# Päijän.
# All good.

PÄIJÄN

# A bringer of balance.

You’re sailing on a lake. Or at sea. You break the water’s surface with your lure. You listen to nature. Capture the moment with your camera. Capture yourself in a perfect moment.

Wherever your mind desires to go, it’s good right here. In your own rowing boat.

Päijän stands for a calm way of life. A balance between people and northern nature. That’s why water enthusiasts have trusted us for nearly a century. Founded in 1969, our roots reach back decades further in boat-building tradition.

Stability, safety, and durability. That’s what our rowing boats are all about. Always. Päijän’s classic design is shaped by skills passed down through generations, created slowly, with care and patience.

And why rush, when things are already good. In a world where everything is ready.

PÄIJÄN ROWING BOAT:
UNSINKABLE, STABLE & SAFE

PAIJANBOATS.COM

## Your last rowing boat.
## And your child's.
## And your grandchild's.

Päijän boats are designed and built in Finland, the land of a thousand lakes. That's why they last even over 50 years. Our boats have been made to meet the highest requirements. Down to the last detail.

**Stable, safe and easy to handle:**
Excellent rowing and driving performance becomes even more apparent in strong winds.

**Unsinkable:**
Thanks to the closed-cell polyurethane filling, the boat floats even if the outer shell breaks or boat fills with water.

**A durable structure:**
A patented double-shell structure with a resin-cast bottom ensures stiffness and prevents water from entering the boat in case of damage.

**Modular:**
With the widest range of accessories on the market, you can customize your boat to suit your needs.

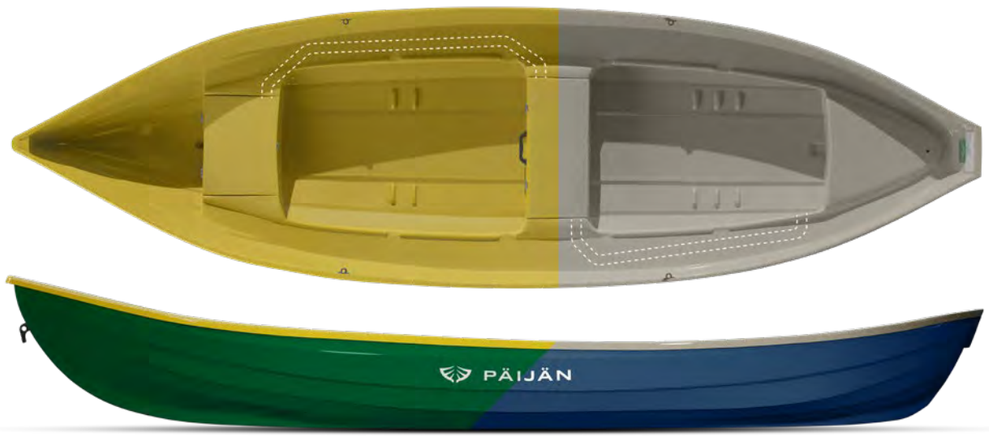

**Ready for an electric outboard motor:**
Cable ducts inside the boat's hull and storage space that suits for the battery is standard in the L-models.

**Ease of maintenance:**
One annual cleaning with mild detergent and a soft brush is all it takes.

**CE mark:**
Meets the requirements of EU directives in structural safety, installation, stability and spare parts.

# Here comes Päijän. Good.

DESIGN FROM FINLAND

Päijän 471L

Päijän 520L

## Päijän 471 / 471L

**PINE GREEN / SYVÄNNE BLUE**

Päijän's 471 model has been on water since the very beginning of our history. The classic boat sparks admiration from one generation to the next.

The Päijän 471L has storage compartments inside the front and middle seats, and the storage compartments include an in-body duct for electric motor wiring from the bow to the stern.

# Accessories.

## Build a boat that looks like you.

Browse all accessories in our online store:
**PAIJANBOATS.COM**

**SEAT CUSHIONS**
Removable and weather-resistant seat cushions make even the longest boat trips more comfortable. They also provide insulation against the cold on chilly evenings.

**RAILING SYSTEM**
The railings of the Päijän boat complete its look. The bow, middle, and stern rails allow for easy attachment of accessories, such as an anchor rope, directly to the railing.

**HARBOUR COVER**
Keep your boat clean and always ready for departure. The durable, fully waterproof, and easy-to-install dock cover with aluminum arches protects your boat from dirt while on the shore. Available for all our boat models.

**CRASH BAR**
Extend the lifespan of your boat and reduce maintenance with crash bar. This easy-to-install bar protects the bow of the boat from impacts during beaching, as well as from other collisions the bow might face on the water.

**BOW MOTOR / TROLLING MOTOR MOUNT**
This mount, compatible with all our models, instantly transforms your boat into a full-fledged fishing vessel. It directly fits Minn Kota motors, and with slight modifications, it can also fit other bow motor models.

**TRIM TAB**
Available as factory- or self-installed, the trim tab improves handling and smoother navigation with more powerful outboard motors. Designed for users seeking better control. Always follow the owner's manual regarding engine limits.

**ROTATING REAR SEAT**
The swivel rear seat enhances ergonomics for active fishermen, making it easier to fish from the boat, especially when using a bow motor.

**SUN DECK**
Relax and enjoy the peace of the lake in a Päijän rowing boat. Modular sun deck, which can be mounted to the bow or stern, instantly turn your rowing boat into a pleasure boat.

**HUNTER'S CAMO NET HOLDER**
Our sturdy boat provides a stable platform, allowing you to hunt while standing. With the new holders, it's quick and easy to install a camo net over the boat.

**NEW 2026: ANGLED / LIVE SONAR MOUNT**
Designed for sonar sensors, these adjustable mounts attaches directly to the railing for optimal positioning. Made from durable stainless steel, it keeps the sensor stable and secure in all fishing conditions.

# Experience the silent revolution in rowing.

Imagine a perfect day for boating. The bow is directed to your favourite place. Every pull is effortless and the sun warms the back of your hands. Nothing could disturb your bliss.

## With Päijän Aerot you are on the way, yet already there.

Rowing is a part of Finland's spiritual landscape. Life in the land of thousands of lakes is reflected in all of us. It's an inherent part of our shared muscle memory.

Päijän Aerot® create a new connection between you and nature. The new Aerot® oars combine the best of traditional oars with advanced design, ergonomics and technology. They are the next generation of oars that turn rowing back into a silent, peaceful, almost meditative experience.

# AEROT®

For as long as there have been boats, there have been oars. Now you can finally experience oars worthy of your boat.

DESIGN FROM FINLAND

## Ergonomic Power

Blister-free, pain-free rowing. Aerot handles feature a soft thermoplastic elastomer grip for lasting comfort, while the Ote model's rotating, angled design follows the natural motion of your hands to reduce strain and maximize control. This improved movement also opens up a stronger, more efficient rowing arc, helping activate larger back muscles for increased power with less effort. Designed for rowers of all ages and skill levels, Aerot delivers an ergonomic experience that brings enjoyment—and better performance—to every outing.

## Compatible by Design

Crafted for lasting performance, Aerot oars introduce a new level of compatibility for all rowing boats. The traditional oarlock features a rubber cushion that softens each stroke, creating a quiet, smooth and natural motion. Interchangeable stainless-steel shafts ensure that one pair of Aerot oars fits virtually any traditional rowing boat.

For inflatable boats, a dedicated oarlock connects directly to their standard mounts—making Aerot a truly universal solution.

## Durable for Nature

Aerot oars are built on a commitment to genuine responsibility: fewer disposable products and more long-lasting gear. Their adjustable, modular design lets one pair adapt to countless boats while enabling a compact package that makes logistics over 50% more efficient. Crafted from durable materials—including 100% recycled aluminium—they're engineered to endure harsh conditions year after year. And if a part eventually wears out, it can be replaced instead of discarded, keeping the whole product in use longer and reducing its overall environmental footprint.

## The Art of Adjustability

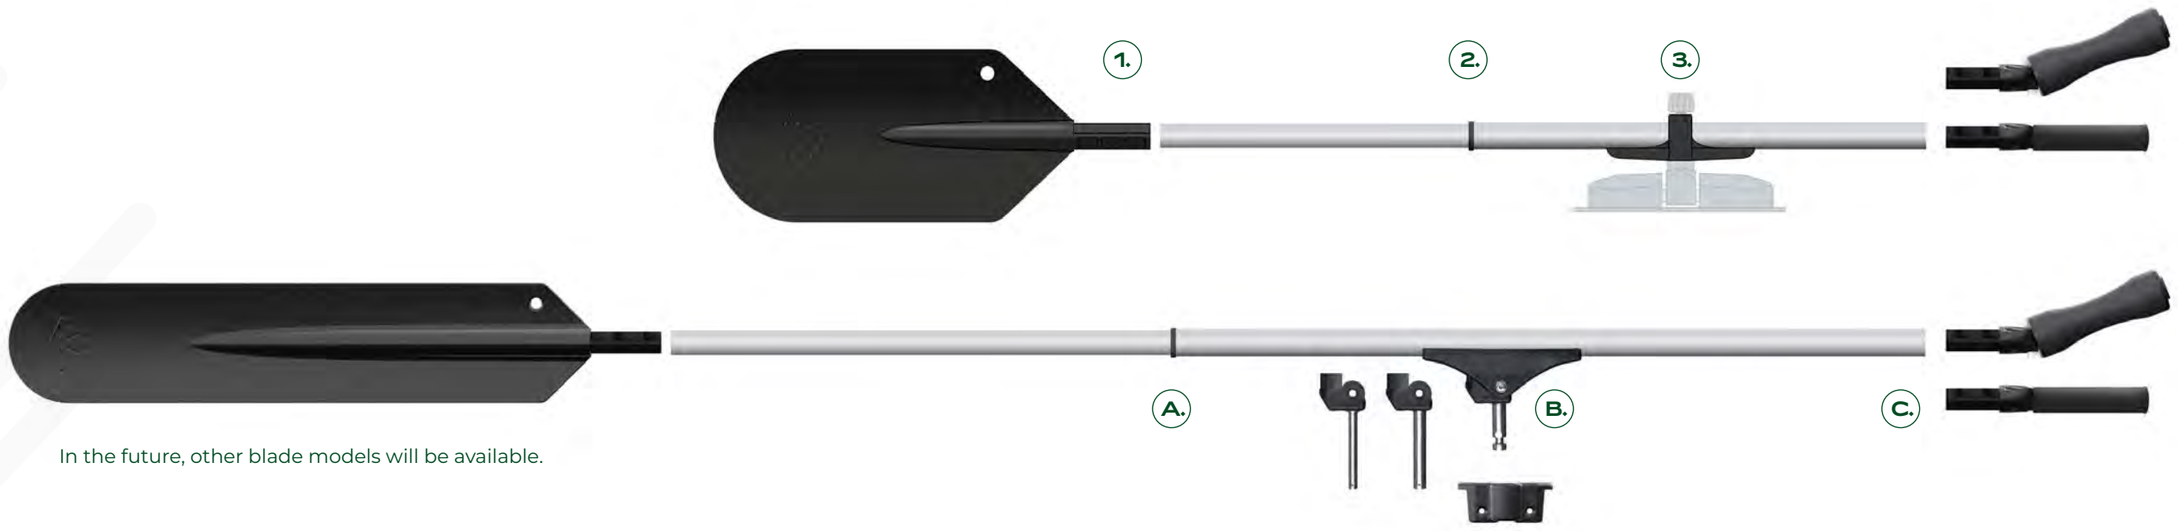

Aerot redefines what adjustable oars can be. The oarlock glides smoothly along the integrated rail at the shaft base, letting you position the pivot point exactly where your stroke feels most natural. At the same time, the telescopic shaft allows quick length adjustments to suit different boats, seats and rowers.

This combination of instant fine-tuning and modular engineering means one pair of Aerot oars can be set up perfectly for virtually any traditional rowing boat.  This innovation brings a new level of precision and control to everyday rowing.

PAIJANBOATS.COM

# Oars. They are now Aerot.

Rooted in Finland's long rowing tradition and refined with modern design, Aerot oars are the perfect blend of technical precision and durability. Every oar is crafted and manufactured in Finland, embodying the timeless quality and innovation that define Finnish design. Built to endure, stroke after stroke.

In the future, other blade models will be available.

## Aerot® For Inflatable Boats ( Coming 2027 )

**1. Special blade for inflatable**

Custom-made curved blade for inflatable boats provides exceptional grip from the water.

**2. The TELESCOPIC aluminium shaft**

Anodised aluminium shaft provides maintenance-free solution for any boat. You can adjust the oar's total length from 130 cm to 160 cm. Easy to store and adjust for maximal performance for any inflatable boat.

**3. THE ADJUSTABLE oarlock for inflatable boats.**

The Aerot inflatable oarlock system fits any inflatable boat, giving you the full functionality of the Aerot setup. Its oarlock position is adjustable along a rail on the shaft base—a feature traditional inflatable oars can't offer.

**Handle options**

- Ote: Angled, rotating handles for enhanced ergonomics
- Tunto: Straight handles for a classic grip

**Standard lengths:**

- **195 –270 cm**
  Ideal for traditional rowing boats.

## Aerot® For Rowing Boats

**A. The TELESCOPIC aluminium shaft**

Anodised aluminium shaft provides maintenance-free solution for any boat. You can adjust the oar's total length from 195 cm to 270 cm. One oar fits all.

**B. The ADJUSTABLE oarlock**

Our innovative, squeak-free oarlock combines a durable stainless-steel shaft with a rubber cushion that smooths each stroke and helps guide blade depth. Its position adjusts steplessly along the rail at the shaft base, letting you fine-tune the feel to your boat and rowing style. With the interchangeable custom oarlock shaft, Aerot supports all major market standards, available as accessories, with multiple sizes available.

**C. The HANDLE options**

Aerot offers two handle options to match different rowing preferences. Tunto provides a straight, classic grip with a soft thermoplastic elastomer surface for steady, blister-free comfort. Ote adds an angled, rotating design that follows your natural wrist movement for improved control and a more powerful, efficient stroke. Thanks to the modular construction, you can easily switch between handles making the system as adaptable as your rowing style.
