GROUPE SEFMAT

RIPACKSUPPLIES®

A BRAND OF GROUPE SEFMAT

The ability to develop innovative and secure products has allowed SEFMAT to create different brands in different sectors. The RIPACK® brand specialized in packaging, RIPACK SUPPLIES® in the protection of bulky industrial goods and finally, RIPAGREEN® for thermal weeding.

What all these brands have in common is a worldwide unique system, allowing the production of hot air over a large width with unequalled safety levels.

By investing more and more in research and development, SEFMAT is able to provide its customers with innovative and high quality products, which is why we have teamed up with one of Europe's leading shrinkwrap manufacturers for RIPACK SUPPLIES®.

PRESENT IN MORE THAN
100 COUNTRIES
WORLDWIDE
