

**ATLAS FILTRI**<sup>®</sup>  
improving water

# CUSTOM WATER SOLUTIONS ARE OUR STANDARD.

**We strive for unmatched  
performance in industrial  
and commercial applications.**

We design and build complete water  
treatment plants, using the most suitable  
and efficient materials to ensure the  
required capacities and flow rates.

RO for drinking water  
**6000 l/h**

## AREAS OF APPLICATION:

- Agriculture
- Animal farming
- Horticulture and greenhouse cultivation
- Automotive industry
- Food industry
- Process industry
- Chemical and pharmaceutical industry

RO for  
food industries  
**300 l/h**

RO steam  
boiler generator  
**3000 l/h**

RO  
Process industry  
**120 l/h**

Reverse osmosis  
system and  
demineralization for  
laboratory water.  
**100 l/h**

# Industrial Filters

Filtration of process water by removing impurities such as rust, sand and debris, helping to protect water distribution lines, heating and cooling systems, process water lines from malfunctions and corrossions.

**SELF CLEANING FILTERS**  
industrial self cleaning screen filters

**MANUAL CLEANING SCREEN FILTERS**

**CENTRIFUGAL SEPARATING SYSTEMS**

# UV disinfection systems

Disinfection of mains water and pretreatment of reverse osmosis plants. Installed to lower almost all of the most common micro-organisms contained in the water.

**UV bacterial removal systems**  
with LCD control panel

**UV bacterial removal systems**  
with RACK control panel

# Water filtration systems

Water filtration and water treatment systems conceived to be simple and smart.

**HYDRA BIG**  
self-cleaning filter  
with KIT AUTO  
(optional)

**DP BIG SANIC & CPP BIG SANIC**  
antimicrobial system

**HYDRA RAINMASTER BIG**  
multi-stage filtration  
complete system

**BIG F PRO**  
complete system with  
UVC treatment

# Softeners and media filters

Column filters used for treating large volumes of water. Depending on the filtering bed, they can remove impurities, iron and manganese, excess chlorine or smells and taste.

## SOFTENERS

Range of double body, twin-columns and cabinet softeners with a timed or volume control valve.

## PFRV PRESSURE VESSELS

Non-corrosive, cost-effective solutions for commercial and industrial water treatment electronic control valve.

## INDUSTRIAL MEDIA FILTERS

Tailor-made solution controlled by electronic automation.

# Dosing Systems

Dosing systems designed for the prevention, treatment and control of water quality.

## SKID MOUNTED COMPLETE SOLUTIONS

## STEPPER DOSING PUMP
