults alike amused all day.

If a single slide isn't sufficient to satisfy you and your guests, how about an entire waterborne amusement park tailored exclusively to your preferences?

Our aqua parks are available in a diverse range of dimensions and layouts, encompassing zones designed for swimming, floating, climbing, bouncing and sliding. You have the opportunity to craft your very own obstacle course, designed to provide both a thrilling experience and a water-based workout.

SEA POOL & PLATFORM KEY FEATURES

At Superyacht Inflatables, quality comes as standard. Each element of our sea pools and platforms has been meticulously thought through, with quality, practicality and durability at the forefront of everything we design and produce.

We only use soft loop ties on all our inflatables to prevent paintwork damage and eliminate corrosion. We've also developed a super-safe quick zip system that makes our modular inflatables effortless to set up. The advantages are two-fold, with the system's rigidity substantially increasing safety. What's more, our non-slip removable covers can be printed in any design.

Discreet handles

Covered valves

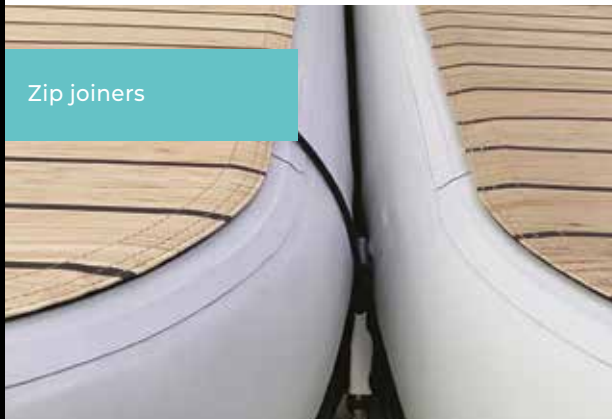

Soft connection loops

Custom printed non-slip teak top surface

Zip joiners

Option for grey non-slip top surface

BRANDING

Designing and building a superyacht is a wholly personalised process, so it is essential that the appearance of your inflatable platforms, sea pools and toys reflect this detail.

We take great pride in offering extensive choices for customising our products to harmonise flawlessly with a mothership's brand image. Whether it's aligning with your current deck or incorporating logos, we're dedicated to ensuring our inflatables not only stand out on their own but also blend seamlessly with the yacht as if they've always been part of the team.
