

PRO ULTRA Legionella Water Test

Our new innovation is just as flexible as our current test but now detects *Legionella pneumophila* serogroups 1-15, which cause 90% of Legionnaires' disease worldwide.

The test uses our unique filter technology which isolates the bacteria and distinctly identifies the presence of serogroup 1 on one test line and 2-15 on another.

It's the ideal test for high risk areas such as cooling towers, water tanks, fountains, showers, sinks, spas and pools.

DETECTION:

Legionella pneumophila serogroups 1-15

SENSITIVITY:

100 CFU/L – Highly sensitive

TEST TIME:

25 minutes

INCLUDES:

1 test

PART NUMBER:

500500
