

Fabrics and Foam for Marine, Sun Protection and Camping

About DTT Fabrics | Silotec GmbH

For over two decades, DTT Fabrics has stood for quality, expertise and reliability in the field of technical textiles.

As part of Silotec GmbH, we combine state-of-the-art technology with craftsmanship and experience, creating textile solutions that set new standards in marine, outdoor and leisure applications.

Our warehouse in Pfaffenhofen offers a wide range of ready-to-ship fabrics and foams, complemented by custom cutting and service solutions.

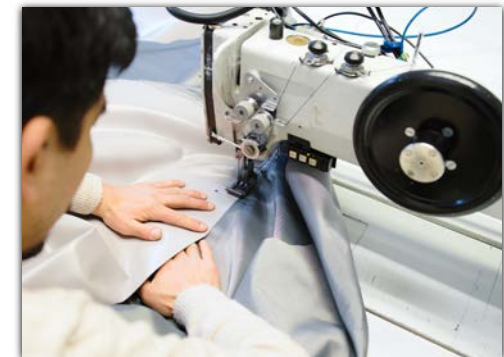

Our strength lies in the combination of technology, experience and flexibility.

We see ourselves not merely as a distributor but as a development partner for our customers.

From the first sample to technical consultation and series production, we actively support projects with efficiency, problem-solving capability and a strong commitment to quality.

A broad stock program of marine and outdoor fabrics, foams and accessories ensures short delivery times.

Thanks to modern production and cutting technology, we create textile components that convince through functionality, durability and design.

Our Philosophy

Quality at DTT Fabrics is the result of experience, precision and a true passion for textiles.

For many years, we have supported our customers with technical expertise, reliability and a deep understanding of materials.

Our focus is always on turning fabric into more than just a material: a solution that works and delivers what it promises.

For us, innovation means rethinking things – in the selection of raw materials, in processing and in service.

We develop alongside our customers, think ahead and act as partners – that is what makes the difference between standard and quality.

“We don’t just deliver materials – we deliver solutions.”

Alexander Heiland, Managing Director DTT Fabrics | Silotec GmbH

Ocean-Top premium & Ocean-Top clear

Two versions – one promise of quality

The materials Ocean-Top premium (PU-coated) and Ocean-Top clear (uncoated) impress with their outstanding properties. Both textiles are completely UV-resistant, durable and guarantee consistently high quality – made in Germany.

Manufactured from solution-dyed polyester, the fabrics are available in two versions:

Ocean-Top premium: with PU coating for maximum waterproofness

Ocean-Top clear: without PU coating, making it particularly soft and flexible

Both variants feature a special FC impregnation that makes the material water- and dirt-repellent.

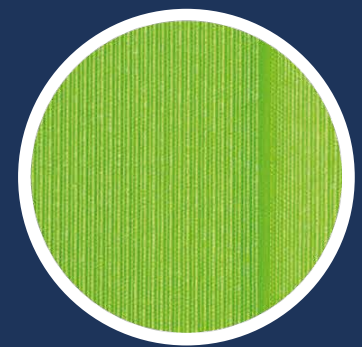

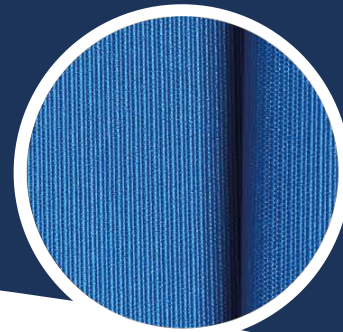

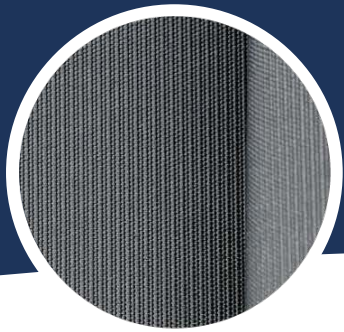

The innovative weave with a finely textured surface further enhances mechanical tear resistance and crease stability.

Their versatility makes Ocean-Top an ideal material for boat covers, canopies, bimini tops, tarpaulins, awnings and all kinds of outdoor applications.

The fabrics impress with their textile look, colour stability and smooth surface, which retains its shape even after years of intensive use.

This makes Ocean-Top the long-lasting solution for high-quality and functional covers in the marine and leisure sector.

Characteristics

- Solution-dyed polyester
- Waterproof due to PU coating (Premium)
- Breathable
- PVC-free
- Weight: 280 g/m² (Premium) | 270 g/m² (Clear)
- Excellent UV resistance
- Excellent lightfastness
- Water- and dirt-repellent due to FC impregnation
- Anti-mould treatment
- No stress whitening
- Extremely durable and dimensionally stable
- Resistant to salt water, chlorine and bird droppings

Pacific-Top premium

Reliable protection on the water and on land.

Pacific-Top premium is a high-quality PU-coated polyester fabric developed specifically for demanding use in marine, outdoor and sun protection applications. It combines maximum functionality with an elegant textile appearance and a pleasantly soft touch.

The dense fabric structure and high-quality PU coating ensure excellent waterproofness, dimensional stability and durability, while the surface remains breathable and easy to clean.

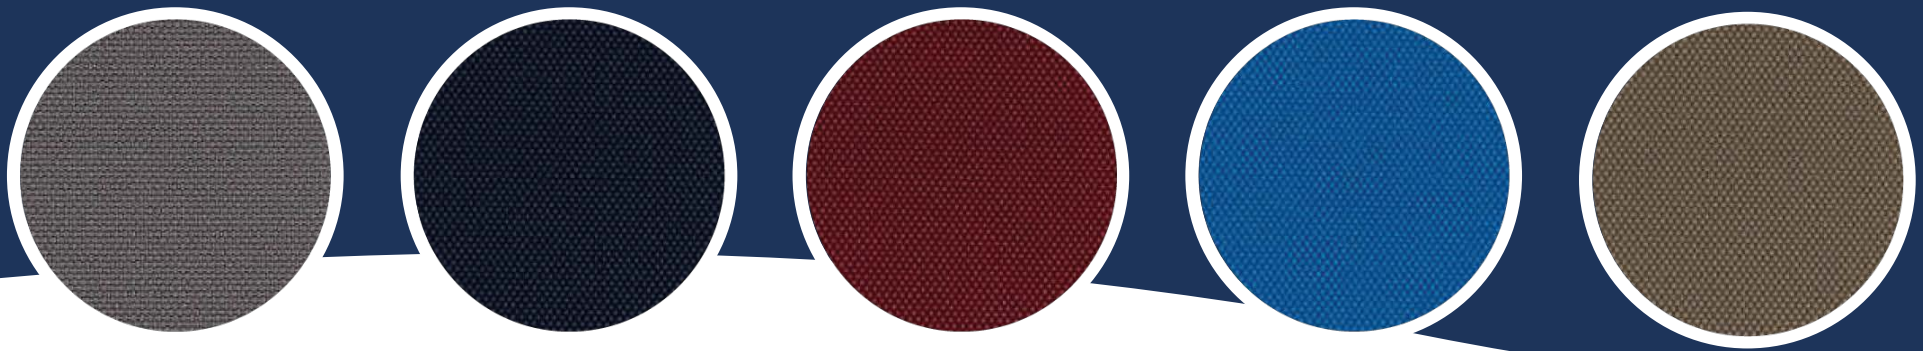

Whether used on yachts, as awning fabric, for sun canopies or protective covers – Pacific-Top premium excels wherever design and technology are in perfect harmony.

Made from solution-dyed polyester, the material guarantees outstanding UV resistance, exceptional colour fastness and long-lasting performance – even under intense sunlight and in marine environments.

The fine surface gives it a modern, refined look and makes it easy to clean.

Pacific-Top premium combines technical expertise with maritime aesthetics – ideal for durable and visually appealing solutions in outdoor applications.

Characteristics

- Solution-dyed polyester
- PU-coated – waterproof and dimensionally stable
- Breathable
- PVC-free
- Excellent UV resistance and colour fastness
- Water- and dirt-repellent due to FC impregnation
- Anti-mould treatment
- No stress whitening
- Pleasant textile touch
- Resistant to salt water and chlorine

SoleaSoft

Luxurious comfort for outdoor living

SoleaSoft has been specially developed for outdoor use and combines functionality with exceptional comfort.

The fabric is ideal for cushions, upholstery and pads on boats, terraces or by the pool – wherever durability and elegance are required.

Made from solution-dyed polyester, SoleaSoft is UV-resistant, weatherproof, breathable and water-repellent.

It remains dimensionally stable even under heavy use, feels soft to the touch and is both robust and easy to care for.

A special finish makes it mould-resistant and ensures long-lasting freshness.

SoleaSoft combines outdoor performance with a soft, pleasant feel – providing maximum seating comfort in any weather.

When combined with the open-cell Eqodry foam, it creates a durable and comfortable cushioning system.

Characteristics

- Solution-dyed polyester
- UV-resistant, weatherproof and breathable
- Water- and dirt-repellent
- Dimensionally stable and abrasion-resistant
- Mould-resistant and easy to care for
- Washable up to 30 °C
- Pleasant soft-touch surface

Eqodry

The perfect outdoor upholstery solution

Eqodry is a specially developed outdoor foam with an open-cell structure that allows water to pass through completely, ensuring exceptionally fast drying. Even after heavy rain, the material remains hygienic, odour-free and dimensionally stable – ideal for use in marine, pool and garden cushions.

Thanks to its unique cell structure, Eqodry is breathable, antibacterial and mould-resistant.

Moisture does not accumulate inside, keeping the foam permanently airy and comfortable.

The material is lightweight, durable and retains its shape even under intensive use or changing weather conditions.

When combined with high-quality upholstery fabrics such as SoleaSoft, it creates a seating system that perfectly combines comfort, functionality and long-term durability – even in demanding outdoor environments.

Characteristics

- 100% open-cell structure
- Water- and air-permeable
- Quick-drying
- Antibacterial and mould-resistant
- Durable and dimensionally stable
- Lightweight and flexible
- Suitable for indoor and outdoor applications
- Ideal for marine, pool and garden cushions

What makes DTT Fabrics stand out

From rolled goods to finished solutions

At DTT Fabrics | Silotec GmbH, our customers receive exactly what they need – no more and no less.

Whether it's rolled goods, precise laser cuts, pre-assembled components or complete textile assemblies, we deliver reliably, efficiently and with individual attention.

Our modern equipment with textile laser technology and CAD-supported design enables exact cutting of fabrics up to 3.20 metres wide, in any shape and length.

This results in millimetre-precise cuts, samples or small series that can be processed directly.

If required, we also take care of sewing and pre-assembly – up to tailor-made covers, upholstery or technical textile components.

Thanks to our experience across many industries – from marine, outdoor, camping and contract to industrial applications – we understand our customers' requirements in detail.

This versatility allows us to realise projects flexibly, whether individual laser cuts, material samples or complete series production.

Our strengths

Material diversity and service from a single source

Large stock of readily available fabrics, foams and sewing threads.

Flexibility for every project

We supply rolled goods, coupon lengths or precise laser cuts – depending on your requirements and stage of production.

Precision and efficiency

CAD-supported design, modern laser technology and the cleanest cutting edges – for perfect fit and short production times.

Manufacturing expertise and craftsmanship

If required, we take care of sewing, punching and assembly – from prototypes to small series.

Reliability and speed

Short response times, structured workflows and on-time order processing – nationally and internationally.

Your partner for marine and outdoor textiles.

Whether rolled goods, precisely cut fabrics or fully finished products – with us, you get everything from a single source.

With a passion for textiles, technical precision and a strong commitment to quality, we support our customers from the initial idea to the finished solution.

Whatever you are planning, DTT Fabrics provides the right material, expertise and service to make it happen.
