ENJOY LISTENING TO THE OCEAN BREEZE

2001

SFA won the American's Cup Jubilee race in Cowes (Isle of Wight) in 2001 as well as the World Championship.

The noise level of our toilets has been optimized in real conditions by our Research and Development Department on the Sovereign monohull.

INNOVATION
2024

BY SFA GROUP
WORLD LEADER
IN SANITARY EQUIPMENT

Living on a boat means choosing the freedom offered by the sea. Freeing yourself from the constraints of paths, roads and schedules.

Living on a boat is about evolving in a warm environment, shared by sailors and guests.

Like any freedom, this community life requires respecting others in all its forms. This includes reducing night noise nuisances in spaces that are often poorly soundproofed.

That's why SFA, the inventor of macerating toilets, is pleased to provide an essential improvement for sailors by offering a new range of toilets which are designed to be quiet.

NEW RANGE
OF **QUIET** MARINE TOILETS

MADE IN
FRANCE

The SFA range of electric marine toilets has been developed with the main objective to ensure the user's comfort at sea, as at home.

REDUCED HEIGHT
TOILETS

To be installed on a raised step or as a replacement for a hand-pump toilet

INSTALLING
THE **SFA** MARINE TOILET

Beyond its **acoustic qualities**, SFA marine toilets remain the reference in terms of performance at all levels (reliability, comfort, energy consumption, etc.), relying on the strong expertise of SFA.

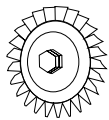

**EASY REPLACEMENT
FOR HAND-PUMP TOILETS**

Provides home comfort on board.

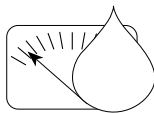

RELIABILITY

Excellent macerating system patented more than 60 years ago for worldwide use.

ECOLOGY

The efficient maceration system facilitates tank emptying and cleaning.

**WATER AND ELECTRICITY
SAVING**

Efficient and economical systems, as water and electrical consumption are minimum.

TECHNICAL
INFORMATION

MADE IN
FRANCE

Eco-friendly pump systems give you flexibility in your installation as the toilet and black water tank can be several meters away.

TECHNICAL FEATURES

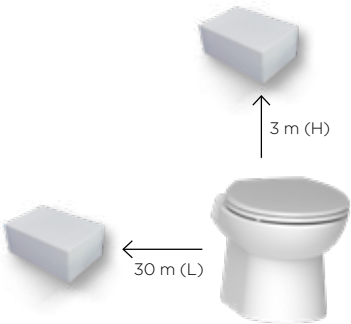

Outlet diameter	38 mm or 25 mm
Supply voltage	12 V or 24 V DC
Motor power	300 W (12 V), 360 W (24 V)
Electricity consumption	0,007 Ah (12 V) and 0,004 Ah (24 V) per second
Water use	Onboard freshwater (integrated solenoid valve) or outside pressurised water

Features SFA
macerating technology

Soft close seat and lead

Discharge parameters

3 CONTROL SYSTEMS

Electric switch Comfort

A flushing position
A maceration - pumping position

Electronic button Premium

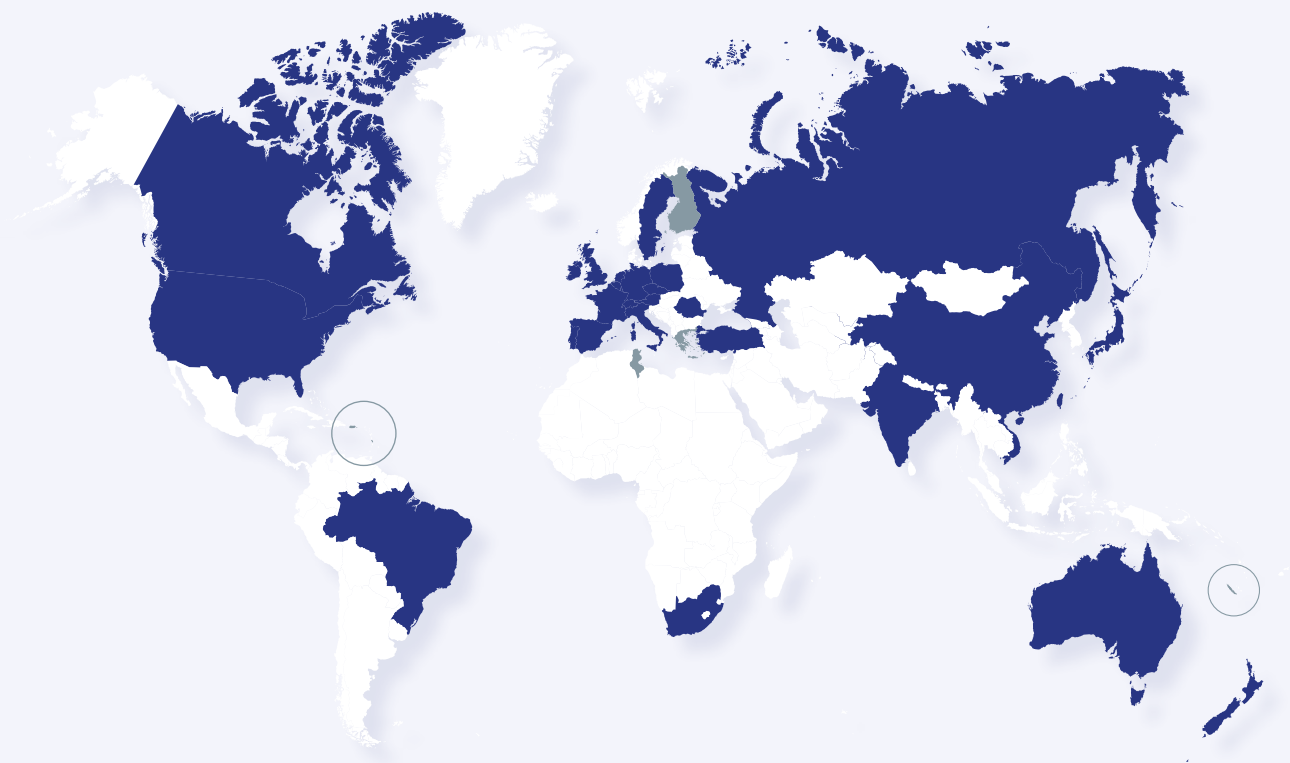

Electronic keyboard Luxe

Two automatic cycles
Dry bowl mode
Tank Full indicator light showing that the black water tank is full
