The ultimate solution for automated
and unattended parking

MAKE YOUR BUSINESS PROFITABLE

WITH THE ONLY COMPREHENSIVE SOLUTION FOR PARKING FACILITIES

At i+D3 we are transforming the way parking facilities are managed. We are leaders in innovation, development, and installation of parking solutions, access control, and mobility.

With over 20 years of experience, we design and manufacture both hardware and software, and we are the only company capable of delivering a truly end-to-end service: from complete parking equipment, specialized support and maintenance, and direct assistance to drivers, to online marketing services to attract more customers.

Everything is centralized in a single system that allows you to stop worrying and make your business more profitable, efficient, and secure.

One platform. One solution.
Full control of your business.

INNOVATION

We are not only looking to attract clients or income, but to grow with you. We innovate in systems and products, always staying at the forefront of technology to make your daily life easier and your service better.

FLEXIBILITY

Each client is unique, and that's how we approach every project. We don't offer closed solutions: we adapt our teams and services to design the best solution for your needs and achieve the best possible outcome.

ATTENTION AND CARE

There's no better sales agent than a satisfied customer. That's why, more than just selling, we focus on supporting you: we take care of every detail of our after-sales service because your success is ours too.

SYSTEM COMPONENTS

ADVANCE BOOKINGS

Fill your car park effortlessly and multiply your income. Expand into new markets and allow customers to book their parking space through your own website, app, or via external operators.

EQUIPMENT

We adapt all the necessary equipment for the optimal operation of your facilities, whether using traditional methods or ticketless systems: barriers, license plate recognition cameras, pedestrian access points...

SOFTWARE

Our system includes all the software to optimize your management, both the software of the i+D3 equipment itself and the management and control programs that allow you to comprehensively oversee your business.

PAYMENT METHODS

Use your mobile phone as a payment terminal through pagaelparking.com, or use traditional devices so customers can pay conveniently and easily with their credit card, Bizum, Apple Pay, Google Pay, or PayPal.

MANAGEMENT DASHBOARD

Forget the chaos of multiple tools and complex software. Centralize all your car parks and manage your entire business from a single platform: customers, bookings, access, performance...

OPTIMIZATION

Make parking easier and encourage customers to choose your car park. Offer new complementary services such as electric vehicle charging or a guidance system, all fully integrated into a single system.

SMART AND IMMEDIATE DECISIONS

THANKS TO REAL-TIME INFORMATION

It doesn't matter how many car parks you manage or which equipment you have installed. Control, optimize, and maximize the profitability of your entire business from a single place: access points, customers, payments, bookings, and much more.

100 % MODULAR

Your car parks. Your cloud.
You decide which services
you want.

ANYWHERE

Access your data from any
device.

MONITOR EVERYTHING

Save time. Everything that
happens is recorded.

MULTIPLY YOUR SALES

Increase your visibility, reach thousands of new customers, and make the most of your empty spaces.

- ✔ Booking by day, passes, cards...
- ✔ Parking payment in advance.

ACCESS CONTROL

Your customers, ticket clients and subscribers can easily access through multiple entry methods.

- ✔ Access with traditional methods.
- ✔ 100% digital access methods.

UNIQUE AFTER-SALES SERVICE

No worries! We handle everything so you don't have to spend any time or effort.

- ✔ Support and maintenance services.
- ✔ Call center with direct customer assistance.
