ACCESS CONTROLLED...  
FUTURE SECURED

On the cusp of its 50th birthday, Automatic Systems is a company renowned for the quality of its products and innovative technological know-how. We are a profitable firm and can look to the future confidently.

In each of our business sectors - pedestrian, vehicle and high security - there is a strong growing demand worldwide with amazing perspectives. We still have market shares to be conquered, especially on the international stage, and in the high security market. We are seeking to expand our influence and continue to innovate. In the future we will continue to rely on our offer of services that already sets us apart, as well as on the human capital which is the key to our success and that of our customers. We have come a very long way in fifty years. Today we are showing the way for the next five decades, to meet the challenges of tomorrow and of the next generation.

## / OUR MISSION /

**AUTOMATIC SYSTEMS** protects pedestrian and vehicle access points as well as traffic flows. We are renowned worldwide for designing and manufacturing high-quality innovative access control equipment thanks to the technical skills of our highly-qualified employees.

## / OUR VALUES /

**ENTREPRENEURSHIP**

**COMMITTED** to long-term customer satisfaction

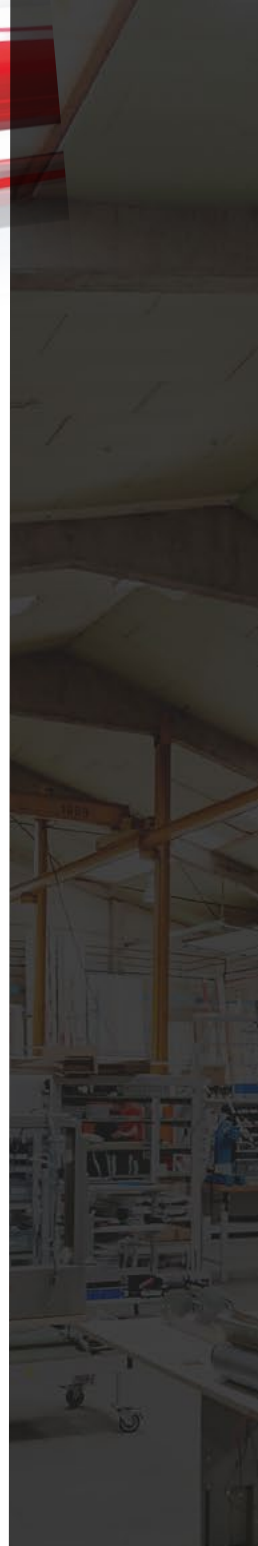

Remaining **AGILE**

Always **INNOVATING**

Succeeding **TOGETHER**, as partners

## **/ WHAT OUR EMPLOYEES SAY /**

### **André Dumont**

Mechanical Engineering Manager,  
**for 32 years**  
with Automatic Systems

« For 50 years, our fundamentals have stayed the same: a global approach for each project, listening to the customer, team-work and our ability to enhance our products to meet market demands, like today with the growing interest in connectivity of objects (IoT). »

### **Vanessa Wynant**

Logistics Manager,  
**for 16 years**  
with Automatic Systems

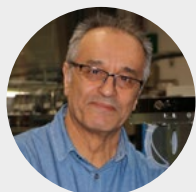

« Automatic Systems constantly invests in infrastructures and resources to improve its services, including the last link in the chain: shipping. Transport is capital and is a strength. Working in a company with a strong reputation that exports all over the world is a great opportunity! »

### **Ben Fryer**

Sales Manager UK,  
**for 10 years**  
with Automatic Systems

« Customers always come back to us, thanks to the quality of our equipment, our advice and our follow-up. We develop a genuinely long-term relationship with our customers and provide them with a veritable team project. This is what makes us stand out from the competition. »

### **Hassan Bonouh**

Production Manager,  
**for 40 years**  
with Automatic Systems

« I am proud to work for a company that recognises the worth of its employees. Over 40 years, Automatic Systems has considerably developed and it is because we accept change, invest in new products and react quickly that we are still growing. »

### **Jean-Marc Chatonnier**

Sales Manager France,  
**for 43 years**  
with Automatic Systems

« I am beginning my 43rd year with Automatic Systems and I still have the same enthusiasm as when I started in 1976 as the 1<sup>st</sup> employee of the French subsidiary. Today, there are a hundred-odd employees using an excellent production tool. Our products as well as our expertise are renowned worldwide, and I am very pleased to continue to represent this wonderful company. »

## / OUR PRODUCTS /

### / PEDESTRIAN /

#### SECURITY ENTRANCE LANES

For maximum throughput and advanced protection of users with minimum hindrance and a discrete as well as modern appearance for corporate and public environments.

#### SWING GATES

To evacuate buildings in the case of emergencies and/or facilitate movement of persons with reduced mobility and service personnel.

#### TURNSTILES

To control automated access to frequently visited sites, both inside and outside, with a simple, robust and sleek design.

#### SECURITY DOORS

These genuine thermal barriers offer the top performance automated access in terms of physical and electronic control.

#### SECURITY TURNSTILES

Used to lock down the perimeter of external enclosed sites, full height turnstiles encourage uniform movement and are extremely resistant to harsh weather.

## / **VEHICLE** /

### **MOTORWAY BARRIERS**

Fast barriers for motorways and toll roads, where reliability, endurance and fast assimilation of considerable vehicle flows are essential.

### **CAR PARK BARRIERS**

Reliable barriers with internal management systems for car parks, whether covered or open air, such as paid parking requiring controls on entrance and exit.

### **TRAFFIC MANAGEMENT**

A range of barriers to secure access to bridges tunnels, level crossings and other highways, adapted to constraints in terms of dimensions, security and vandalism.

### **PERIMETER ACCESS**

Our barriers allow access control for your site in accordance with the number of visits, the required level of security and the conditions specific to your facilities.

## / **HIGH SECURITY** /

### **ANTI-INTRUSION BARRIERS**

Vertical or swing gates authorising or restricting vehicle access in large spaces.

### **BOLLARDS**

Bollards that control or direct vehicles onto traffic lanes, playing fields, shopping centres, parks, paths and tolls.

### **REMOVABLE BARRIERS**

Resistant anti-terrorist barriers for installation in highly sensitive areas where unauthorised vehicles are subject to access restrictions.

# / OUR SERVICES /

Automatic Systems is a company that markets products and services, offering its customers a wide array of customised contracts that cover all the service activities related to pedestrian and vehicle products: **installation, commissioning, preventive maintenance, regular maintenance of facilities, repairs and trouble-shooting, spare parts, helpdesk and training.**

This range of services embodies a long-term partnership with customers and helps us stand out from the competition. Automatic Systems possesses local service centres in 8 countries, as well as an International Customer Service team covering the rest of the world via a large network of partners.

# / WHAT OUR CUSTOMERS SAY /

## **Pierre Deroubaix**

Maintenance and Infrastructure Manager  
Brussels South Charleroi Airport,  
Belgium

« Secure access management, fluidity of movement, security of people and infrastructures, as well as operational continuity are the absolute priorities for our airport. For us, the reliability of the equipment and level of service provided by Automatic Systems are a guarantee of cost savings in terms of maintenance and training of our personnel. Automatic Systems meets all our requirements. »

## **Giuseppe Di Giacomo**

CEO LaserLine,  
Italy

« We have been working with Automatic Systems for 20 years. This partnership stemmed from the union of our technical and commercial expertise acquired in the field of access control with the physical security and excellent production capacity of Automatic Systems, whose products rhyme with superb quality and reliability, rounded off by a very attractive design. It is close to perfection! »

## **Darren Smith**

Site Security Manager at Next,  
UK

« Automatic Systems installed turnstiles at the head offices of Next without disrupting business continuity, thanks to a structured approach and prior assessment of risks. Thanks to their solutions, today we can implement more stringent processes in terms of security and audits. We are extremely satisfied with the efficiency of the installations and the benefits that we have gained from them. »
