

# Biometric binder

- TIME CONTROL AND ACCESS -
- *The peace of mind of having everything under control*

# Biometric binder

Especially suitable for controlling the presence of operators in a workplace (offices, schools, factories, etc.). The identification of the operator can be done by means of a **FINGERPRINT FINGER** or **NFC**.

Sending the information online by **Built-in GPRS SIM**

**Easy Installation:**  
Plug and play

Time and attendance control in **real time**

Identificación con **fingerprint** or **NFC card**

**Footprint Discharges** remotely through the APP or from the WEB portal

Visualization of **report in the cloud**

**Sending direct and immediate data** by GPRS, to web and PC

**Detailed report management** by operators and customers

## SIMPLE OPERATION

The biometric clocking machine has a built-in sim that sends the information of all the clockings in real time to the web platform without the need for installation or configuration. It's as simple as plugging in and you're good to go. The same clocking machine connects to the mobile network and autonomously sends information on the presence of each worker

# Biometric binder

## IDENTIFICATION, MANAGEMENT AND CONTROL:

### **ALTA DE OPERARIOS:**

- It is very easy to register the footprints, Users don't need to stop by the office.
- Web management allows you to do it remotely at the clocking machine itself at any time and from anywhere.
- They can also be registered "on site" by linking their fingerprint or NFC cards.

### **ON-LINE MANAGEMENT:**

- Direct and immediate data transfer via GSM and GPRS.
- The activity could be viewed on the web.
- Compatible with any mobile device or operating system.
- Detailed reports, filters by days, operators, companies...
- Export reports in different formats:...
- Corporate customization of reports. PDF, Excel, Word, Text, HTML

## INSTALLATION & OPERATION:

- It is delivered ready to work, just plug it in.
- Easy to install to the wall with 2 screws.
- It doesn't need local Ethernet connection or WIFI.
- It has a built-in SIM card.
- Full transparency even when working in remote locations.
- Just install it in a covered area and you're good to go

## TECHNICAL DETAILS:

- Operators: Up to 1,000 footprint patterns. Unlimited when using cards
- Dimensions: 125 x 125mm. Maximum height: 750mm. Weight: 450 grams with power supply included
- Power supply: 125-220V secondary 5V/3A
- Easy installation: Wall or table. Connect to mains and you're good to go
- High quality 508 dpi CAPACITIVE biometric sensor. Identification in less than 300mS. ISO14443A Card Reader (NFC)
- Connectivity via GPRS mobile phone network. SIM included out of the box. Roaming in all European countries. Enquire for other countries
- OPTIONAL Connectivity: WiFi Module or Embeddable Ethernet Module exit OPT Contact
- Relay for Door Opening Capacitive Keyboard
- OPTION for inserting special registers
- OPTION of installation in vehicles, with GPS to georeference time records

## AFTER-SALES SERVICE:

- A team of professionals will answer any questions you may have.
- You can contact technical support by phone and e-mail.

## TIME TRACKING REPORTS

### Total Time Worked:

Total Hours Worked Per Worker Report

Operative	Time Worked
Juan	31 hours, 34 minutes, 52 seconds
Víctor	31 hours, 30 minutes, 15 seconds

### Time control data on the day 01-04-2022/

Specific report for a worker and a given day

#### Juan

Start time	End Time	Duration
09:37:22	14:31:46	4 hours, 54 minutes, 24 seconds
16:01:09	20:00:36	3 hours, 59 minutes, 27 seconds
<b>Total Presence Juan</b>		8 hours, 53 minutes, 51 seconds

#### Víctor

Start time	End Time	Duration
11:07:52	14:31:34	3 hours, 23 minutes, 42 seconds
15:57:22	17:53:04	1 hour, 55 minutes, 42 seconds
<b>Total Presence Juan</b>		5 hours, 19 minutes, 24 seconds
