THETFORD *Marine*

NEW 48 VOLTS TECMA TOILET BUILT FOR THE FUTURE

The marine industry is evolving rapidly, driven by the demand for greater efficiency, sustainability, and user comfort.

The **new TECMA 48V marine toilet** represents a significant leap forward, offering:

- Enhanced performance
- Reduced installation complexity
- Seamless integration with modern electrical systems

This innovation addresses long-standing challenges of traditional 12V or 24V systems, setting a new standard for onboard sanitation solutions.

By adopting **48V technology**, TECMA marine toilet not only delivers superior efficiency and reliability but also contributes to a greener, smarter boating experience. It exemplifies the future of marine innovation—where advanced electrical design meets environmental responsibility and user convenience.

BENEFITS OF 48 VOLTS SYSTEMS

- ✓ Reduced Cable Size and Weight
- ✓ Greater Inversion Efficiency (DC to AC)
- ✓ Optimized Battery Performance
- ✓ Higher Charging Efficiency
- ✓ Superior Support for High-Demand Equipment
- ✓ Overall Weight Savings
- ✓ Enhanced Performance
- ✓ Sustainability and Reduced Environmental Impact

48v systems are not just a technical upgrade, they're a leap forward in

EFFICIENCY
SUSTAINABILITY
