Do you prefer **Pollock** or...

Thanks to the signature **record lightness** distinguishing Exit Carbon pre-preg carbon fiber products, our **self-levelling boarding ladders** were designed as the **most spacious in the world**, reaching 65 cm real width that guarantees **effortless access** for crew members, passengers and their pets.

The optional carbon fiber handrails are positioned on external supports, leaving the **steps surface completely free to walk on**.

Pollock is the model, **with a fixed top platform** connecting with low profile brackets to the ship side and a bottom platform equipped with castoring wheels, to allow ship movements.

TECHNICAL DATA

LENGTH	<i>4 to 14 steps - 1.2 meters to 4.3 meters</i>
WALKING WIDTH	<i>45 cm, 55 cm, 65 cm</i>
HEIGHT DECK TO DOCK	<i>0 to 3.5 meters</i>
OVERALL WIDTH	<i>59 cm, 69 cm, 79 cm</i>
WEIGHT (including the top platform)	<i>16 kg to 47 kg</i>
HANDRAILS	<i>Optional, carbon fiber with quick release</i>
OVERALL WIDTH WITH 1 HANDRAIL	<i>64 cm, 74 cm, 84 cm</i>
OVERALL WIDTH WITH 2 HANDRAILS	<i>69 cm, 79 cm, 89 cm</i>

... or **Turner**?

Turner is equipped with a unique rotating platform, with its **whopping 85 cm diameter** and the capability to be **installed even in presence of a large bumper below the entrance**.

Turntable and ladder can be installed separately for an **easy deployment by two people**.

Since Turner is free to rotate around its top platform, after comparative tests with our customers, we equipped it with **non-castering wheels for increased stability and comfort**

TECHNICAL DATA

LENGTH	4 to 14 steps - 1.2 meters to 4.3 meters
WALKING WIDTH	45 cm, 55 cm, 65 cm
HEIGHT DECK TO DOCK	0 to 3.5 meters
OVERALL WIDTH	59 cm, 69 cm, 79 cm
WEIGHT OF ROTATING PLATFORM	22 kg
WEIGHT OF LADDER	11 kg to 42 kg
HANDRAILS	Optional, carbon fiber with quick release
OVERALL WIDTH WITH 1 HANDRAIL	64 cm, 74 cm, 84 cm
OVERALL WIDTH WITH 2 HANDRAILS	69 cm, 79 cm, 89 cm

BOARDING LADDERS

Self-levelling boarding ladders

In any custom color, or real teak finishing

Of course, both Pollock and Turner follow automatically the varying height of the ship relative to the pier, maintaining the steps parallel to the top platform.

They can be used from an angle of roughly 60° up to horizontal, where they become a flat gangway.

BOARDING LADDERS

Effortless access

Huge 65 cm wide walking surface

Exit Carbon's Boarding Ladders reach 65 cm real width that guarantees **effortless access** for crew members and passengers alike.

The optional carbon fiber handrails are positioned on external supports, leaving the **steps surface completely free to walk on**.

65 cm wide steps, in grey non-slip surface

The handrails on both sides are designed to leave the surface free to walk on

Simple to Install, Comfortable for everyone

High tech, easy to handle

For Pollock, just insert the T fittings into the hull brackets and move the ladder 5 mm to the right to prevent it from sliding out. Then insert the safety locks before using it.

On first installation, adjust the length of the bracing struts turning the threaded pin, until the top platform is horizontal.

The optional handrails are added last, with quick release pins.

The fixed top platform, Pollock Boarding Ladder

For Turner, the turntable is installed first, with its detachable supporting strut, using the same fittings and method as the Pollock fixed platform ladder. Then the ladder is attached to it with slotting carbon tubes and a couple of embedded screws. The optional handrails are added last, with quick release pins.

This is a much easier process than installing the whole system in one go, avoiding to handle a very large and articulated piece of equipment.
