

Natural Sustainable Innovation

Water Technology for All Scenarios-A Pioneer Solution & Service Provider

*Grasp the Core Technology of Water Purification, Full Scenario,
Whole Industrial Chain, Research and Production Complex*

Our sole mission and development value is to continuously provide high-quality water technology solutions for the Earth. We have been focusing on water purification for 16 years. With outstanding innovation capabilities and industry-leading technological achievements, Jubei Group has become a global leading enterprise with whole industrial chain on the field of water technology.

National High-tech Enterprise

High-growing High-tech Enterprise in Zhejiang Province

Technology Small and Medium Enterprise in Zhejiang Province

China Top 10 Water Purification Manufacturer

Professional, Specialized, Concentrated, Innovated Enterprise in Zhejiang Province

- ✦ Ultrasonic water leakage protector for household and similar purpose
Group leader in national industry standard drafting team
- ✦ Prefilter with intelligent Internet-of-Things for household and similar purpose
Group leader in national industry standard drafting team
- ✦ Prefilter without assembly and cleaning for household and similar purpose
Vice group leader in national industry standard drafting team
- ✦ Purified shower for household and similar purpose
Vice group leader in national industry standard drafting team
- ✦ The technology specification of water scale inhibition filter for household and similar purpose
Group leader in national industry standard drafting team
- ✦ Prefilter
Group leader in national industry standard drafting team
- ✦ Purified water quality standard for water treatment devices
Vice group leader in national industry standard drafting team

INTELLIGENT MANUFACTURING OF THE WHOLE INDUSTRY CHAIN

Jubei Group has business centers such as Beishi, Beirui, Beihuang, Jincheng, Juxing, Jumiao, Beide, Jusheng, and Yunshuiju, as well as production bases throughout the country. The total production area of the entire industrial chain exceeds 200,000 m², and it has the production capacity of the entire industrial chain of water purification equipment and components. We have a comprehensive water treatment service capability with a full product system, full scenario applications, and full life cycle.

Jubei Group Industrial Cluster

Over 20,000 m² of research and development
intelligent manufacturing platform

Jubei Group has over 30 factories and ecological companies, with a full product system, full scenario applications, and full life cycle water treatment service capabilities. Relying on advanced concept, efficient execution, and empowering customers' cultural genes, Jubei Group has established deep partnerships with consumers, clients and the industry, and win the trust in the global market as a China famous brand.

Three demands for water treatment

1 Purified Water

Remove the impurities and make water qualified for daily drinking and using.

2 Healthy Water

Add minerals into water
good for human body
Improve the taste

3 Vibrant Water

Make water vibrant and have a positive impact on people, equipment, and the environment.
Soft water, micro nano bubble water, sparkling water

An aerial photograph of a river delta, showing a complex network of channels and distributaries. The water is a deep blue, while the exposed sandbars and mudflats are a bright yellow. The patterns are organic and flowing, creating a sense of movement and natural complexity.

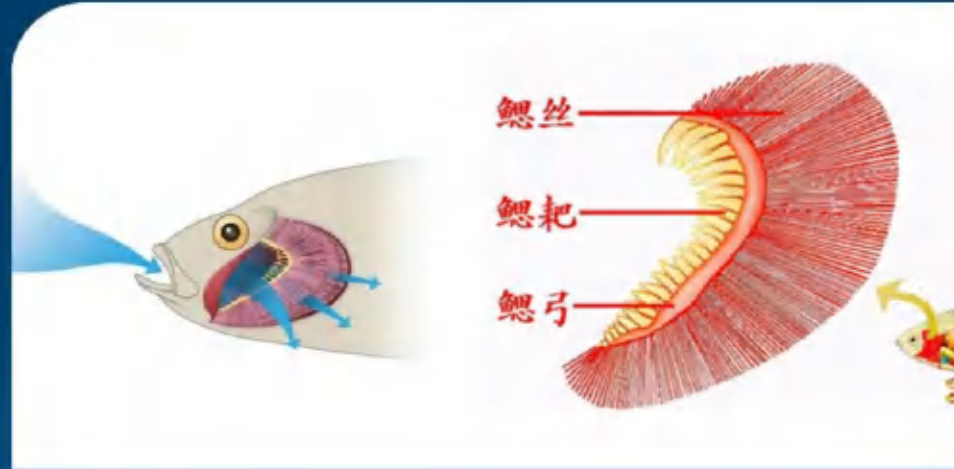

Understanding of water technology

Using natural methods to solve natural problems

Water technology refers to a technical system that applies technological means to solve problems in water resource management, water environment maintenance, water safety, and other aspects

Prefilter Technology Upgrade

Upgrade from Traditional Filter to Bionic Technology

1

Bionic sample
Fish gill filtration
technology

2

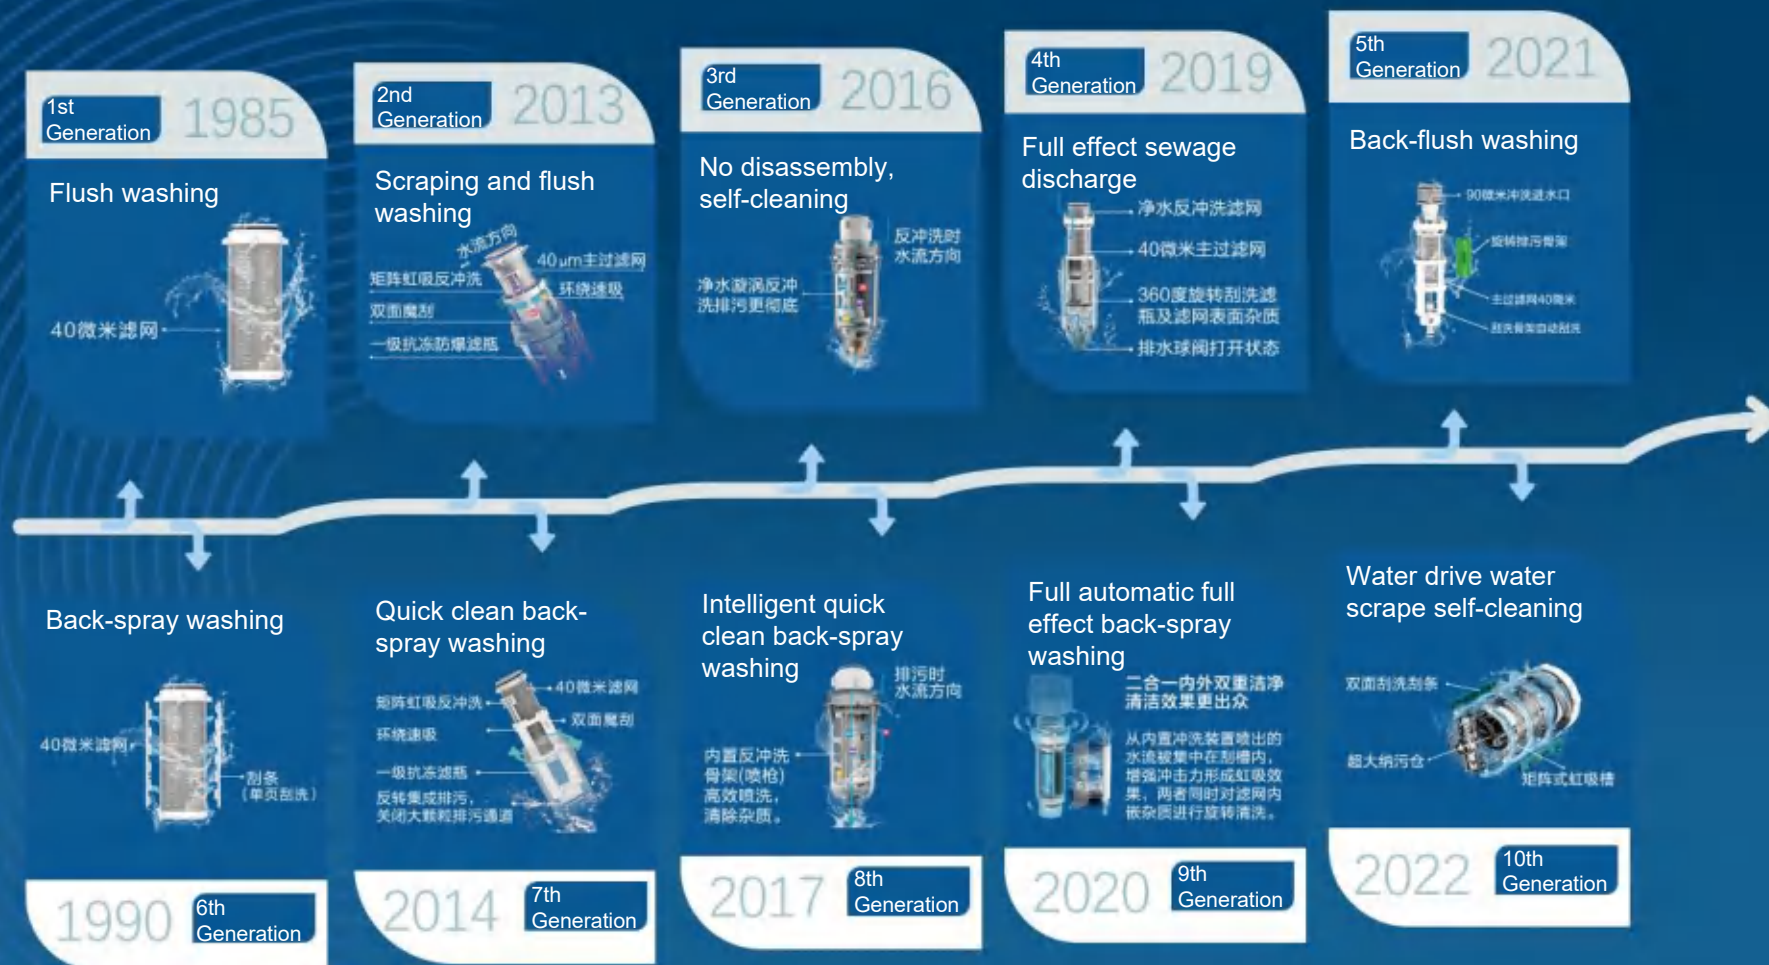

Bionic sample
Terraced field
filtration technology

Jubei Water Bionic Philosophy

PREFILTER 1.0

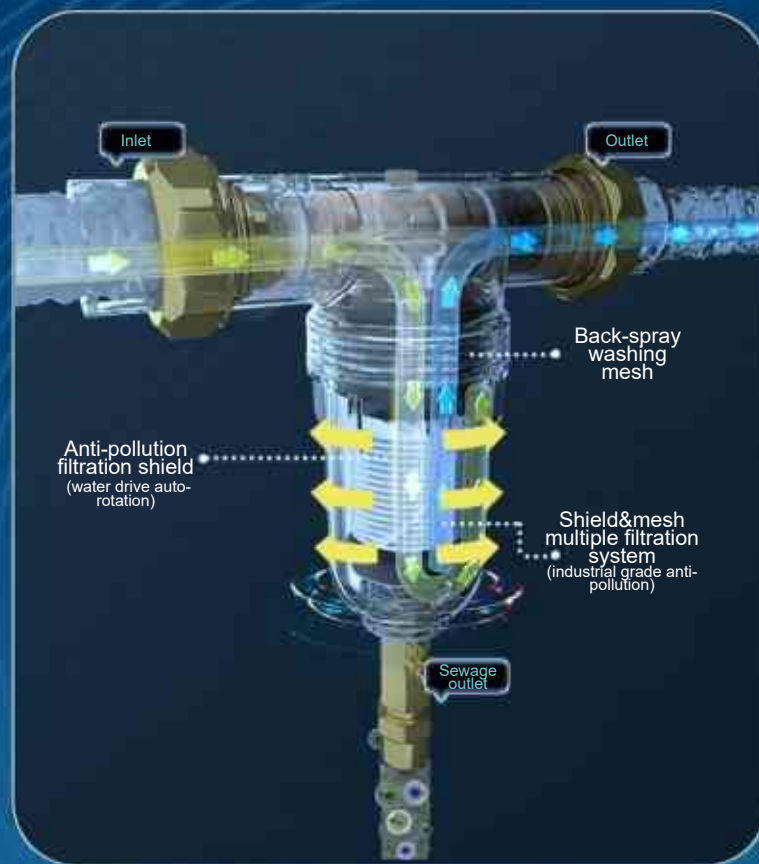

Prefilter Technology Upgrade

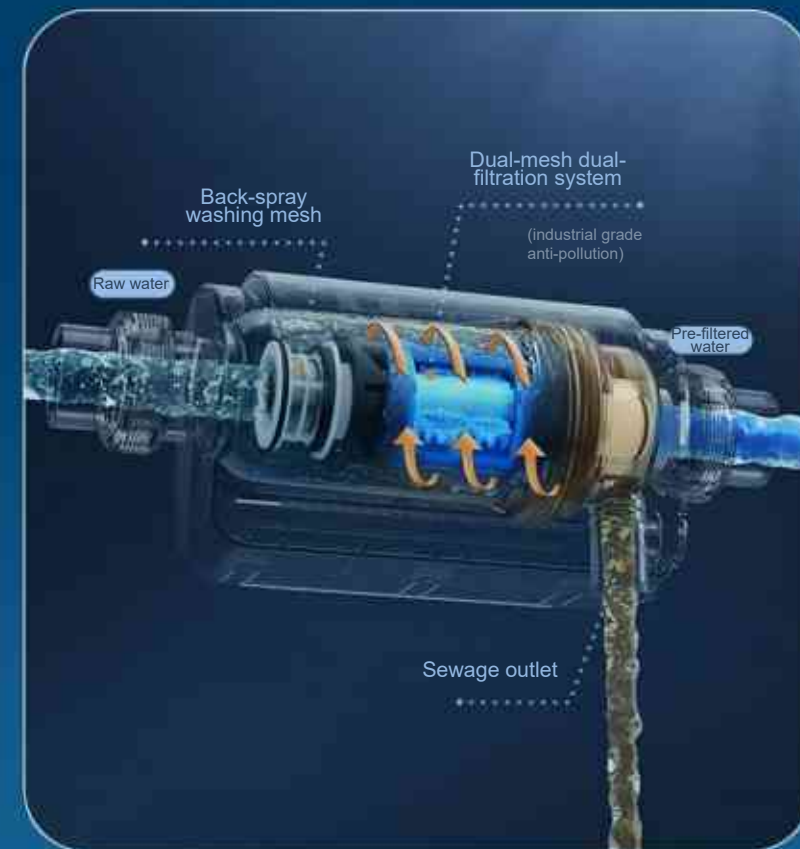

2023

Prefilter Technology Upgrade

Having industrial grade anti-pollution ability, not afraid of pollution and blockage, suitable for more complex water quality environments

11th Generation
Shield&mesh multiple filtration
technology

12th Generation
LNF Dual-mesh, gradually tightening type,
bionic and anti-bacterial multiple filtration
technology

Dual-mesh Shield&mesh

First Launch Worldwide

Continuously leading, upgrading
across generations, and driving
the prefilter industry to take a big
step forward

Multiple filtration, industrial grade strong anti-pollution,
multi turbine back-spray washing
7T/H large flow rate, water drive self-cleaning, long
term antibacterial and algal inhibition
Integrated internal lead isolation, capable of
withstanding water hammer impact more than 500,000
times
Ultra high cost-effectiveness, ultra-low temperature
antifreeze

Dual-mesh Crouching Dragon

Shield&mesh Standard

Shield&mesh Plus

Shield&mesh Full-auto

Pretreatment Scenario Upgrade Intelligent integrated water leakage protector&prefilter

Three Safeguards for Future Families

Electric leakage
protector

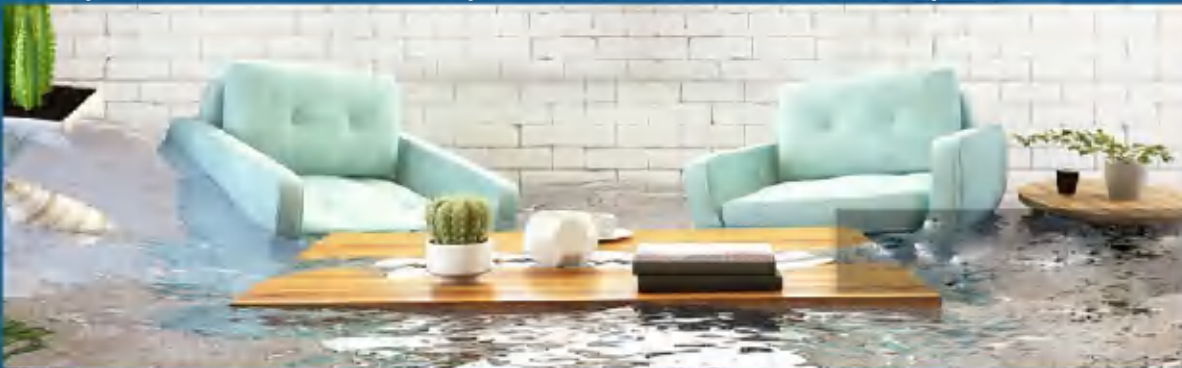

Gas leakage
protector

+

Water leakage
protector

Pretreatment Scenario Upgrade From one prefilter to diverse pretreatment scenarios

Not only filter impurities
(household/commercial/Industrial)

Prefilter series

Intelligent integrated water
leakage protector&prefilter

Water softener series

Central Integrated System Integrated Technology Redefining Whole House Purification

An intelligent sewage discharge prefilter

An intelligent AI control water leakage protector

A whole house central water purifier

A whole house central water softener

An integrated system without a device room

Pretreatment Scenario Upgrade Doctor Scale Series

Promote the global popularization of pure physical technology for scale inhibition and descaling

Showerhead

Water heater

Air Energy

Boiler

Trillion Blue Ocean Market for Scale Inhibition

Scenario Solution **Kitchen&Direct drinking**

Purified water for cooking
(functional)

Purified water for food and dish washing,
anti fouling for sink, oil removal, dirt removal,
sterilization, and odor prevention of kitchen
waste water pipelines

Direct drinking water hot and cold
(healthy and taste good)

Diversified demand from traditional drinking water to functional drinks

Smart mini purified water bar

It integrates purification, heating, temperature adjustment, temperature control, free installation and other functions within one.

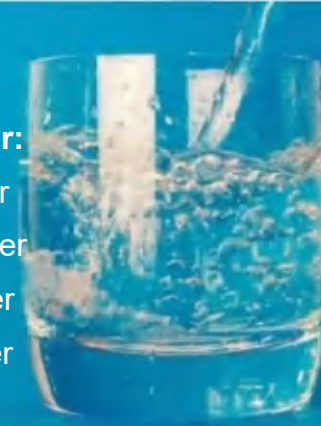

Intelligent tea dispenser

Functional

drinking water:

sparkling water
electrolyte water
hydrogen water
strontium water

Drinking water **Demand upgrade**

Intelligent system for water
temperature control

Smart mini purified water bar

Boiled and cool water
purified for direct drinking

Water
purification machin

Water
dispenser

Health pot

Milk
dispenser

Intelligent tea dispenser

Commercial water purifier for kitchen and restaurant

- Commercial water purifier for kitchen and restaurant
- Large flow rate RO purifier
- Multi functions, long service life, dual system
- Mixed water (multiple formula of water to make coffee more delicious)

Water purifier and heater integrated

1500GPD
RO purifier

Split type under sink direct
drinking water purifier (1+1)

Standing water dispenser/tea dispenser
for commercial and household

Large flow rate
RO purifier

UF purifier

Standing dispenser for commercial

Make every drop of water healthy

Generous screen, fancy sense of reality.

Highlighted slight curve top cover, easy for clean.

KITCHEN

BATHROOM

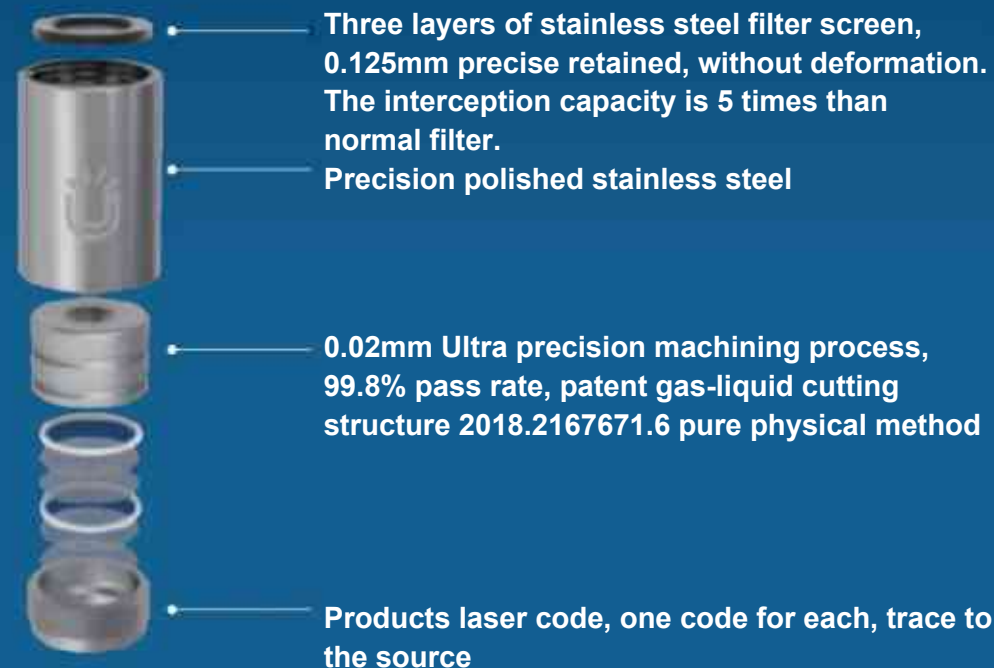

MATERNAL&INFANT

Micro nano bubble - Brownian motion

- Formation caused by the energy of water molecules and gas molecular clusters themselves
- Nano size ultra-high temperature critical state, various microscopic quantum chemical changes
- Multiple free radicals are generated, which have an oxidative degradation effect on pollutants in water

Micro bubble improves water quality comprehensively

- Efficient removal of dirt
- Save water by 20%
- Reduce detergent usage, reduce residue
- Say goodbye to agricultural residue bacteria
- Keep new for long service life
- Enjoy negative oxygen ion

让水更有 生命力

Let the water more vitality

Product systematization, System integration, Integrated intelligence
Intelligent standardization, Standard integration

Comprehensive service provider for one-stop
products of full scene water purification system
