ABOUT MICROGRIP

Experience safety excellence with GripFactory MicroGrip – a superior, invisible anti-slip solution exceeding international safety standards. GripFactory MicroGrip is a liquid (GRIPliquid) that creates microscopically small grooves in the top layer of the smooth floor. After a treatment with MicroGrip, nothing is optically altered on your floor, but the water can now drain easily under shoe soles or car tires, resulting in more grip and minimizing chances of accidents or sliders. Providing a 5-year warranty, they offer a lasting solution.

FEATURES AND ADVANTAGES

Durability

- Built to withstand impact for lasting performance.

Versatility

- Can be walked on immediately after application;
- Invisible end result, indoor and outdoor.

Ease of Use

- Easy to clean and maintain.

Safety

- Non-conductive, eliminating electrical and thermal hazards;
- Exceeding international (fire) safety standards;
- No chemical fumes when applied and afterwards.

Warranty

- 60 months guarantee (ask for conditions);
- Including deep cleaning;
- Cheaper than a coating.

TÜV CERTIFIED

The TÜV certification is a mark of compliance with stringent technical and safety standards. It signifies reliability, quality, and adherence to current regulations.

MicroGrip has successfully met the requirements outlined in the relevant standards. Even at a steep inclination of 27 degrees, MicroGrip maintained its anti-slip properties, placing it in Class C. This demonstrates MicroGrip's commitment to safety and quality in accordance with industry benchmarks.

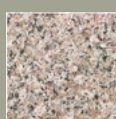

MATERIAL PROPERTIES

Subject	Ceramic Tiles	Marble	Concrete
Physically	Liquid		
Aspect	Oily	Characteristic	
Colour	Colourless	Characteristic	
Density at 20 °C	1010 kg / m ³	1049 kg / m ³	n/a
pH	4.2	0 - 1	1
Solubility Property	Soluble	Very soluble	Very soluble in water

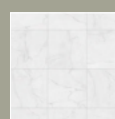

SUITABLE SURFACES

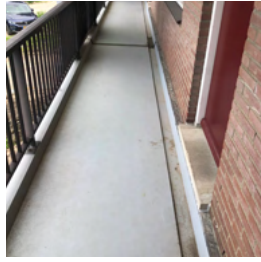

Concrete

Marble | Granite

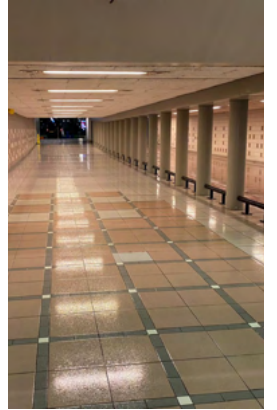

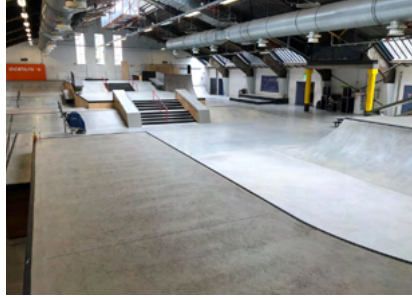

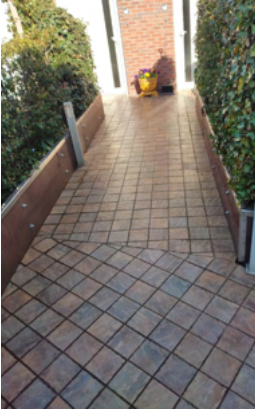

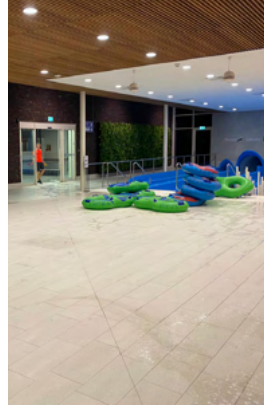

Ceramic Tiles
