

Quick Reef Solution

Rutgerson's new innovation QRS (Quick Reef solution) is the perfect solution for smooth reefing and a unique solution on the market. The ring could be described as a low friction ring, but made of two parts that are fastened together through the Super Ring and sailcloth, which centralises the weight on the sail. Therefore, the installation is very quick and easy, no webbing is required. Another benefit with this solution is that the boatowner can choose to have the reef line on starboard and/or port side of the sail and it's also possible to change sides.

The installed quick ring gives the reefing line a larger radius through the reefing point and the unique hard-coat and Teflon-impregnated anodization provides even better low friction properties. The QRS exists for three Super Ring sizes: SR25, SR35 and SR45.

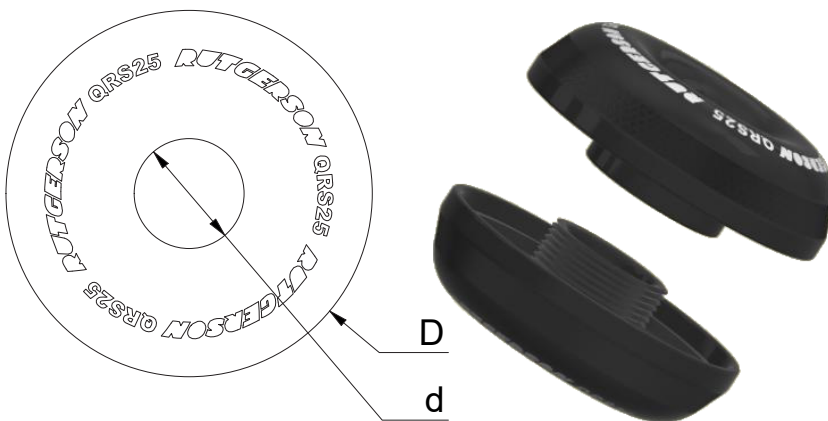

Like all other products from Rutgerson these QRS are designed and produced in Marstrand, Sweden.

The assortment is available for delivery 1 January 2021.

Part No	Product description	Use with Super Ring	D Outer diameter [mm]	d Hole diameter [mm]	Max load [kg]*	Thickness of sail reinforcement		Weight [g]
						Min [mm]	Max [mm]	
Quick Reef Solution								
QRS25	Quick Reef Solution 25	SR25	50	15	1590	1	6	54
QRS35	Quick Reef Solution 35	SR35	65	23	2045	1,5	7,5	121
QRS45	Quick Reef Solution 45	SR45	80	30	2500	2	8	201

* Max load is depending on sail cloth reinforcement strength

Core benefits

- Unequalled easy reefing
- Centralised weight on the sail
- No more moving parts
- Low friction
- Modern design
- Made in Sweden
