
Sentinel Introduces Sentinel GO: A Hardware-Free App Mode Available to Every Boater

Zagreb, July 7th, 2025

Sentinel, a global leader in smart boat monitoring, is proud to announce the launch of **Sentinel GO** — a **new hardware-free mode within the existing Sentinel app that brings the benefits of connected boating to everyone, completely free of charge.**

With more than 25,000 connected vessels and over a decade of experience working with leading boat builders and fleet operators, Sentinel is now offering core elements of its award-winning platform to all boaters, no installation or hardware required. Sentinel GO is the ideal onboard companion for all boaters, making it easier than ever to stay organized, informed, and in control — all from a smartphone. Whether managing checklists, logging trips, or keeping track of maintenance, everything boaters need lives in one seamless app experience.

Key features include:

- Automatic trip logging with route tracking using your phone's GPS
- Maintenance logs to manage servicing and inspections
- Custom checklists
- Secure document storage for registration, manuals, and more

Boaters can get started today by downloading the “Sentinel – Your Boat, Online” app from the App Store or Google Play. Upon registration, users are guided to the Sentinel GO experience.

And when they're ready to go even further—into real-time monitoring, geofencing, and battery health tracking—Sentinel GO makes it easy to upgrade to Sentinel PREMIUM, seamlessly integrating with Sentinel's Boat Monitor hardware.

Marko Pihlar, CEO of Sentinel Marine solutions, said:

“With Sentinel GO, we are delivering a truly free and easy-to-use solution for the global boating community. It's the first step into the connected boating experience that Sentinel has championed for years. We believe that better digital tools help boaters protect their assets and fully enjoy their adventures on the water.”
