OUR SIGNALS - YOUR SAFETY

WE PRODUCE IN POLAND

About company

For almost 15 years, our company has specialised in the production and sale of warning lights on the global market. The dynamic development on the market allowed us to become the one of the most influential leaders in the automotive industry. We are constantly developing and providing the wide range of our product for the increasing number of our customers.

The motto of our company is to provide high quality products and the necessary know-how" to our partners and customers. We do pay attention to the partnership and professional commitment that bring mutual benefits. We support the Polish economy, and propose the highest quality products and favorable prices.

We have our own research and development laboratory that plays a key role in constant improvement of our products. Our research facilities and qualified employees help us to provide high quality services. Since we pay special attention to innovation our products are fully self-developed. The entire production cycle, from the idea through design and testing to the final product, takes place in our plant with the usage of our own equipment and employees' skills.

We are glad that our products ensure the safe work of an increasing number of users.
