Emne: Real Experience with Bungy Mooring Line Snubbers

Dear Lars

Just wanted to share how impressed we are with your Bungy mooring line snubbers. We've been using them on our training and charter boats in Greece, and they've proven themselves in real conditions.

In Kos, when a large ferry entered the marina at high speed causing heavy turbulence, many boats were damaged — but ours, equipped with Bungy snubbers, stayed perfectly safe with much less rolling. The same happened in Naxos with the Blue Star ferry, and it's all visible in the video we recorded.

They're super easy to install — takes just a minute — and unlike the old metal springs, they can never damage the boat. They're soft, elastic, and reliable. Plus, they're so compact that I carry a few of them in a small bag together with my mooring gear, ready to use on any boat I step on.

Simple, smart, and absolutely effective — Bungy snubbers have become a must-have part of my equipment.

Fair winds,
Alexandros Retsinas
