

A new standard for marine energy storage

SAFE • RELIABLE • SUSTAINABLE

PROVEN SAFETY

Tested beyond
industry standards.

6x
Overcharge test

8 mm
Puncture test

No Propagation *
DNV Design Test
Option 1

10,000+
Cycles

INTELLIGENT DESIGN

Maximum safety.
Minimum complexity.

**Any fire
fully contained**
within the module

**No module
gas ducting**
required

**Reduced
installation**
complexity

Simplified
system design

SCALABLE

For every
marine application.

15
Modules
per String

50
Parallel Strings
per MPC

51.2 V
Modular
Platform

12.5 MWh
per MPC
Scalable in parallel

LOWER TOTAL COST

Greater lifetime value.

**40% Cost Advantage
Over Battery Lifetime**
10,000+ cycles vs. 6,000 cycles
*Excluding installation costs

Advanced safety
With solid-state
technology

* Propagation only possible when
punctured with a glowing 8mm rod
