

INTOPAQUA

Where Purity Flows

Elegant curved design

Noble and high-end feeling

Safety first: triple leak-proof protection ensures safe use

①

The **First** level of protection

One-piece integrated waterway

The number of internal water inlets has been reduced from nearly 20 to 4.

②

The **Second** level of protection

Water leakage detection board

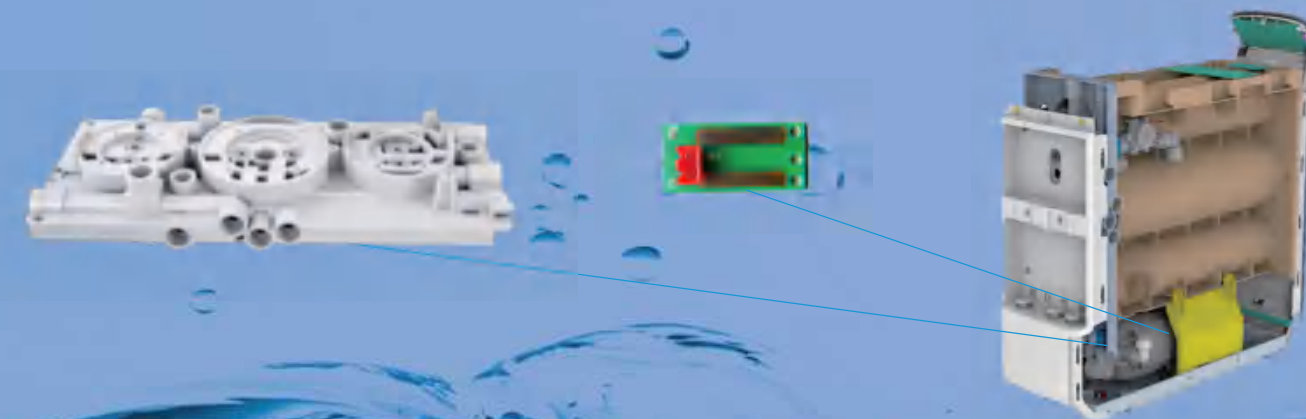

When water leakage or micro-seepage is detected, water is cut off in time

③

The **third** level of protection

IOT & Multiple Sensors

Real-time reminder push notifications on mobile phones, security upgrades

Three conveniences:

easy operation interface, easy filter replacement, and easy handling

The filter life reminder uses a large aperture to intuitively display the filter life and water quality status

Simple interface

Convenient to change filter

**Take out
Put in**

① Rotate the filter element 90 degrees counterclockwise and pull out the filter element.

② Insert the new filter element into the filter element seat and rotate it 90 degrees clockwise to complete the installation.

You can easily hold the device with both hands

Easy to move

AUTO FLUSH

Flushing status:

The outer ring of the screen display rotates clockwise in a marquee shape and returns to its original state after flushing.

Automatic flushing

- Automatically flush for 30 seconds after power on
- Automatically flush for 8 seconds after each water connection (less than 30 minutes)
- Automatically flush for 18 seconds after a single water discharge lasts for more than 30 minutes

Manual flushing

- Press and hold the "Select" button for 3 seconds, the machine will force flush for 60 seconds

Model	TOP-RO-UR
Flow Rate	400-1000G
Color	Can be customized
Appearance	5 options available
Dimension	235*392*373mm
Layer of filters	3
Filter Type	CPF+RO+CTO
Faucet Options	Standard type, light display, digital display
Water Flow	1-2.5L/min
Display	Digital Display
