# OCEAN GROUP:

## Your custom, our standard

Over the past decade Ocean Group's Western design, engineering, and management team has turned its vision of producing European standard, custom-made yachting equipment, and stainless steel hardware in Asia into a reality. We are built on our commitment to customer service and satisfaction. Founder and managing director Martyn Castelein's vision was to offer the full experience of having a western design and management team guide you through every stage of the custom build process, whilst benefiting from the labour cost savings of being based in Asia.

Martyn has over 15 years of experience as a welding and construction manager for some of the world's largest and most respected yacht builders. He knows that custom design and manufacturing is an integrative process between the shipyard, owner, and supplier.

Ocean Group offers stainless equipment, electro-hydraulics, marine grade glass and marine grade LED lights. We are a leader and innovator in hydraulic yachting equipment, from structural hull doors and cranes, to our revolutionary Transporter Lift. Our custom-made, mirror polished stainless steel deck hardware and railing has to be seen to be believed. Our success has been due in no small part to the care and attention we put into fulfilling all of our customers' needs. This means ensuring quality and safety standards are met or exceeded and maintaining excellent relationships with all major classification bodies.

Through our experience in producing high quality stainless steel and aluminium sliding doors with large volumes of glass, we began to realise the need for experts that could manage and advise on complex glass projects. Through this need, we widened our offer and now offer fully certified heated, tempered, clear, tinted, flat and curved glass for naval use.

The final piece of the puzzle is our LED light department --- blowing the competition away with our creative designs, immaculate light distribution, and stunning stainless steel finish.

Your custom, our standard

# New Factory

Ocean Group has the space and manpower required to work on extensive yacht projects, from small to massive. Our portfolio contains numerous 80+ meters yachts.

We carefully monitor the progress of each and every project we undertake, and we have the facilities to perform all testing and certification necessary given customer demands. This

allows us to meet and exceed our customers' expectations.

In order to keep up with the increasing demand, Ocean Group developed a new modern factory. This new factory is bigger and more functional. It allows us to raise the bar higher and to accept even the most demanding projects from the biggest shipyards around the globe.

# Shell Doors / Tender Doors

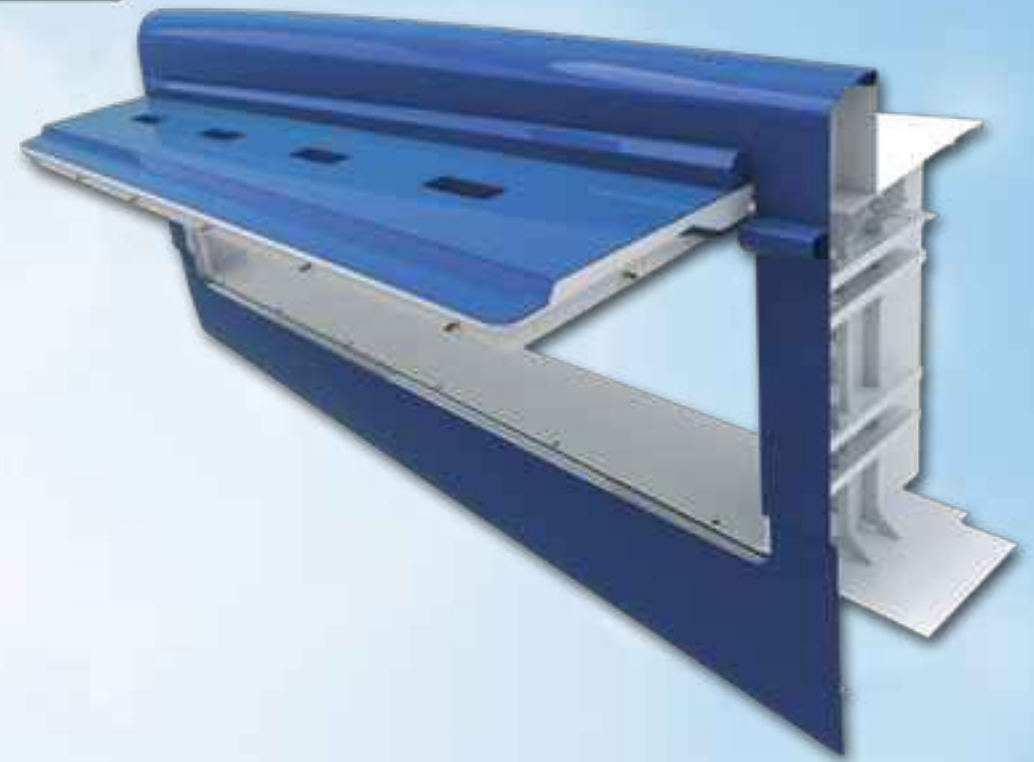

Ocean Group is one of the few manufacturers in the world who can offer large shell doors as turn-key solutions.

Our shell doors are designed by Ocean Group's European design team and built in our Taiwan facilities.

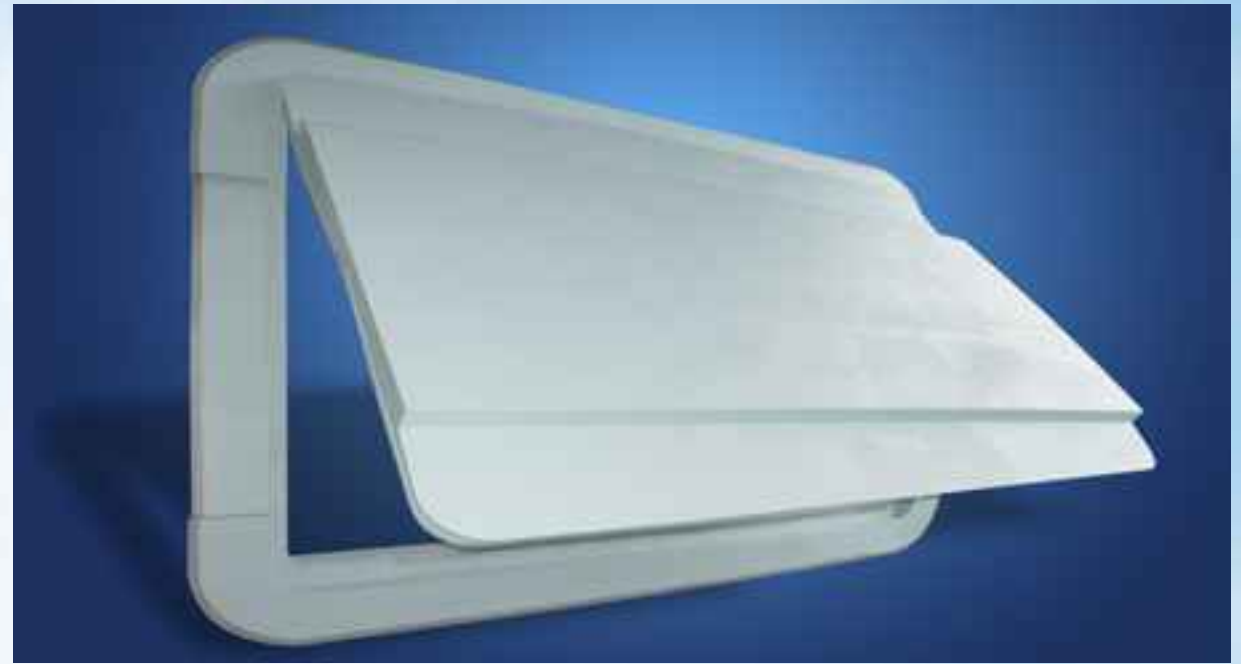

The design and manufacturing of these large and complex doors all happens in-house. Creating of the 3D models, steelwork, electric and hydraulic integration, painting, and mirror polishing all happens at our facility.

Ocean Group uses the latest 3D modeling software and design techniques to bring our customers' visions to life. Our shell doors door can be built to any class.

We can build 14 meter long doors to milimeter precision!

- Turn-key design
- Watertight
- Developed specifically for marine environment
- Fully customizable to fit special hull shapes
- Suitable for luxury yachts, military or commercial vessels
- Can be built to Class of customer's choice
- In-house design
- Can be customized to fit almost any yacht
- Class-approved portholes

# Hydraulic Platforms, Balconies

Ocean Group designs and builds yacht platform doors and balconies in a full range of sizes to suit the most complicated of requirements.

Our balconies and doors are fully hydraulic and automated and (if requested) can have an inner water-tight door, allowing access to and from the vessel.

- ⦿ In-house design
- ⦿ Designed for medium to large yachts
- ⦿ Water-tight inner hydraulic door
- ⦿ Designed to be Class certified
- ⦿ Teak finish on platform
- ⦿ Developed specifically for marine environment
- ⦿ Suitable for luxury yachts, military or commercial application

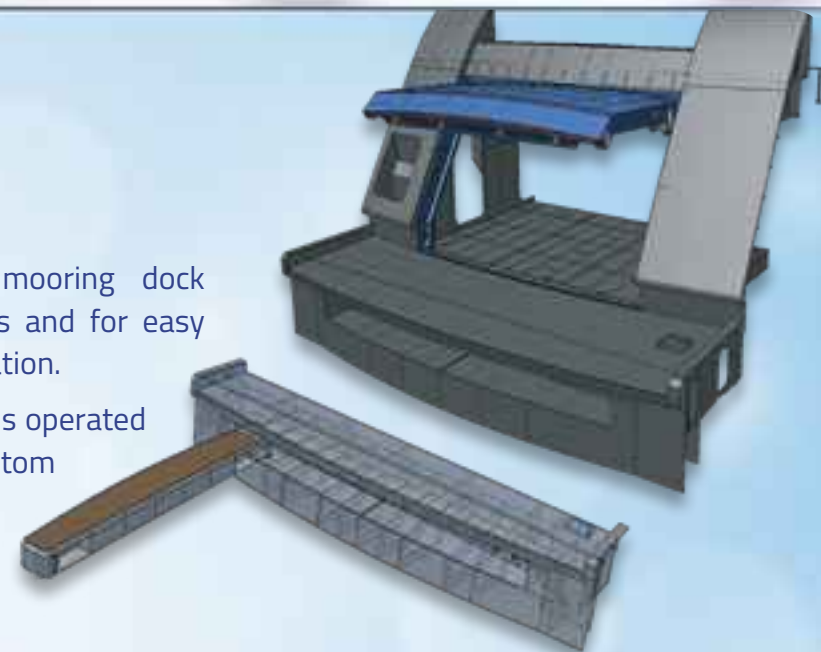

# Transom Doors and Platforms

Ocean Group is one of a few manufacturers in the world who can offer transom doors as turn-key solution. We are able to offer plug-and-play solutions for equipment, including hydraulic and electrical, fully certified (watertight, weathertight etc.) to any classification society and 100% signed off on before it is shipped from our factory. Everything comes fully primed or painted as per your requirements, so our doors do not have to be removed from their frames, during or after assembly. This will drastically shorten total installation time and man-hours.

Ocean Group's swingout mooring dock is used for securing tenders and for easy embarkation and disembarkation.

The swingout mooring dock is operated hydraulically and can be custom made to fit the main vessel's dimensional and material requirements.

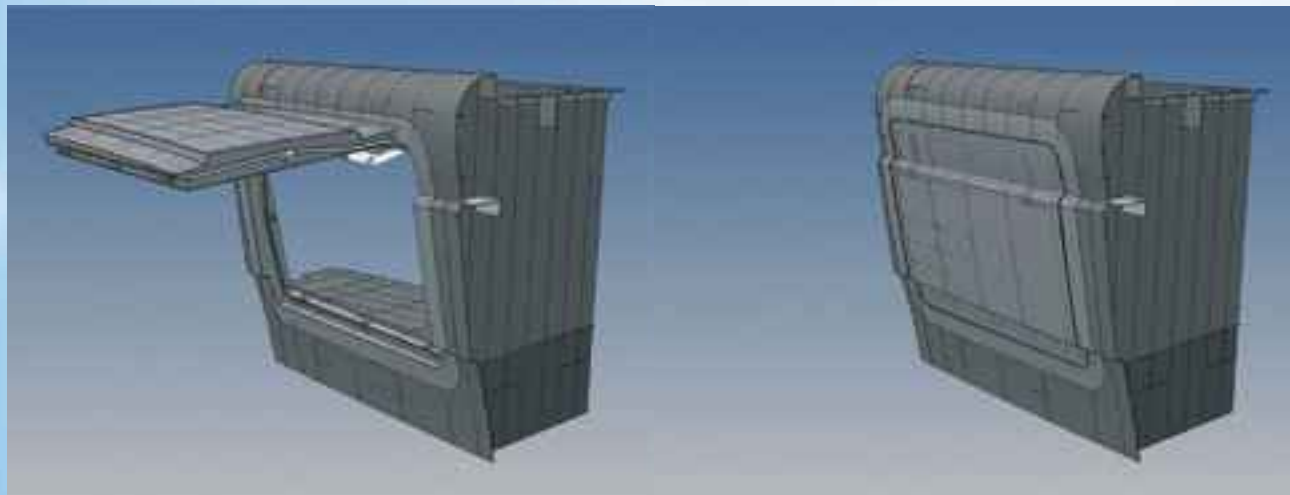

# Rescue Doors

Ocean Group's rescue shell doors are designed following strict SOLAS requirements.

We design and build in both aluminum and steel depending on what you want.

Our doors can be built to class and come with all required certifications.

- 🕒 In-house design
- 🕒 Can be built to any class
- 🕒 Can be customized to fit almost any yacht
- 🕒 Developed specifically for marine environment
- 🕒 Suitable for luxury yachts, military or commercial application

# Mooring Platforms

Mooring platforms can be customized for any vessel, including the oil and gas industry.

- In-house design
- Can be built to any class
- Developed specifically for marine environment
- Suitable for luxury yachts, military or commercial vessels

# Tender Lifts

Ocean Group's L-EX series of transom lifts is aimed toward catamarans. Lift mounts between hulls on the transom and develops tender down and out, allowing you to have longer tenders than the distance between hulls.

L-EX transom lifts come in various materials, sizes and carrying capacities, from the light-weight L300EX up to L1200EX. Larger lifts are available on request.

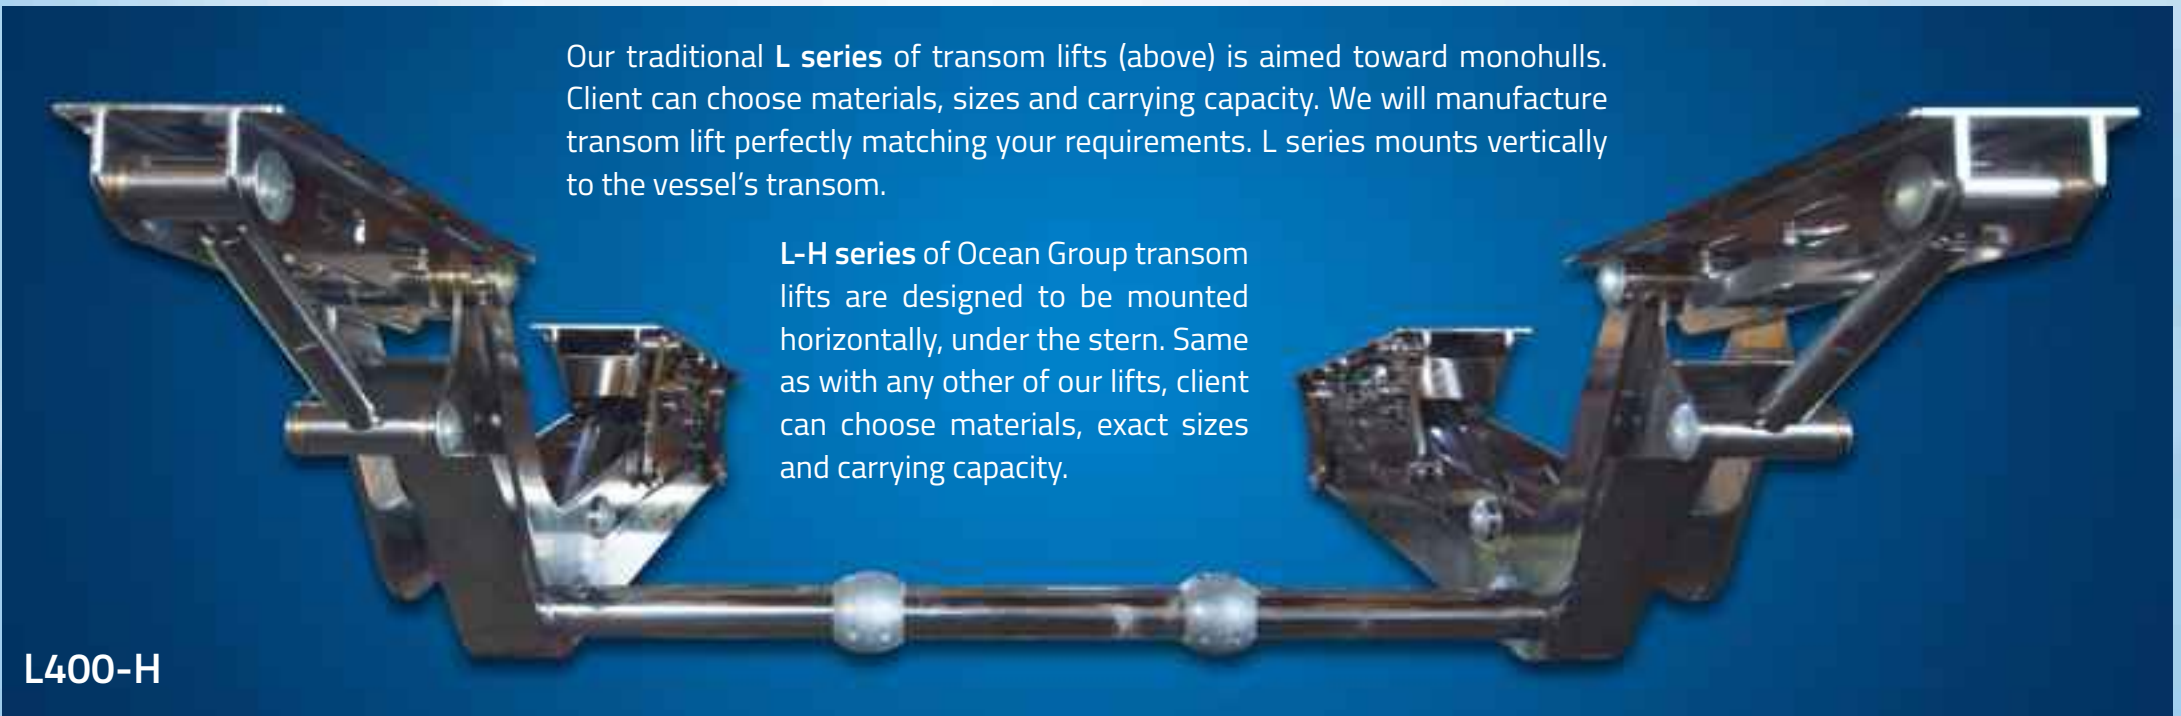

L1200

L600

Our traditional **L series** of transom lifts (above) is aimed toward monohulls. Client can choose materials, sizes and carrying capacity. We will manufacture transom lift perfectly matching your requirements. L series mounts vertically to the vessel's transom.

**L-H series** of Ocean Group transom lifts are designed to be mounted horizontally, under the stern. Same as with any other of our lifts, client can choose materials, exact sizes and carrying capacity.

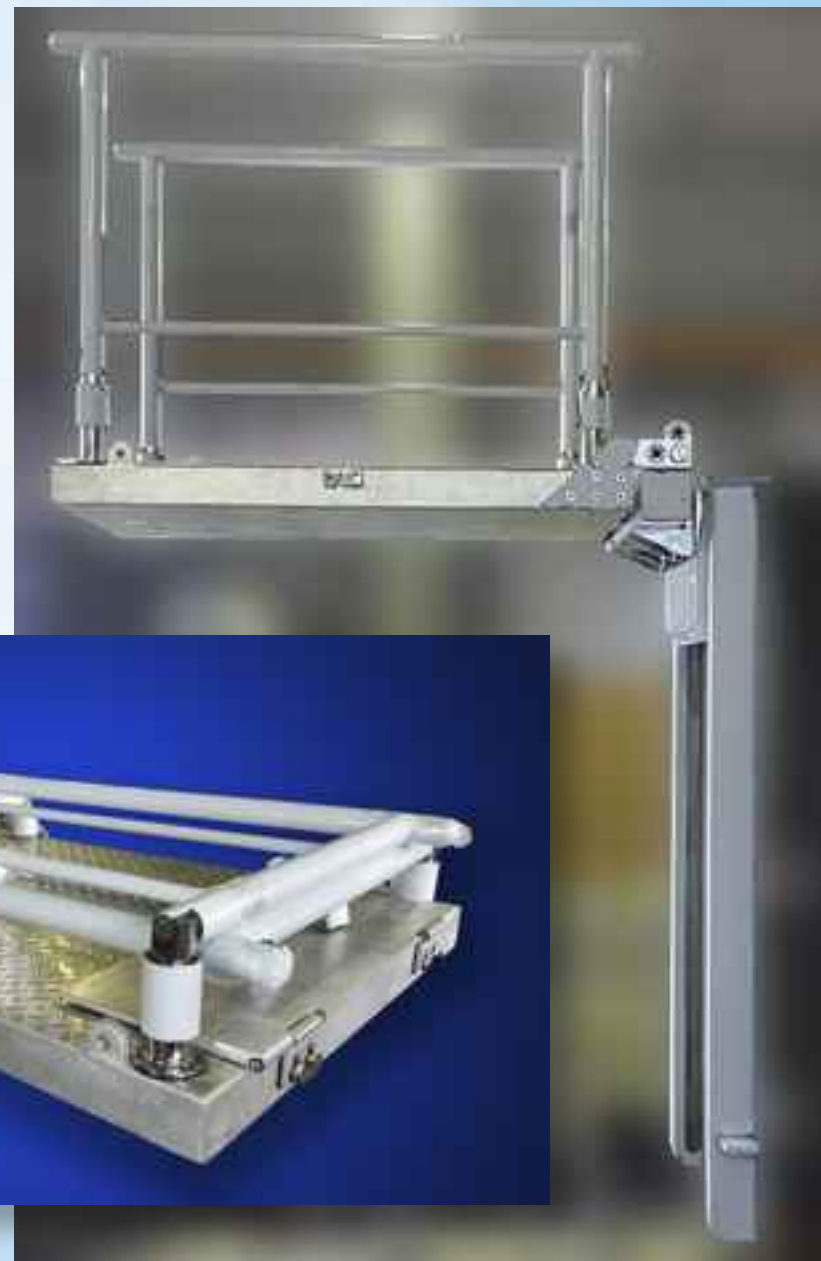

L400-H

# Special Lifts / Wheelchair Lifts

Our vertical transom lifting platforms can be developed in a variety of sizes and lifting capacities, from 300kg to 2 tons. Customers can choose exact dimensions, safe working load capacity, materials... We will manufacture the transom lift solution exactly to your needs!

Ocean Group is proud of our custom solutions. Fully customized wheelchair lifts are one excellent example. Engineered with a SWL of 130Kg, and a safety factor of 5.2 (yes, it's almost 700Kg!), this lift is interchangeable between port and starboard sides of the vessel. Made in combination of perfectly polished stainless steel and aluminium, this lift is foldable and removable when not in use. It has wireless and wired controls, and is powered hydraulically.

# TRANSPORTER

OCEAN GROUP

Ocean Group proudly presents our multifunctional tender lift:  
the **TRANSPORTER**.

Our **TRANSPORTER** features an improved and upgraded design.  
It's easier, safer, operates faster, and looks great.

- Self-leveling platform
- Full directional control
- Customizable from three to eight steps
- Pop-up floor to ensure continuous stern surface
- Can be used for diving, tender launching, loading equipment, as a swimming platform, and for boarding
- Functions as a passerelle
- Can be built from stainless steel or titanium
- Lifts between 300kg and 1500kg

# Yacht Cranes

Ocean Group has built a large variety of cranes for multiple purposes. Our cranes can be built to class and fully certified. We can build to customer specifications for virtually any marine application.

- Top quality hydraulic components
- Synchronized dual cranes
- Available in painted or mirror-polished
- Tender Lifts, Rescue and Safety cranes (with all certifications needed)
- Developed specifically for marine environment
- Fully serviceable and efficient
- Marine-Grade Stainless Steel

# Sliding Doors

All of our doors are powered by top of the line German made motoring systems. They are whisper quiet and very reliable.

Our doors can be custom-designed for any application or configuration, with custom-made glass built to exact customer specifications.

- 🕒 Marine grade stainless
- 🕒 Painted or mirror-polished
- 🕒 Custom latches
- 🕒 Flat or curved designs
- 🕒 Tempered certified glass

# Watertight and weathertight doors

Ocean Group designs and builds watertight, weather-tight and fire-proof doors. We design and build in both aluminum, steel or stainless steel as per your requirements.

Our doors can be built to class and come with certification where required.

- Concealed or visible latching dogs
- Custom-built to yard requirements
- Designed for yacht re-fit projects
- Built to any certification
- Mirror polished or painted

# Boarding ladders, passerelles

Ocean Group designs and builds boarding ladders and passerelles for any size yacht, from small to mega.

- Compact designs
- Mirror polished stainless
- Built for the marine environment
- Precision built
- Fully tested for usage and load

# Railing

Ocean Group designs railing for new yachts or re-fits. Our stainless railing packages are mirror polished, with hidden welds. We can also incorporate glass into our railing packages.

-  High quality marine stainless
-  Mirror polished finish
-  Seamless welds
-  Gate and latch systems
-  For aluminum, FRP or steel yachts

# Bollards and Fairleads

Ocean Group designs bollards, fairleads, rubrails, anchors and anchorpoceks for any yacht configuration.

Our products are made from the highest quality 316L stainless steel finished with a flawless mirror-polished finish.

- Built and certified to any class
- Built to custom specifications
- Marine-grade 316L stainless steel

# Staircases

Form meets function with Ocean Group's staircase designs. We build staircases as per designer specifications, or create our own with our design team.

- Custom designed
- Mirror polished stainless
- Marine environment friendly
- Precision built
- Fully tested for usage and load

# Special projects

Some of our products are so specific that they cannot be classified in any product group. We make some of the most custom yachting solutions in the world and we love these challenges.

Contact our special projects department to realize your wildest yachting equipment vision.

Contact us at [specialprojects@oceangroup.asia](mailto:specialprojects@oceangroup.asia) with your inquiry.

# Highly experienced design team

No custom requirement is too difficult for us - whether you require a single bent stainless rail, custom exotic metal pipe fittings, doors, platforms, or engineering and manufacture of a complete stainless package.

Ocean Group's international team of naval architects, designers and engineers makes us a choice for shipyards who want to have their case in experienced and safe hands.

Our European designers understand and respect the demands of the yacht industry and can handle the most complex projects. We're equipped with the latest in 3D design software and can provide our customers with wireframe, 2D, or 3D drawings.

Our team can make your project a reality, from concept and design to fabrication. We can also build to class for any project. This is why we work with the most respected companies in the industry.

- Highly experienced designers and engineers, Europe and Taiwan based
- Complex electrical and hydraulic design
- Integration of models into existing files
- Output from wireframe to hi-res rendering
- Problem-solving, forward-thinking designs
- Seamlessly integrates into refit work
