ATLAS 190

INTRODUCTION

Introducing the Atlas 190, a brand-new inflatable platform for offshore sailing, cruising, and boating adventures. We've rethought existing bladder designs and created one that provides enhanced turning performance and airway protection in the water.

These offshore life jackets improve all-day comfort, especially in the neck and shoulders, while being one of the highest performing vests when inflated. Our ADAPT Technology (ADvanced Airway Protection and Turning) has three main features; bladder lobes shaped to effectively turn the wearer face up, baffle barriers near the chin to dissipate incoming waves to the face, and an integrated pillow to optimize the angle of the face.

Modular accessories within the line-up allow users to customize their life jackets to their safety needs.

Recipient of the Red Dot Award in 2024 and a special mention at the 2023 DAME Design Awards.

reddot winner 2024

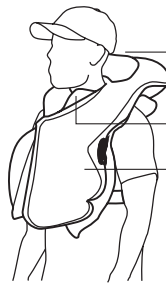

Comfort: Ergonomically shaped to sit off the neck and mesh back panel for breathability

Durability: Abrasion-resistant cover

Safety: Integrated deck safety harness

Performance: Lightweight anodized aluminum hardware

ADAPT BLADDER:

Unique 3D Headrest: Adds additional support in the water

Spray Barrier: Improves airway protection

Bladder Contouring: Provides strong turning performance

PRO SENSOR LIFE JACKET

The Atlas 190 Pro Sensor Life Jacket employs a ground-breaking inflatable platform boasting a re-engineered bladder for exceptional turning performance and airway protection. These life jackets, designed for offshore use, emphasize comfort during prolonged wear and impressive safety when inflated. They utilize ADAPT Technology (ADvanced Airway Protection and Turning), an optimized bladder structure, baffle barriers, and an integrated pillow.

- Ergonomically shaped to sit off the neck and provide all-day comfort
- 190N of buoyancy delivering ultimate in-water performance
- Bladder contouring creates strong turning performance without hindering self-rescue or boarding of rescue crafts
- Lightweight anodized aluminum hardware provides durability and security
- Low-profile tether points attach to safety lines
- Unique 3D headrest provides optimal head support and face plane angle in the water
- Spray barrier improves airway protection
- Compatible with optional sprayhood and lights
- Integrated leg strap is detachable
- Storage for AIS and PLBs

DLX PRO SENSOR LIFE JACKET

The Atlas 190 DLX Pro Sensor Life Jacket utilizes the same revolutionary inflatable platform with redesigned bladder as the Atlas 190 Pro Sensor Life Jacket. This deluxe (DLX) version includes an integrated sprayhood to prevent secondary drowning and a SOLAS approved water activated light for emergency situations.

Additional features of the DLX version include:

- Integrated sprayhood neatly tucks into the back of the vest
- Water-activated light increases on the water visibility
