MYTEX MEMBRANE UNITS

CUSTOMIZED • MODULAR • SAFEGUARD TECHNOLOGY

MYTEX SUBMERGED MEMBRANE UNITS

Maximum Individuality and Customized Designs

MYTEX membrane systems are unique in the market. Be as free as never before in the configuration and structure of your membrane unit. Thanks to the unique configurability of the membrane elements, there will be a cost-effective solution for almost every application.

Advantages

- ✓ High packaging density
- ✓ Highest flexibility in size and operation
- ✓ Capability of replacing all common types
- ✓ Extremely robust due to Safeguard Technology
- ✓ Easy and economical replacement of membranes
- ✓ Ease of Service
- ✓ Low energy cost due to fine bubble aeration
(Of course bubble aeration also possible)

Worldwide Services

We provide global support through our partner network. With our partners around the world, we offer you a comprehensive service network. Whether it's integrating your new units into your existing facility or commissioning a new one, a service engineer will be on-site to assist you in all aspects.

SUSTAINABLE WASTEWATER TREATMENT TECHNOLOGIES

The filtration industry is experiencing increasing demand for solutions to stricter waste water regulations and reuse policies. Methods for waste water recycling and implementing Minimal Liquid Discharge (MLD) to Zero Liquid Discharge (ZLD) are particularly sought after.

WTA UNISOL, as a provider of sustainable wastewater treatment technologies, actively contributes to reducing the environmental impact of industrial and municipal processes. We would be happy to offer you a tailored solution for your process requirements.

Proven MYTEX Membrane Units from 1 m² to 1300 m²

MYTEX membrane units are available in sizes S, M, L, or XL, providing state-of-the-art technology for the highest demands - all Made in Germany.

Size	Membrane Area
XL	1300 - 500 m²
L	650 - 100 m²
S	150 - 20 m²

Individual small scale pilot units are available on request from 1 to 20 m².

Examples: Different sizes of MYTEX H4S membrane units
