EST. ROTTERDAM 1963

MARINE | AUTOMATION | SAFETY | PREVENTION SYSTEMS

Venteville, specialist of marine automation, safety & prevention systems

Venteville has been your partner for marine automation, safety & prevention systems since 1963. Whether it's well-known systems or systems that are yet to be developed, together with the manufacturer we realise a bespoke solution for you. We distinguish ourselves in the following areas:

1 Expertise

Venteville has been engaged in the maritime sector since 1963. Our close and long standing cooperation with the manufacturers has gained us extensive technical experience, so we know all the systems inside out.

3 Total cost of ownership reduction

We provide you with insight into the benefits of our systems for your investment and your total operating costs. We collaborate with you to optimise your design with the appropriate system solutions, with the aim of reducing costs.

2 Innovation

Our close cooperation with the manufacturer enables us to translate current market needs into innovative technical and environmentally friendly system solutions that comply with the latest classification standards.

4 Service

Our goal is to take care of your continuity. From the system's design, integration and delivery up to its commissioning and maintenance, we provide the support you need. Feel free to contact us to find out what we have to offer you.

Automation

The level of system automation and integration is increasing. Your wish to focus on the daily, major on board operations calls for solutions that unburden you and simplify the complexity. The solutions we offer you for control systems, level measurement systems and loading systems are accurate, integrable and customised.

Safety

Your safety is our highest priority. Our portfolio of fire detection, LED navigation lights, ship horns, alarm and monitoring systems ensures you have access to high quality systems, which comply with the latest classification standards.

Prevention

Preventing problems is better than having to clean up the wreckage afterwards. We know that all too well. Our expertise includes unparalleled knowledge of and experience with the Chloropac® MGPS system. It provides excellent and proven protection against marine fouling, so you can prevent the cooling water system from becoming inefficient.

Our partners

Evoqua Water Technologies

Communities around the world face serious issues when it comes to water quality and quantity. Issues of water scarcity and contamination seem daunting and unsolvable, but at Evoqua, we are proud to provide solutions to help the maritime world solve such complex problems.

Lopolight

Since the start of the LED revolution in the early 00's Lopolight has been supplying LED navigation lights to sailors around the world with the promise of 'fit 'n forget'.

Today Lopolight is firmly established as a leader within navigational lighting worldwide, with both the products and the company matured and robust, we stand ready to service your every need within this sector.

Kockum Sonics

Kockum Sonics designs high-quality niche products revolving around our core knowledge in software automation, acoustics and mechatronics. The company focuses for over 100 years on meeting demanding needs in the world wide marine markets with a strong commitment to customer satisfaction.

Marinelec Technologies

High-quality products, advanced technology and innovation make Marinelec Technologies one of the leaders in the design and manufacture of electronic safety equipment for safer, greener and more effective ships. The competence combined with an experience of over 35 years of successful innovations strengthen our main ambition: to offer our customers the best solutions when it comes to the safety of ships and their crew.
