

SPARKOZ

Autonomous Cleaning Robots

The Future of Cleaning, at Your Service

Company Profile

The logo for SPARKOZ is displayed in a dark blue rectangular box. The word "SPARKOZ" is written in a bold, sans-serif font. The letter "A" is highlighted in a light blue color, while the other letters are white.

SPARKOZ was founded in 2020, SPARKOZ is an innovative high-tech enterprise focusing on the field of autonomous cleaning & service robot.

SPARKOZ was established in 2020 as an innovative high-tech enterprise specializing in autonomous cleaning and service robots. The company is deeply engaged in commercial cleaning robots and houses an internationally leading algorithm and industrialization team. Through self-developed positioning algorithms, innovative hardware designs, and cloud-based digital management, SPARKOZ aims to establish core competitiveness in the industry.

Mission

Enable Better
Public Service with
Robots

Vision

Driving Organizational
Efficiency through
Innovative Robotics

Global Layout

Currently, SPARKOZ has major regional operations in North America, Asia, and Europe, with headquarters in California, USA, and the service and support center in Texas, USA. Additionally, our engineering and manufacturing operations are based in Shanghai, China.

We provide

1

Professional
Grade
Cleaning Systems

2

Exclusive
360° Vision
Navigation Software

3

Free OTA
Updates and Support,
Longer Warranties

Differentiating Features

The World's Most Intelligent Cleaning Robot

The TN70 combines advanced AI, real-time decision-making, and industry-leading sensors to optimize cleaning efficiency, accuracy, and safety.

Professional-Grade Commercial Floor Cleaning

Built for high-traffic environments, the TN70 delivers powerful scrubbing, suction, and filtration for deep cleaning with minimal labor.

Exclusive "Never-Lost" 360° Autonomous Software

Our AI-driven navigation ensures precise mapping, real-time obstacle avoidance, and optimized routes for uninterrupted cleaning.

Free OTA Reports, Service, and Longer Warranties

Get free software updates, real-time performance reports, and industry-leading service plans with extended warranties for maximum reliability.

Product Introduction

Disc Brush Version

Cylindrical Brush Version

TN70-Pro

20" Magnetic Brushes

Dual Cylindrical Brushes

Docking Station Options

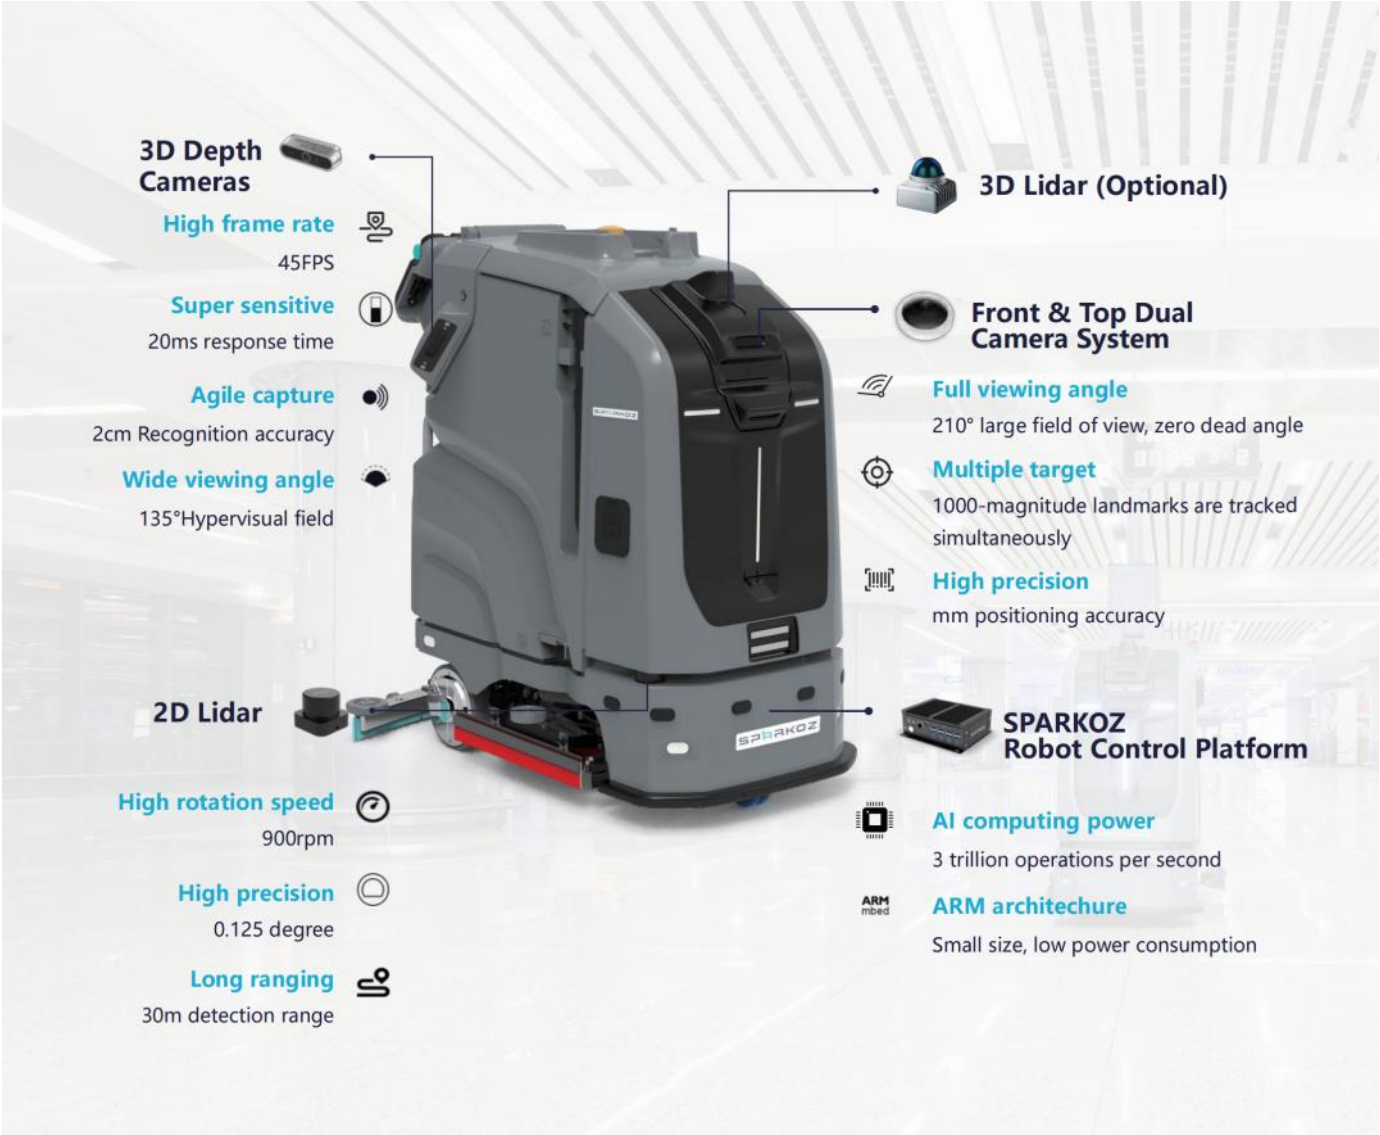

Charger

Charging Dock

Workstation

3D Depth Cameras

High frame rate
45FPS

Super sensitive
20ms response time

Agile capture
2cm Recognition accuracy

Wide viewing angle
135°Hypersvisual field

3D Lidar (Optional)

Front & Top Dual Camera System

Full viewing angle
210° large field of view, zero dead angle

Multiple target
1000-magnitude landmarks are tracked simultaneously

High precision
mm positioning accuracy

2D Lidar

High rotation speed
900rpm

High precision
0.125 degree

Long ranging
30m detection range

SPARKOZ Robot Control Platform

AI computing power
3 trillion operations per second

ARM architechure
Small size, low power consumption

Cleaning Scenarios

Product Introduction

TN10-Pro

Versatile Cleaning System

Sweeps, scrubs and vacuums different floor types with powerful suction.

Slim Body Flexibility

Cutting-edge AI navigation for precise cleaning in small and complex environments.

Optimized Cost

Compact, light, and affordable powerful commercial cleaning at an affordable cost.

Docking Station Options

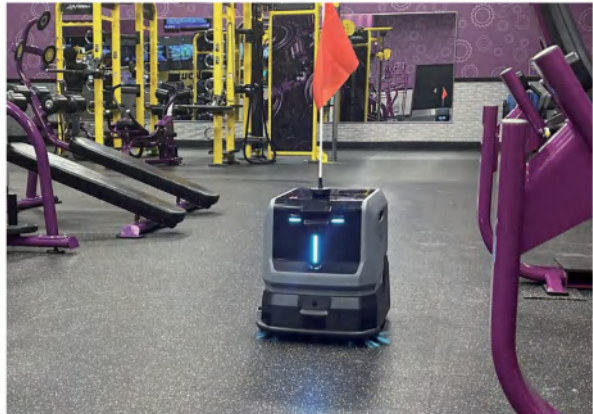

Charging Dock

Workstation

Cleaning Scenarios

If you combine **TN10** with **TN70**

You will receive

Full Scenarios Coverage

Better Cleaning Effect

More Favorable Price

Autonomous Professional Cleaning Robots
