INTER BOAT MARINAS

System Olympia

System Olympia has been specially developed by Inter Boat Marinas for (professional) rowing. The system is optimally customised for use by rowers and canoeists and is also very suitable for use as a fishing pier or floating terrace. The pontoon has a special low freeboard of 15 cm, high buoyancy, a rounded side and anti-slip deck material that is friendly to the oars.

Pontoons

System Olympia is available in standard lengths of 10 and 12 meters with widths of 1.93 m, 2.23 m, 2.53 m, 2.85 m and 3.15 m.
Customization is also possible.

The construction of the pontoon is made of seawater-resistant aluminum and polyethylene floats are used. The deck is equipped with Titan deck as standard. Other decking materials such as hardwood or composite are also possible.

Features

- Modern design;
- Sustainable;
- Maintenance free;
- minimal freeboard 15 cm;
- High buoyancy;
- Integrated PVC fender;
- Meets the international standards of the global rowing association World Rowing.

INTER BOAT MARINAS

Rowing pontoon with seats
System Olympia

Within our Olympia system we offer custom-made rowing pontoons complete with seat positions and oar holders, suitable for both sculling and board rowing. There is a choice of a single and double seat. The interior can be removed and the rowing container can be closed completely flat when not in use. This makes the entire surface usable and the rowing pontoon can therefore be optimally used as an arrival and departure point. In addition, the pontoon can be effortlessly linked to any existing system. The freeboard of the rowing pontoon is the same as the standard for the Olympia system: 15 cm.
