

Polymer Preparation System DULCODOS ULFb

Optimized polymer preparation with new tank design.

Special app to display the preparation volume and functional levels

Measurement by Dulcolevel radar sensor

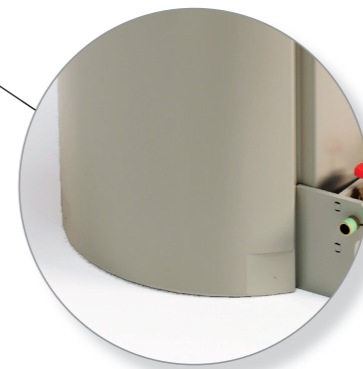

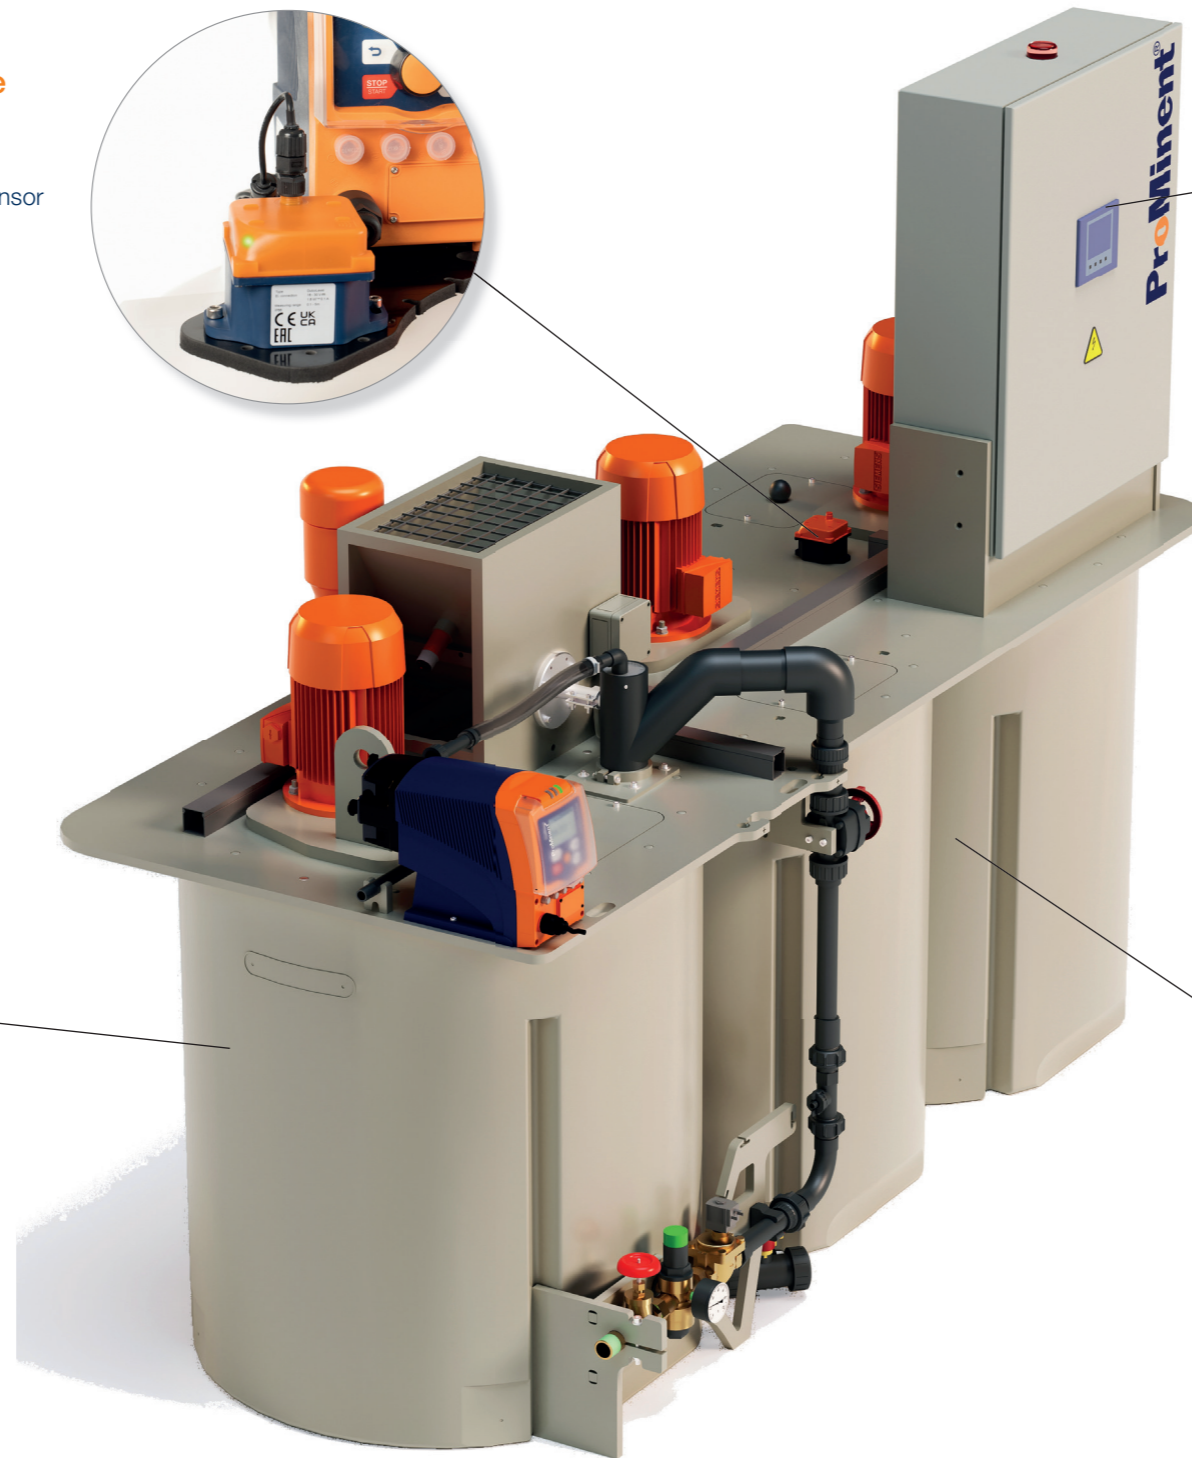

Operation panel

Intuitive operation and process visualisation via HMI, data communication

For powder and liquid polymers

Cationic and anionic types
Maturation time 45 or 60 min

Innovative round tank design

for 3-chamber systems 500 to 2000 l/h
and emptying of 97% of the tank volume

Rectangular tank design for 4000-10000 l/h
